nocti business: Beyond Academics Dr. Sandra Jenkins Cook, 2022-05-03 Could you use a handbook explaining every aspect of creating Christian vocational educational choices for students in your school or ministry? You will find this book an invaluable source of guidance to attain this goal. Christian school leaders are encouraged to reassess traditional course offerings of solely academics to discover how vocational educational options can be offered to their students. This book will not only challenge Christian school administrators and ministry leaders to explore vocational career and technical training programs, but also guide them in all aspects of the addition and development of the programs, including academic and biblical integration. Uniquely talented vocational students have been overlooked and abandoned in Christian education for far too long. The vocational educational field is white unto harvest! Think about it: If access to discipleship had been limited to only the academically inclined, the fishermen, the tentmakers, and the carpenters would have been excluded!
