my business apps: *All Brain and No Soul?* Robert A. Hunt, 2025-02-24 All Brain and No Soul? Real Humanity in an AI Age explores the profound shifts in human identity and understanding in the context of historical, scientific, and technological revolutions, particularly the rise of artificial intelligence. Beginning with the author's personal reflections on chaos and order in a changing world, it delves into humanity's displacement from the cosmic center through the Copernican Revolution, the evolution of modern science, and the redefining of intelligence and sentience. The narrative examines humanity's role within an expanding, indifferent universe and the implications of Darwin's theories on our relationship with nature and other species. It interrogates how technological advancements, like AI and brain-computer interfaces, reshape human self-perception

and blur boundaries between machines and humans. The book highlights the dangers of abstracting humanity into algorithms and idealized digital personas. Through a lens of history, religion, and philosophy, the author raises questions about what it means to be human in a world increasingly mediated by screens, algorithms, and artificial intelligences, urging readers to reflect on the balance between technological progress and retaining authentic human connections.

my business apps: *The Politics of Dating Apps* Lik Sam Chan, 2021-03-09 An examination of dating app culture in China, across user demographics—straight women, straight men, queer women, and queer men. In this exploration of dating app culture in China, Lik Sam Chan argues that these popular mobile apps are not merely a platform for personal relationships but also an emerging arena for gender and queer politics. Chan examines the opportunities dating apps present for women's empowerment and men's performances of masculinity, and he links experiences of queer dating app users with their vulnerable position as sexual minorities. He finds that dating apps are both portals to an exciting virtual world of relational possibilities and sites of power dynamics that reflect the heteronormativity and patriarchy of Chinese society.

my business apps: *App Kid* Michael Sayman, 2022-08-30 From the creator of the SocialAI app comes an inspiring and deeply personal coming of age memoir from one of Silicon Valley's youngest entrepreneurs. Michael Sayman is a second-generation Latino immigrant who taught himself how to code as a thirteen-year-old and went on to claim his share of the American dream. As his parents watched their restaurant business collapse in the wake of the Great Recession, Michael Sayman was googling "how to code." Within a year, he had launched an iPhone app that was raking in thousands of dollars a month, enough to keep his family afloat—and in America. Entirely self-taught, Sayman headed from high school straight into the professional world, and by the time he was seventeen, he was Facebook's youngest employee ever, building new features that wowed its founder Mark

Zuckerberg and are now being used by more than half a billion people every day. Sayman pushed Facebook to build its own version of Snapchat's Stories and, as a result, engagement on the platform soared across all demographics. Millions of Gen Z and Millennials flocked to Facebook, and as teen engagement rose dramatically on Instagram and WhatsApp, Snapchat's parent company suffered a billion-dollar loss in value. Three years later, Sayman jumped ship for Google. App Kid is the galvanizing story of a young Latino, not yet old enough to drink, who excelled in the cutthroat world of Silicon Valley and went on to become an inspiration to thousands of kids everywhere by following his own surprising, extraordinary path. In this candid and uplifting memoir, Sayman shares the highs and lows, the successes and failures, of his remarkable journey. His book is essential and affirming reading for anyone marching to the beat of their own drum.
