pharmaceutical business development jobs: Real World Drug Discovery Robert M. Rydzewski, 2010-07-07 Drug discovery increasingly requires a common understanding by researchers of the many and diverse factors that go into the making of new medicines. The scientist entering the field will immediately face important issues for which his education may not have prepared him: project teams, patent law, consultants, target product profiles, industry trends, Gantt charts, target validation, pharmacokinetics, proteomics, phenotype assays, biomarkers, and many other unfamiliar topics for which a basic understanding must somehow be obtained. In a single, readable volume it outlines processes and explains essential concepts and terms for the recent science graduate wondering what to expect in pharma or biotech, the medicinal chemist seeking a broader and more timely understanding of the industry, or the contractor or collaborator whose understanding of the commercial drug discovery process could increase the value of his contribution to it. - Interviews with well-known experts in many of the fields involved, giving insightful comments from authorities on many of the sub-disciplines important to cutting edge drug discovery. - Helpful suggestions gleaned from years of experience in biotech and pharma, which represents a repository drug discovery lore not previously available in any book. - Periodic Table of Drugs listing current top-selling drugs arranged by target and laid out so that structural similarities and differences are plain and clear. - Extensive use of diagrams to illustrate concepts like biotech startup models, proteomic profiling for target identification, Gantt charts for project planning, etc.

pharmaceutical business development jobs: ASEAN Economic Community Scorecard Sanchita Basu Das, 2013 The official AEC scorecard is expected to track the implementation of measures and the achievement of milestones committed in the AEC Strategic Schedule. However, the scorecard, in its current form, is too brief and general to be useful for the ASEAN citizens. This book attempts to fill this gap and evaluates the current status of and the progress towards the milestones of the AEC Blueprint. The overall message of the book is that even though ASEAN may miss some of its integration goals by 31 December 2015, it will certainly deliver some of the key initiatives - tariff elimination, establishing the ASEAN Single Window, laying the foundation of the regional investment initiative, advancing tourism services, moving ahead with ASEAN connectivity and the realization of ASEAN+1 free trade agreements. AEC's goal of forming an equitable and competitive regional economy will continue to be a work in progress. AEC 2015 is going to be a historic milestone that will raise ASEAN's profile and will help the region to maintain its centrality in the international community.
