qatar business class menu 2019: *Qatar 1975/76-2019* Anthony Axon, Susan Hewitt, 2020-09-25 The fourth in this series, the Contemporary Archive of the Islamic World (CAIW), this title draws on the resources of Cambridge-based World of Information, which since 1975 has followed the politics and economics of the region. Qatar's documented history begins in the mid-19th Century. Its location established it as having close, if differing links to Bahrain, Kuwait and Saudi Arabia. Notionally under Ottoman rule, Qatar did not become a de facto protectorate of Great Britain until some time after the end of the Ottoman empire. The discovery of oil in Qatar happened later than was the case with its neighbours. However, the discovery of substantial oil deposits, and later of enormous gas reserves changed Qatar beyond recognition, allowing it to claim in the 1980s that its inhabitants were the richest people on earth. Still a semi-feudal monarchy, it gained full independence in 1971 but was initially considered to be the least developed state in the Gulf. By the 21st century many close neighbours felt that in a number of respects Qatar was becoming an unreliable partner. To the extent that in 2017 a number of its fellow Gulf Cooperation Council (GCC) members, as well as other states – notably Egypt - broke off diplomatic relations.

qatar business class menu 2019: *Crisis in Sri Lanka and the World* Asoka Bandarage, 2023-05-22 This book provides a broad picture of Sri Lanka's on-going political and economic crisis

as the culmination of several centuries of colonial and neo-colonial developments. The book presents the Sri Lankan crisis as an exemplification of a broader global existential crisis facing more and more debt trapped countries, especially in the post-colonial Global South. The book's in-depth case study raises important questions pertaining to sovereignty and political and economic democracy in Sri Lanka and the world at large. The book also explores the emergence of the crisis in the context of the accelerating geopolitical conflict between China and the USA in the Indian Ocean. It ponders if the debt crisis, economic collapse and political destabilization in Sri Lanka were intentionally precipitated to the advantage of the Quadrilateral Alliance (USA, India, Australia and Japan). Moving beyond geopolitical rivalry, the book juxtaposes Sri Lanka's political-economic crisis with the broader ecological crisis of climate change and sea-level rise. The book concludes with a consideration of the ethical dilemmas behind the debt and survival crisis in Sri Lanka and across the world. It points out a range of social movements and initiatives in Sri Lanka and the Global South which subscribe to collective and ecological alternatives and a Middle Path of sustainability and social justice.
