sports complex business plan: *Rethinking Ideology in the Age of Global Discontent* Barrie Axford, Didem Buhari-Gulmez, Seckin Baris Gulmez, 2017-12-01 Over the last decade, anti-government demonstrations worldwide have brought together individuals and groups that were often assumed unlikely to unite for a common cause due to differences in ideological tendencies. They have particularly highlighted the role of youth, women, social media, and football clubs in establishing unusual alliances between far left and far right groups and/or secular and religious segments of the society. In this wide-ranging volume, the contributors question to what extent political ideologies have lost their explanatory power in contemporary politics and society. This book aims to contribute to the ongoing debates about the relationship between ideology and public protests by introducing the global context that allows the comparison of societies in different parts of the world in order to reveal the general patterns underlying the global era. Tackling a highly topical issue, this book will be of particular interest to students and scholars of international relations, social movements and globalization.

sports complex business plan: Ridgeland! The Closing of a Frontier Sherman Lewis, 2021 In 1950, the open space lands from Hayward to Pleasanton in California were privately owned and sprawl development was booming. By 2020, the frontier was closed, and almost all the shorelands and ridgeland in this large area were protected as public open space and by regulation. The land was saved by many advocates and these are their stories, many narratives sometimes parallel to each other, other times connecting, involving elections, referendums, litigation, bond measures, lobbying, organizing, and campaigns. Each story is simple enough, but taken together they add up to a long and complex history. --- Preserving the Ridgeland, the story of the decades long battle to protect open space, and the unique solution that led to the ultimate creation of a new EBRPD park. -Tom Pico, former Mayor, City of Pleasanton --- Ridgeland! is the real thing. Like the local government processes it describes in excruciating detail, it is both engrossing and tedious at the same time. (Very considerably, the author advises when some details can be skipped.) Reading it tends to put one - at least it put me - in an altered state of consciousness. I participated in some of the episodes recounted in the book, and had a pretty good sense at the time of the overall project. I knew Sherman had absolute conviction in his cause, and observed his unfailingly civil tenacity - some might call it stubbornness - but reading about the full duration and scope of the effort in Ridgeland! still blew my mind. Unlike anything else I have ever read, Ridgeland! does not just tell us, but shows us (again, in detail), how successful long-term activism works. Without the tenacity and long-term commitment that this book describes activism is just political Brownian motion. This book should be required reading in every college-level political science curriculum. -Zach Cowan, Berkeley City Attorney, retired. --- "Sherman Lewis' Ridgeland makes it clear what it takes to save important biologically-rich landscapes for people, plants and animals of today and of the future." Janet Cobb, California Wildlife Foundation/California Oaks. --- "My takeaway from your book is that we had a small window of time and opportunity where the right people combined with ample passion, willing constituents, and some money created a legacy that will endure forever." -Jocelyn Combs, Former Director, East Bay Regional Park District --- Sherman Lewis has created the first comprehensive book documenting the process of natural lands preservation by local community

activists, environmental organizations, and the East Bay Regional Park District from 1960 to 2020. There's a lot for California historians, open space preservation advocates, and community organizers to discover in this 60-year chronicle of the conflicts and resolutions that led to permanent protection of native habitat from the eastern shoreline of San Francisco Bay to the western hills of the inland Tri-Valley. Learn how local residents and East Bay voters successfully protected these natural resources, overcoming intense pressure from developers who sought building approvals from local governments. Sherman Lewis bears witness to it all. Includes beautiful photographs, documents, maps, and personal interviews. Inspiring! -Becky Dennis, Former City Councilmember, City of Pleasanton

sports complex business plan: Commercial Management David Lowe, 2013-05-31

Commercial Management: theory and practice defines the role of commercial management within project-oriented organisations, providing a framework for and helping to develop a critical understanding of the factors that influence commercial management practice. It also identifies generic aspects of this practice and provides a theoretical foundation to these activities, by reference to existing and emergent theories and concepts, as well as to relevant management best practice. The book is structured into four parts: Part 1 Introduction - Commercial Management in Project Environments explores the nature of commercial practice within project-oriented organisations at the buyer-seller interface. It presents a Commercial Management framework, which illustrates the multiple interactions and connections between the purchaser's procurement cycle and a supplier's bidding and implementation cycles. Additionally, it outlines the principle activities undertaken by the commercial function, identifies the skills and abilities that support these activities and reviews the theories and concepts that underpin commercial practice. Finally, it identifies areas of commonality of practice with other functions found within project-oriented organisations, plus sources of potential conflict and misunderstanding. Part 2 - Elements of Commercial Theory and

Practice covers commercial leadership; exploring strategy; risk and uncertainty management; financial decision-making; and key legal issues. Part 3 – Approaches to Commercial Practice addresses best practice management; and commercial and contracting strategies and tactics. Finally, Part 4 – Case Studies offers two extended case studies: Football Stadia (the Millennium Stadium, Cardiff; the Emirates Stadium, Islington; and Wembley Stadium, London); and Heathrow Terminal 5. The book provides a one-stop-shop to the many topics that underpin commercial management practice from both a demand (buy-side) and a supply (sell-side) perspective. It will help develop an understanding of the issues influencing commercial management: leadership, strategy, risk, financial, legal, best practice management and commercial and contracting strategy and tactics. This book's companion website is at <http://www.wiley.com/go/lowecommercialmanagement> and offers invaluable resources for both students and lecturers: • PowerPoint slides for lecturers on each chapter • Sample exam questions for students to practice • Weblinks to key journals and relevant professional bodies

sports complex business plan: Entrepreneurs and SMEs in Rwanda David L. Poole, 2021-01-28 Entrepreneurs and Small and Medium-sized Enterprises (SMEs) have become the darlings of neoliberal development thinking, with the received wisdom being that such enterprises hold the key to the economic transformation of low-income countries. This thinking has profoundly influenced development policy in Rwanda, but has singularly failed to deliver the much anticipated emergence of a new class of entrepreneurs and a vibrant SME sector. This book deconstructs the myths around entrepreneurship and SMEs, and reveals how neoliberal approaches towards microcredit and related programmes have failed to address the economic challenges facing countries like Rwanda. Drawing on his study of successful and aspiring entrepreneurs, Poole identifies the factors associated with successful entrepreneurship. He uncovers the unintended consequences of the entrepreneurship and SME development prescription, and offers key policy insights which have implications for Rwanda and beyond.

sports complex business plan: *Sports Law in the Czech Republic* Martin Procházka, 2018-08-03 Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of sports law in the Czech Republic deals with the regulation of sports activity by both public authorities and private sports organizations. The growing internationalization of sports inevitably increases the weight of global regulation, yet each country maintains its own distinct regime of sports law and its own national and local sports organizations. Sports law at a national or organizational level thus gains a growing relevance in comparative law. The book describes and discusses both state-created rules and autonomous self-regulation regarding the variety of economic, social, commercial, cultural, and political aspects of sports activities. Self-regulation manifests itself in the form of by-laws, and encompasses organizational provisions, disciplinary rules, and rules of play. However, the trend towards more professionalism in sports and the growing economic, social and cultural relevance of sports have prompted an increasing reliance on legal rules adopted by public authorities. This form of regulation appears in a variety of legal areas, including criminal law, labour law, commercial law, tax law, competition law, and tort law, and may vary following a particular type or sector of sport. It is in this dual and overlapping context that such much-publicized aspects as doping, sponsoring and media, and responsibility for injuries are legally measured. This monograph fills a gap in the legal literature by giving academics, practitioners, sports organizations, and policy makers access to sports law at this specific level. Lawyers representing parties with interests in the Czech Republic will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative sports law.
