Learn how frictionless organizations cut costs, grow revenue, and create loyal fans by creating products and services that work so well, their customers never have to contact them for the wrong reasons. This book will help any customer-facing organization deliver better customer experiences, save money, and increase revenue. Veteran customer service experts Bill Price and David Jaffe, coauthors of the bestseller *The Best Service Is No Service*, explain how organizations can design products, sales, and support so that customer effort is reduced or, better still, removed. This simplicity for the customer is what Price and Jaffe call frictionless. The book defines a straightforward methodology, drawing on more than thirty practical examples from leading companies across four continents. The approach provides a radically different way for the whole business to focus on the customer experience. It explains how any organization can look at all customer interactions as potential opportunities for improvement and question whether they are helpful or represent symptoms of friction. Lower friction innovators are disrupting established businesses in every industry. This detailed guide shows how any business-from start-ups to major multinational corporations-can remove friction. Being frictionless has become a strategic necessity, and now this strategy is available to any organization.

The world is still warming, sea levels are still rising, and the Antarctic Peninsula is home to Earth's newest nation, with life quickened by ecopoets spreading across valleys and fjords exposed by the retreat of the ice. Austral Morales Ferrado, a child of the last generation of ecopoets, is a husky: an edited person adapted to the unforgiving climate of the far south, feared and despised by most of its population. She's been a convict, a corrections officer in a labour camp, and consort to a criminal, and now, out of desperation, she has committed the kidnapping of the century. But before she can collect the ransom and make a new life elsewhere, she must find a place of safety amongst the peninsula's forests and icy plateaus, and evade a criminal gang that has its own plans for the teenage girl she's taken hostage. Blending the story of Austral's flight with the fractured history of her family and its role in

the colonisation of Antarctica, *Austral* is a vivid portrayal of a treacherous new world created by climate change, and shaped by the betrayals and mistakes of the past. *Austral* has been optioned for television by Circle of Confusion, the company who brought *The Walking Dead* and *Locke and Key* to the small screen. They've recruited award-winning screenwriter Elise McCredie (*Stateless*) and director Erik Skjoldbjærg (*An Enemy of the People*, *Insomnia*) to work on this exciting project.
