tamu business minor: Technology Entrepreneurship and Sustainable Development

Pradeep Ray, Rajib Shaw, 2022-06-16 This book discusses the need for entrepreneurship for sustainable development from the perspective of Asia, the fastest growing region in the world. The world is now witnessing a spectacular rise of technology entrepreneurship, involving mobile phones, artificial intelligence, geospatial information systems and social media. On the other hand, governments all over the world, particularly those in low and medium income countries, are facing severe resource constraints in developing the livelihood and well-being of citizens. Although many non-government organizations (NGOs) have worked on various development projects in a number of social sectors such as health, education, disabilities, poverty alleviation and environment, there is still substantial scope for technological innovation, including more efficient, effective and user-friendly solutions in different parts of the world. This book is organized into 2 parts and consists of 17 chapters. The first part explores education and well-being, and the second part discusses the climate, environment and disaster management.

tamu business minor: Advance Pricing Agreements Michelle Markham, 2012-06-28

Transfer pricing (the pricing of cross-border intra-firm transactions between related parties) is now the top international tax issue faced by multinational enterprises. In an international taxation environment characterized by rigorous enforcement of transfer pricing documentation, disclosure, and audit processes, a need has arisen for multinationals to be cognizant of the impact of their 'tax risk appetite' on their relationship with taxation authorities and to be aware of how best to manage their transfer pricing arrangements. The most promising development has been the growing commitment to Advance Pricing Agreements (APAs) - arrangements made prospectively between a multinational taxpayer and one or more revenue authorities, agreeing on an appropriate set of criteria for the determination of the transfer pricing of the covered transactions over a period of time. This is the first book to offer expert insights on APAs from a practical perspective. By focusing on the United States and Australia, the two countries that were at the forefront of adopting APAs and whose wealth of experience over two decades confirms their APA programs as the global paradigms, the author is able to highlight the advantages and disadvantages of pursuing an APA and to shed light on the powerful efficacy of this strategy for avoiding transfer pricing disputes. In addition, the author enlists the views of revenue authorities, transfer pricing practitioners, and corporate counsel who deal with the realities of transfer pricing assessment and compliance on an ongoing basis, offering acute insight into how APAs really work in a practical way. This book contributes to the body of knowledge on APAs in the context of transfer pricing by providing in-depth scrutiny of the most important issues surrounding this critical area, and by examining innovations in APAs in the United States and in Australia. Its unmatched coverage will be welcomed

by tax experts at law firms and multinational companies as well as by revenue officials, policymakers, and scholars and researchers in international taxation.

tamu business minor: Corporate Citizenship in Africa Wayne Visser, Malcolm McIntosh, Charlotte Middleton, 2017-09-08 Corporate citizenship is enmeshed in the debate about Africa's future. Africa is the continent where the social needs are greatest and where the benefits of globalisation have been least felt. What makes corporate citizenship in Africa not only fascinating, but also of critical importance, is that the continent embodies many of the most vexing dilemmas that business faces in attempts to be responsible, ethical and sustainable. This unique collection for the first time brings together in one publication the critical debates, perspectives, experiences and success stories in the emerging field of corporate citizenship in Africa. The book addresses a number of key questions: What research has been conducted on corporate citizenship in Africa over the past ten years? How are the concepts and challenges of corporate citizenship in Africa different, compared to other regions of the world? Which industry sectors are leading in the implementation of corporate citizenship in Africa? What are some of the dilemmas facing companies that are striving to be good corporate citizens in Africa? What are some of the best-practice case studies of companies' corporate citizenship programmes in Africa? What can Africa learn from the rest of the world about corporate citizenship, and what can it teach others? The book acts as a bridge in many ways:

between academic theory and business practice; between notions of corporate citizenship originating in developed countries and emerging concepts incubated in a developing-country context; between the experiences of multinationals and the perspectives of small and medium-sized enterprises; between different countries and regions within Africa and around the globe. This publication marks a change in the tide – a groundswell towards a more vigorous debate and robust research agenda on corporate citizenship in Africa. It will be essential reading for all those involved in the rapidly growing corporate responsibility movement.
