However, the backward-looking airline, managed using old strategic levers and short-term metrics, will cease to exist, merge, shrink, become more

dependent on government support, or become irrelevant. 'Management innovations' are not going to deliver the required improvements; innovation within management is essential for airlines' survival. In *Flying Ahead of the Airplane*, Nawal Taneja analyzes global changes and thought-provoking scenarios to help airline executives adjust and adapt to the chaotic world. Drawing on his experience of real airline situations worldwide, the author concludes that there is a gulf between what executives are doing now and what they need to do to stay ahead of the curve. To close this gap, the author suggests that airline executives focus on just three relevant initiatives: a) aligning business and technology strategies, b) redesigning organization structures to centralize the role of the scheduling function, and c) developing relevant brands that integrate social networking technology. To support this third initiative, the book provides insights on branding from 20 fascinating non-aviation case studies from around the world. *Flying Ahead of the Airplane* will assist practitioners in airlines of every size to integrate future trends into their mainstream thinking and launch flexible business models to manage risk and compete effectively in the 'flattening world'.

A Case Study of the Lufthansa Miles & More Programm Gesa Vanessa Krack, 2022-04-07 Bachelor Thesis from the year 2019 in the subject Business economics - Offline Marketing and Online Marketing, grade: 2,2, University of Applied Sciences Essen (FOM Hannover), language: English, abstract: This thesis firstly covers definitions of customer loyalty, loyalty cards and the different types of loyalty programs. Section two deals with some important details of Lufthansa's Miles & More program, such as the background of Miles & More, important facts about Star Alliance, the possibilities that Lufthansa offers its frequent flyers to earn and spend reward miles, information about the different status levels of Miles & More, and basic knowledge about data protection with Miles & More. In addition to the established research, an empirical study in the form of a 15-question survey was performed on several platforms to which frequent flyers have access. This survey is discussed in the third section of this thesis. To obtain information about how frequent flyers value the Miles & More program, this first-hand information was required and used to evaluate the Miles & More program. The performed survey can be found in Appendix 1, page 51 ff., and the results of the survey can be found in Appendix 2, page 58 ff. The survey consisted of four parts: the first part contained information about the topic itself and data protection. The second part comprised four questions about the flying pattern of each participant, and the frequent flyer status that each participant had with Miles & More. The third and most extensive part of the survey dealt with the number of miles that each participant owned, the benefits for frequent flyers with Miles & More, and the satisfaction of the participants with the program. The last part contained questions for statistical reasons, such as the gender and age of the participants. The fourth section of this thesis further addresses the results of the survey and provides explanations for why the most important benefit of Lufthansa's Miles & More program is so significant for customers. The fifth section deals with improvements to make the Miles & More program much more appealing to customers, regarding frequent flyer satisfaction, the earning and spending of frequent flyer miles, and the addition to the program of new benefits for frequent flyers. This thesis concludes the topic in the sixth section.
