truist small business: Fintech, Small Business & The American Dream Karen G. Mills, 2024-06-21 Small businesses are the backbone of the U.S. economy. They are the biggest job creators and offer a path to the American Dream. But for many, it is difficult to get the capital they need to operate and succeed. In *Fintech, Small Business & the American Dream*, former U.S. Small Business Administrator and Senior Fellow at Harvard Business School, Karen G. Mills, focuses on the needs of small businesses for capital and how technology will transform the small business lending market. This is a market that has been plagued by frictions: it is hard for a lender to figure out which small businesses are creditworthy, and borrowers often don't know how much money or what kind of loan they need. Every small business is different; one day the borrower is a dry cleaner and the next a parts supplier, making it difficult for lenders to understand each business's unique circumstances. Today, however, big data and artificial intelligence have the power to illuminate the opaque nature of a smallbusiness's finances and make it easier for them access capital to weather bumpy cash flows or to invest in growth opportunities. Beginning in the dark days following the 2008-9 recession and continuing through the crisis of the Covid-19 Pandemic, Mills charts how fintech has changed and will continue to change small business lending. In the new fintech landscape financial products are embedded in applications that small business owners use on daily basis, and data powered algorithms provide automated insights to determine which businesses are creditworthy. Digital challenger banks, big tech and traditional banks and credit card companies are deciding how they want to engage in the new lending ecosystem. Who will be the winners and losers? How should regulators respond? In this pivotal moment, Mills elucidates how financial innovation and wise regulation can restore a path to the American Dream by improving access to small business credit. An ambitious book grappling with the broad significance of small business to the economy, the historical role of credit markets, the dynamics of innovation cycles, and the policy implications for regulation, this second edition of *Fintech, Small Business & the American Dream* is relevant to bankers, regulators and fintech entrepreneurs and investors; in fact, to anyone who is interested in the future of small business in America.

truist small business: Monopolized David Dayen, 2020-06-09 From the airlines we fly to the food we eat, how a tiny group of corporations have come to dominate every aspect of our lives—by one of our most intrepid and accomplished journalists If you're looking for a book . . . that will get your heart pumping and your blood boiling and that will remind you why we're in these fights—add this one to your list. —Senator Elizabeth Warren on David Dayen's *Chain of Title* Over the last forty years our choices have narrowed, our opportunities have shrunk, and our lives have become governed by a handful of very large and very powerful corporations. Today, practically everything

we buy, everywhere we shop, and every service we secure comes from a heavily concentrated market. This is a world where four major banks control most of our money, four airlines shuttle most of us around the country, and four major cell phone providers connect most of our communications. If you are sick you can go to one of three main pharmacies to fill your prescription, and if you end up in a hospital almost every accessory to heal you comes from one of a handful of large medical suppliers. Dayen, the editor of the American Prospect and author of the acclaimed Chain of Title, provides a riveting account of what it means to live in this new age of monopoly and how we might resist this corporate hegemony. Through vignettes and vivid case studies Dayen shows how these monopolies have transformed us, inverted us, and truly changed our lives, at the same time providing readers with the raw material to make monopoly a consequential issue in American life and revive a long-dormant antitrust movement.

truist small business: *Brown Faces, White Spaces* Latasha Morrison, 2025-06-03 ECPA CHRISTIAN BOOK AWARD FINALIST • The New York Times bestselling author of *Be the Bridge* calls people of faith to be a part of lasting change and help heal the racial disparity in our country—together. “A journey that encourages us to love our neighbors in real time as we understand the history that has shaped us.”—Terence Lester, PhD, founder of Love Beyond Walls We might think of systemic racism as an unfortunate part of American history, something that happened back in the day. But the systems were never truly dismantled in our country, leaving artifacts of injustice that continue to affect every aspect of life for Black and Brown Americans. Many of us feel overwhelmed by the problem, unsure how we can make a difference. Yet God calls the church to stand firmly committed to racial reconciliation—and for each one of us to make choices that lead to healing. In *Brown Faces, White Spaces*, Latasha Morrison—a speaker, bridge builder, and champion for unity—explores nine aspects of American life where systemic racism still flourishes, including education, healthcare, the justice system, entertainment, and the church. Through story, historical context, and present realities, Morrison looks at what it means to recognize and confess the truth about inequities in the system (preparation), commit ourselves to changing the system (dedication), and move into true freedom as a society (liberation). Drawing on rich sociological insights, as well as experiences of family and friends and from her own life, Morrison asks: How does knowing our country’s history make a difference in how we live today? How does Jesus’s divine act of reconciliation on the cross lead to human liberation from oppression? How might we create systems for all to flourish? This honest, hope-filled book shows us how we can reform historically white spaces and create systems that work for the good of all. Join the bridge-building movement that is listening, learning, and working together for equity in every aspect of our lives. Includes questions for personal reflection and group discussion.

truist small business: *Reframing the American Dream* Shawn Chandler Bingham, Michaela Emily Howells, 2024-12-31 More than a fad, tiny housing reflects a long history of alternative living and offers an interdisciplinary - and sometimes contradictory - window into consumerism, structural

equity, personal aspirations, and political landscapes. Despite traditional housing ideals and challenging local building codes, tiny housing has garnered significant interest from individuals, political leaders, developers, big box stores, and curious viewers of HGTV. Reframing the American Dream draws on the expertise of urban planners, architects, public policy researchers, sociologists, and anthropologists who use tiny housing as a lens to explore critical questions: How can tiny housing help address the increasing demand for affordable housing? How are tiny homes influencing local and national politics? How does tiny housing highlight structural inequities related to disability, homelessness, gender, and race? What are the implications for building codes and sustainable construction? Can they raise awareness about environmental issues? How have tiny homes been integrated into mainstream culture, and what impact might corporate interests have on housing markets? What practical challenges do tiny housers face? How does tiny housing fit with housing dreams of the past and present? Featuring case studies, interviews, and surveys, Reframing the American Dream provides a deeper understanding beyond glossy media portrayals, connecting individual experiences with cultural ideals and institutional power.

truist small business: Activate Brand Purpose Scott Goodson, Chip Walker, 2021-03-03
SHORTLISTED: Business Book Awards 2022 - International Business Book category CATEGORY
SILVER WINNER: Axiom Awards 2022 - Business Commentary Category The greatest challenge facing leaders is activating and actioning purpose based brands to the people who matter inside the company and out. Recent statistics prove that more than 87% of consumers would purchase a product because a company advocated for an issue they cared about, and more than two-thirds would refuse to do so if the company supported an issue contrary to their beliefs. We live in an age of activism - the conscious consumer is more socially aware than ever before, and this is reflected in their buying habits. Yet, activism on behalf of brands is lagging. While many claim to be 'purpose driven', far too often this purpose is relegated to a plaque above the CEO's desk, and never goes any further. Or, worse, the 'purpose' is transparently used as a marketing ploy, but never acted upon in any real way. Activate Brand Purpose shows readers how to transform their brand's purpose into meaningful action by sparking a company wide cultural movement, beginning internally and permeating externally. Regardless of whether your purpose is lofty and socially conscious, or all business, focus on galvanizing people, and they will respond if you can prove that you care about that purpose, and that you're working to realize it, rather than simply chasing the next dollar. This book contains a clearly explained, proven framework that will make this happen.

truist small business: Critical Empathy as Teacher Education Reform Thomas A. Lucey, Kathleen S. Cooter, 2024-08-01 This book considers teacher training in social studies and finds it lacking a sense of genuine critical empathy, a sense of shared humanity. Current teacher education generally defines critical thinking as processes which examine topics in greater complexity, but does

not prepare candidates to study, confront, and challenge existing social structures. Often in response to state mandates, teacher education programs rate and interpret candidate quality based on their conformance with standards and defined outcomes. There is a lack of tolerance for alternative views that may substantially challenge the often-oppressive hierarchical system of authority in our world. This volume which includes contributions from social studies educators in the U.S., Canada, and Australia offers the thinking and practice of teacher education scholars who embrace the idea and practices of empathy in the social studies classroom. Defined as “the ability to understand and share the feelings of another”, direct emphasis on empathy represents a vehicle for developing a sense of mutual understanding and questioning of economic and social systems. Developing teacher candidates who comprehend and experience the feelings of diverse education stakeholders provides opportunities for harmonious teaching and learning environments situated in the lives of learners.

truist small business: *Radical Nation* Sean Spicer, 2021-10-26 RADICAL NATION makes it clear what is at stake. If you want to Save America you must read this—it is MAGA all the way.” — PRESIDENT DONALD J. TRUMP The Biden-Harris progressive agenda presents a radical change to the American economy, values, national security, and freedom. From the former Trump White House press secretary and New York Times bestselling author of *THE BRIEFING* and *LEADING AMERICA* comes a stark warning: Under Joe Biden and Kamala Harris, America is lurching towards economic collapse, runaway inflation, wide-open borders, an all-out assault on human life and religious liberty, a K-12 school indoctrination plan, “election reforms” to ensure never-ending Democratic Party rule, and more. RADICAL NATION is a bold grassroots agenda for defending America against the Progressives’ Socialist agenda. Featuring powerful stories that will move you and keep you riveted, this book will channel conservatives discouragement, anger, and betrayal into meaningful action to keep America free, strong, and secure for our children and grandchildren.

truist small business: *Major League Sports and the Property Tax* Geoffrey Propheter, 2022-12-12 This book updates the public policy dialogue on major league sports facilities and the property tax in the US. By providing a rigorous treatment of the property tax within the context of major league sports facilities, this volume debunks the widely asserted claim that most major league teams do not pay property taxes. The chapters methodically lay out the property tax status of every activity major league facility, the actual worth of that property tax expenditure, and the impact of property tax exemptions on local public services. Using empirical data, the volume provides a foundation for informed policy making regarding major league sports facilities. As such, this book will be a useful tool for researchers and students in sports economics, sports management, public policy, and public finance, as well as practitioners involved in the policy process. Economists have extensively studied the billions of dollars that state and local governments have devoted to funding professional sports stadiums. However, the implicit subsidies that stadiums typically receive through property tax exemptions has received scant attention. In *Major League Sports and the Property Tax*,

Geoffrey Prophter thoroughly examines the common practice of removing sports venues from local tax rolls, which results in millions of dollars in forgone tax revenue that is often not reported in the public accounting of costs. Prophter provides a detailed examination of how property taxes are administered and the implications that derive from stadium property tax exemptions and abatements. His comprehensive analysis presents stylized facts and specific examples that provide the most thorough treatment on the subject to date. The breadth of analysis and meticulous coverage of relevant issues demonstrates why Prophter has emerged as a leading expert on the economics of stadiums. This is perhaps the most important book on the public financing of stadiums written in the past decade, and anyone interested in stadium economics will want their own copy to read and reference. JC Bradbury, Professor of Economics, Kennesaw State University
