truist bank business: Fintech, Small Business & The American Dream Karen G. Mills, 2024-06-21 Small businesses are the backbone of the U.S. economy. They are the biggest job creators and offer a path to the American Dream. But for many, it is difficult to get the capital they need to operate and succeed. In *Fintech, Small Business & the American Dream*, former U.S. Small Business Administrator and Senior Fellow at Harvard Business School, Karen G. Mills, focuses on the needs of small businesses for capital and how technology will transform the small business lending market. This is a market that has been plagued by frictions: it is hard for a lender to figure out which small businesses are creditworthy, and borrowers often don't know how much money or what kind of loan they need. Every small business is different; one day the borrower is a dry cleaner and the next a parts supplier, making it difficult for lenders to understand each business's unique circumstances. Today, however, big data and artificial intelligence have the power to illuminate the opaque nature of a small business's finances and make it easier for them access capital to weather bumpy cash flows or to invest in growth opportunities. Beginning in the dark days following the 2008-9 recession and continuing through the crisis of the Covid-19 Pandemic, Mills charts how fintech has changed and will continue to change small business lending. In the new fintech landscape financial products are embedded in applications that small business owners use on daily basis, and data powered algorithms provide automated insights to determine which businesses are creditworthy. Digital challenger banks, big tech and traditional banks and credit card companies are deciding how they want to engage in the new lending ecosystem. Who will be the winners and losers? How should regulators respond? In this pivotal moment, Mills elucidates how financial innovation and wise regulation can restore a path to the American Dream by improving access to small business credit. An ambitious book grappling with the broad significance of small business to the economy, the historical role of credit markets, the dynamics of innovation cycles, and the policy implications for regulation, this second edition of *Fintech, Small Business & the American Dream* is relevant to bankers, regulators and fintech entrepreneurs and investors; in fact, to anyone who is interested in the future of small business in America.

truist bank business: Fearrington Bill Arthur, 2024-08-14 In 1974, R.B. Fitch of Chapel Hill bought 632 acres in Chatham County, North Carolina, just outside Chapel Hill, with a vision of creating a community in the style of the English villages he admired when serving as a U.S. Air Force pilot in the United Kingdom in the 1950s. With his wife Jenny, he began constructing the project and today, 50 years later, Fearrington Village is a major development in the region with some 1,600 houses, a nationally known luxury inn, a five-star restaurant, a bookstore, and a spa, drawing tourists and residents from all over. Fearrington Village was the first Planned Unit Development in Chatham County and one of the first in the state. It has influenced other developments and Fearrington residents have had an effect on the state's economy and politics. The Chapel Hill-Carrboro Business Hall of Fame has called Fearrington Village an example of an exquisitely planned and executed community. This first comprehensive history of the village includes excerpts from R.B. Fitch's interviews in 2011 with the Southern Oral History Project at UNC, which are published here for the first time.

truist bank business: Activate Brand Purpose Scott Goodson, Chip Walker, 2021-03-03
SHORTLISTED: Business Book Awards 2022 - International Business Book category CATEGORY SILVER WINNER: Axiom Awards 2022 - Business Commentary Category The greatest challenge facing leaders is activating and actioning purpose based brands to the people who matter inside the company and out. Recent statistics prove that more than 87% of consumers would purchase a product because a company advocated for an issue they cared about, and more than two-thirds would refuse to do so if the company supported an issue contrary to their beliefs. We live in an age of activism - the conscious consumer is more socially aware than ever before, and this is reflected in their buying habits. Yet, activism on behalf of brands is lagging. While many claim to be 'purpose driven', far too often this purpose is relegated to a plaque above the CEO's desk, and never goes any further. Or, worse, the 'purpose' is transparently used as a marketing ploy, but never acted upon in any real way. Activate Brand Purpose shows readers how to transform their brand's purpose into meaningful action by sparking a company wide cultural movement, beginning internally and permeating externally. Regardless of whether your purpose is lofty and socially conscious, or all

business, focus on galvanizing people, and they will respond if you can prove that you care about that purpose, and that you're working to realize it, rather than simply chasing the next dollar. This book contains a clearly explained, proven framework that will make this happen.

truist bank business: Laundering Black Rage Too Black, Rasul A Mowatt, 2024-04-11 Laundering Black Rage: The Washing of Black Death, People, Property, and Profits is a spatial and historical critique of the capitalist State that examines how Black Rage—conceived as a constructive and logical response to the conquest of resources, land, and human beings racialized as Black—is cleaned for the unyielding means of White capital. Interlacing political theory with international histories of Black rebellion, it presents a thoughtful challenge to the counterinsurgent tactics of the State that consistently convert Black Rage into a commodity to be bought, sold, and repressed. Laundering Black Rage investigates how the Rage directed at the police murder of George Floyd could be marshalled to funnel the Black Lives Matter movement into corporate advertising and questionable leadership, while increasing the police budgets inside the laundry cities of capital - largely with our consent. Essayist/Performer Too Black and Geographer Rasul A. Mowatt assert Black Rage as a threat to the flow of capital and the established order of things, which must therefore be managed by the process of laundering. Intertwining stories of Black resistance throughout the African diaspora, State building under capitalism, cities as sites of laundering, and the world making of empire, Laundering Black Rage also lays the groundwork for upending the laundering process through an anti-colonial struggle of reverse-laundering conquest. Relevant to studies of race and culture, history, politics, and the built environment, this pathbreaking work is essential reading for scholars and organizers enraged at capitalism and White supremacy laundering their work for nefarious means.
