Orlebeke, 2021-09-30 Originally published in 1979, the world's leading researchers contributed chapters describing their work on the orienting reflex in humans. The contributions, at the time current and comprehensive, in a sense that each facet of contemporary research was represented, address the orienting reflex, now recognized as a fundamental component of human learning and

cognitive function. The authors contributing to this volume emphasize both theoretical and methodological issues, as well as present more empirical research. Here is a volume that spans all current work on the orienting reflex in humans, both basic and applied, from the laboratory as well as clinical data, and which would be of immense interest to psychologists, psychophysicists, psychiatrists, physiologists, and all others interested in this fascinating topic.

ucr business majors: Barron's Best Buys in College Education Lucia Solórzano, 1994 The editors chose 280 schools in every state by looking at percentage of faculty with Ph.D.s, percentage of entering freshmen who graduate, and percentage of graduates seeking advanced degrees. Costs ran the gamut, but compare favorably with comparable institutions. Profiles include coverage of financial issues--tuition and fees, financial aid, salaries after graduation--as well as analyses of student life, academic programs, and majors.
