And it is imperative that we understand the operation of economic power in a globalized world if we are to address the most challenging issues our world is facing today, from climate change to world hunger and poverty. This revolutionary work rethinks globalization as a power system feeding from, and in competition with, the state system. Cutting across disciplines of law, politics and economics, it explores how multinational enterprises morphed into world political organisations with global reach and power, but without the corresponding responsibilities. In illuminating how the concentration of property rights within corporations has led to the rejection of democracy as an ineffective system of government and to the rise in inequality, Robé offers a clear pathway to a fairer and more sustainable power system.

**the american business association:** Guidebook for Supporting Economic Development in Stability Operations Keith Crane, 2009 This guidebook is designed to help U.S. Army personnel more effectively use economic assistance to support economic and infrastructure development. The guidebook should help tactical commanders choose and implement more effective programs and projects in their areas of responsibility and better understand the economic context of their efforts.

It describes key characteristics of the economic environment, the key players that soldiers are likely to encounter, and who may be involved in what sorts of assistance efforts. It also provides suggestions on what to and what not to do, with examples from current and past operations. Suggestions on providing assistance are grouped into the following areas: humanitarian assistance; infrastructure and essential services; agriculture; currencies, budgets, finance, and foreign trade; private sector development and employment generation; natural resource management; and the effects of the U.S. military on local economies. To write this guidebook, the authors visited commanders in Afghanistan, conducted interviews with returning U.S. military officers, drew on their own experiences in Iraq, Liberia, and the Balkans, and tapped the substantial literature about effective economic assistance. -- provided by publisher.
