On December 14, 2010, Customs and Border Patrol Agent Brian Terry, a United States Marine, was killed while on patrol just miles from the Mexican border. The firearms found at the scene were semi-automatic rifles that were allowed to walk as part of Operation Fast and Furious. Congressional Republicans have investigated Fast and Furious since January 2011. Over the course of the investigation, the Justice Department has provided false information, stonewalled document requests, produced scores of blacked-out pages and duplicate documents, and refused to comply with two congressional subpoenas. In August 2012, the U.S. House of Representatives Office of General Counsel filed suit against the Justice Department. On January 19, 2016, United States District Judge Amy Berman Jackson issued her opinion and ordered DOJ release documents previously withheld under the President's executive privilege claim. On April 8, 2016, DOJ complied with the Judge's order, delivering more than 20,500 pages of documents to the Committee. CONTENTS: Statement of Michael E. truvisa business: **Breakthrough Business Results With MVT** Charles W. Holland, 2005-04-01 The first and only guide to using MVT as a breakthrough management tool MVT(TM) (Multivariable Testing) has been heralded as a breakthrough business tool in major publications such as Forbes, the Wall Street Journal, The Economist, and Business-Week. Although MVT could become one of the most widely used management tools and has been applied by leading companies in every industry to create billions of dollars of value-no book on it has been published, until now. In Breakthrough Business Results with MVT, MVT creator and guru Charles Holland shows managers how multivariable testing-an advanced mathematical method that allows simultaneous testing of up to 40 variables-can dramatically improve efficiency and profits in any organization. MVT reveals to managers precisely which factors have a positive impact on any important business decision or

process, which have a negative impact, and which have no impact at all. Very often the results are radically counterintuitive. MVT identifies quickly the best ways for a company to make major improvements, such as boosting sales, reducing waste, increasing production, enhancing advertising strategies, or optimizing service levels. Faster and cheaper than other quality improvement methodologies such as Six Sigma, MVT is a natural tool for any organization that wants to reduce the amount of guesswork and politics when making crucial business decisions. In Breakthrough Business Results with MVT, Holland reveals the dramatic benefits that have made true believers of top executives in such companies as Lowe's, Ameritech, Williams-Sonoma, DuPont, Pacific Bell, and Boise, among others. Charles Holland, PhD (Knoxville, TN), is principal and founder of QualPro, Inc., the leading MVT consultancy in the world. QualPro's work has been celebrated in most major business publications, and they have consulted to senior executives at many Fortune 500 companies. QualPro regularly conducts seminars on MVT, and their work has been widely publicized. *MVT is a trademark of QualPro, Inc.

truvisa business: Corporate Venturing Zenas Block, Ian C. It shows managers at all levels how to develop the skills and practices essential to internal venturing success.

truvisa business: Supercorp Rosabeth Moss Kanter, 2010-10-01 Throughout her extraordinary career, Professor Rosabeth Moss Kanter has always pushed the boundaries through her high-level field research, and her breakthrough ideas with practical applications for a broad audience. One of the world's bestselling business thinkers, her work on leadership and change management has influenced the most enlightened and successful executives and entrepreneurs. Supercorp, based on a three-year worldwide research program, provides the answer to a question crucial to both business and society more broadly: as a company grows, how can it avoid becoming a lumbering, corrupt giant? Companies such as IBM, Procter & Gamble, Mexican-based Cemex and Japanese-based Omron provide the models that businesses small and large can use to stay on track, outstrip the competition, and attract and motivate the new generation of talent. And, Professor Kanter provides the evidence of the powerful synergy between the financial success shareholders want and social conscience - it is only these 'vanguard companies' that are big but human, efficient but innovative, global but local, that will succeed in the future.

truvisa business: Corporate Vices Charles Cohen, 2002-12-30 Corporate Vices uncovers the real performance gap in modern corporations between good business practice that builds companies, and bad corporate habits that eventually bring them down. It builds a detailed picture of how wayward corporations often try too hard, think too little, and forget too much. And it offers a sharp contrast with companies, large and small, that are good businesses, and how they manage to stay that way. Looking behind the headlines of spectacular corporate disasters, such as Enron and Marconi, as well as corporations that are under pressure and going nowhere, Corporate Vices identifies the common theme of badly run companies, that they fail to realise, or just forget, the importance of business basics, such as productivity, as they explore ever more sophisticated and expensive ways of satisfying other more immediate, like keeping cash profits high to satisfy shareholders - even at the expense of productivity. Corporate Vices explores the complex roots and the story of how corporations have allowed themselves to turn business logic on its head with such ease. Corporate Vices puts an alternative way of running companies on the table in its many examples of good businesses. These are companies that manage to keep their eye on the ball, even at a price: not achieving corporate glory, turning down the latest technology, and opportunities to enter new markets. Most of all, Corporate Vices makes it clear how to spot the difference, and then to fix it. It asks the questions, which everyone stuck in a bad company can't seem to answer, like, * Where did we start to go wrong? * What does the CEO think he's doing? * Why can't anyone make a decision any more? * Whose idea was this merger?
