trine university business analytics: *Digital Engagement and Customer Experience Leadership: Strategies for the Modern Enterprise* Rakibul Hasan Chowdhury, 2025-09-12 The journey toward writing this book began with a simple yet powerful observation: in the digital age, engagement is no longer optional; it is existential. As someone who has worked at the intersection of digital transformation, marketing strategy, and customer-centric innovation, I have witnessed firsthand how enterprises succeed or falter based on their ability to meaningfully engage with their customers. It was my previous educational experience in Digital Business Management and Business Analytics, where I first learned the frameworks and tools that enable data-led decision-making. But it was getting to work on live projects across brand strategy, digital platforms and CRM optimization that made me understand the real leadership challenge is finding a way of orchestrating technology, creativity and empathy. The more time passed, the more I was intrigued by the why customers do what they do, how experience is designed and what means transformation at an enterprise level. This is a compendium of thoughts gathered from decades spent in digital marketing and CX management, as well as the result of hands-on marketing experience. More than just a technical guide, it is a leadership field manual for people taking responsibility for doing great things with others (in their organizations or networks) in difficult and uncertain conditions.
