value village business hours: *In Praise of Copying* Marcus Boon, 2011-02-11 This book is devoted to a deceptively simple but original argument: that copying is an essential part of being human, that the ability to copy is worthy of celebration, and that, without recognizing how integral copying is to being human, we cannot understand ourselves or the world we live in. In spite of the laws, stigmas, and anxieties attached to it, the word "copying" permeates contemporary culture, shaping discourse on issues from hip hop to digitization to gender reassignment, and is particularly crucial in legal debates concerning intellectual property and copyright. Yet as a philosophical concept, copying remains poorly understood. Working comparatively across cultures and times, Marcus Boon undertakes an examination of what this word means—historically, culturally, philosophically—and why it fills us with fear and fascination. He argues that the dominant legal-political structures that define copying today obscure much broader processes of imitation that

have constituted human communities for ages and continue to shape various subcultures today. Drawing on contemporary art, music and film, the history of aesthetics, critical theory, and Buddhist philosophy and practice, In Praise of Copying seeks to show how and why copying works, what the sources of its power are, and the political stakes of renegotiating the way we value copying in the age of globalization.

Evans, 2021-10 A Geography of the Hutterites in North America explores the geographical diffusion of the Hutterite colonies from the bridgehead of Dakota Territory in 1874 to the present distribution across North America. Looking further than just maps of location, this book analyzes the relationship between parent and daughter colonies as the Hutterite population continues to grow and examines the role of cultural and demographic forces in determining the diffusion process. Throughout this geographical analysis, Simon M. Evans pays due attention to the Hutterites' contribution to the cultural landscape of the Canadian Prairies and the American Great Plains, as well as the interactions that the Hutterites have with the land, including their agricultural success. With over forty years of research and personal interactions with more than a hundred Hutterite colonies, Evans offers a unique insight into the significant role that the Hutterites have in North America, both currently and historically. This study goes beyond the history, life, and culture of this communal brotherhood to present a new geographical analysis that reports on current and ongoing research within the field. The first narrative to be published regarding Hutterites in nearly a decade, A Geography of the Hutterites in North America is a valuable resource for scholars and students alike.

value village business hours: My Year of Buying Nothing Lee Simpson, 2015-09-29 Lee Simpson may seem like an unlikely candidate to don the mantel of anti-consumerist prophet. She is, after all, the former publisher of Canada's most successful women's lifestyles magazine, Chatelaine. But that is just the first of many surprising things about her new book My Year of Buying Nothing. In the 1980s and '90s, Simpson oversaw the heady days of women's magazine publishing. Although proud of the excellent journalism featured in her magazines, and of the pioneering work of the editors she worked with, her "primary role as senior executive was to ensure that a maximum number of advertising pages got sold." "I was part of the data analysis and market research conglomerate that helped consumer predators know your weaknesses and exploit them mercilessly." In My Year of Buying Nothing, Simpson invites readers into her world to witness first hand the

struggles she faced, the decisions and compromises she had to make, and the epiphanies and wisdom she won during her year-long attempt to shed her "consumer" skin and live a more sustainable, more authentic, more earth-friendly life. Who better to choose as a guide to a new, healthier post-consumer lifestyle than someone who is intimately familiar with the pitfalls and dangers of the starting place, and the challenges of the way forward

She faced abuse of every kind and a feeling of not enoughness with everything she attempted. In high school, she taught herself to play tennis and became the state champion—twice. Through tenacity and conviction, she followed her artistic passions from the streets of Venice, Italy, to the barrios of Tucson, Arizona. She didn't care where she lived or how she made money, as long as she could paint and provide for her children. No matter what obstacles she faced, she found a way to survive and thrive, never losing the fire in her belly.

value village business hours: A Cultural History of Shopping in the Modern Age Vicki Howard, 2022-06-02 A Cultural History of Shopping was a Library Journal Best in Reference selection for 2022. In the modern consumer age that emerged after the First World War, shopping became a ubiquitous cultural practice. Despite its apparent universality, the historicity and contingency of shopping should not be ignored: its meaning was always inextricably linked to the political, material and economic contexts within which it took place. Gendered female for the most part, shopping continued to evoke different cultural responses, embraced as liberatory by some, condemned as frivolous by others. Business decisions and public policies helped construct the frameworks within which new, often American-led, shopping cultures emerged, from downtown department stores to chain stores to suburban shopping malls. The digital revolution in shopping that began in the last decade of the 20th century has changed the face of cities and towns and led to the closure of many bricks-and-mortar stores but, as this volume explores, the shopper remains very much at the center of Western capitalist societies. A Cultural History of Shopping in the Modern Age presents an overview of the period with themes addressing practices and processes; spaces and places; shoppers and identities; luxury and everyday; home and family; visual and literary representations; reputation, trust and credit; and governance, regulation and the state.
