usps for business shipping: *The Changing Postal and Delivery Sector* Michael Crew, Pier Luigi Parcu, Timothy Brennan, 2017-01-20 This book addresses some of the major issues facing postal and delivery services throughout the world. Postal operators worldwide have been slow to address the threats from and opportunities created by electronic competition. The European Commission and member states are wrestling with these issues, while at the same time continuing to deal with the interrelated issues of implementing entry into postal markets and maintaining the universal service obligation. The Postal Accountability and Enhancement Act of 2006 in the U.S. exacerbated financial and managerial problems faced by USPS that result in part from electronic substitution for letter delivery. Comprised of original essays by prominent researchers in the field, this book addresses the new reality of the postal industry and proposes ways in which postal operators might reinvent themselves. Issues discussed include cross-border parcel delivery, e-commerce, the transformation of postal networks, and the effects of postal liberalization. This book will be of interest to postal operators, regulatory commissions, consulting firms, competitors and customers, experts in the postal economics, law, and business, and those charged with the responsibility for designing and implementing postal sector policies. Researchers in regulatory economics, transportation technology, and industrial organization will also find useful information in this volume.
