virginia tech business horizons: Social Media Marketing Tracy L. Tuten, Michael R. Solomon, 2017-11-25 ****Winner of the TAA 2017 Textbook Excellence Award**** Social Media Marketing deserves special kudos for its courage in tackling the new frontier of social media marketing. This textbook challenges its readers to grapple with the daunting task of understanding rapidly evolving social media and its users. TAA Judges Panel Social Media Marketing was the first textbook to cover this vital subject and has quickly become the market leader. It melds essential theory with practical application and covers core skills such as strategic planning for social media applications, incorporating these platforms into the brand's marketing communications, and harnessing social media data to yield consumer insights. The authors outline the 'four zones' of social media that marketers can use to help achieve their strategic objectives: 1. Community 2. Publishing 3. Entertainment 4. Commerce The new third edition has been extensively updated to include new content on tactical planning and execution and coverage of the latest research within social media marketing. Expanded new case studies and examples including Facebook, Instagram, Twitter and Snapchat are discussed in relation to globally recognized brands such as Pokemon Go, Nike, Amazon Kindle and Lady Gaga. The book is complemented by a companion website that offers valuable additional resources for both instructors and students, including author videos discussing key social media marketing ideas and concepts, author-selected YouTube video playlists, additional case studies, further weblinks, PowerPoint slides and Testbank. Suitable for modules and courses on social media marketing.

virginia tech business horizons: Global Perspectives on Social Media Influencers and Strategic Business Communication Bi, Nicky Chang, Zhang, Ruonan, 2024-05-22 In an era of social media, influencers wield unprecedented power over global consumer decisions. As digital natives

increasingly turn to influencers for guidance, the need for comprehensive research on their impact becomes paramount. Brands, aiming to connect with a precisely targeted audience, must grapple with ethical considerations in this rapidly evolving sphere. *Global Perspectives on Social Media Influencers and Strategic Business Communication* delves into influencer research and practices, exploring their impact on various industries and sectors. This book dissects the motives and characteristics of social media influencers and navigates the terrain of ethical considerations surrounding their collaboration with businesses and organizations. This book covers influencers' effect on brand loyalty, cultural norms, community building, and their role in business management, advertising, and strategic communication. The book dissects the impacts of social media influencers on audience behavior, exploring areas such as brand attitudes, purchase intentions, and the dynamics of parasocial relationships. It examines the nuances of engagement, differentiating between paid endorsements, sponsored content, and pure electronic word-of-mouth while also spotlighting the influence of live streaming on consumer behaviors. This book is a valuable resource for businesses, strategic communicators, marketers, scholars, and anyone seeking a profound understanding of the dynamic world of social media influencers.

virginia tech business horizons: Strategic Integrated Program Delivery Mark Betts, Peter E.D. Love, Derek H.T. Walker, 2024-12-04 This book outlines a cutting-edge form of program delivery which the authors term SIP-Form or Strategic Integrated Program delivery. Using the Melbourne Level Crossing Removal Program (LXRP), consisting of the removal of 85 dangerous level crossings throughout metropolitan Melbourne, including rail station upgrades, signalling and track work, and other associated capital works, as an exemplar, the book sets out four features that the authors argue define the SIP-form concept as follows: The organisation delivers a program of projects, many using an IPD contract variant form such as a Project Alliance Agreement (PAA) in Australia and numerous other countries, or the Integrated Form of Agreement (IFoA) in North America The contract form adopted is used and has been strategically designed to accommodate the project's risk and uncertainty profile, as is the case with the LXRP Projects within the program are integrated with some being concurrently delivered with coordination across the projects in a coherent and highly purposeful manner. Projects are not included that do not strategically fit the overall program delivery strategy There is a strategy for learning and innovation diffusion across projects, concurrently and sequentially. Lessons to be learned are learned through designed-in governance mechanisms The LXRP is a potentially unique program of projects, and the book takes the reader on a journey through this complex program and after giving the background and relevant context covers topics such as strategy, governance, procurement, collaboration, program alliance, HRM, leadership, digital innovation, continuous improvement, community engagement, and performance measurement. This detailed analysis of such a complex program of projects makes this book essential reading for project managers, engineers, and advanced students of project delivery and management.

virginia tech business horizons: Debating 'Homo Academicus' in Management and Organization Silvia Cinque, Daniel Ericsson, 2024-09-23 In the fields of management and organization, there is an ongoing debate about different ontological assumptions about people in and around organizations, and the dangers of self-fulfilling prophecies, i.e., the phenomena in which unsubstantiated, unethical, or dysfunctional assumptions about people can lead to adverse practical consequences. This open access book advances this debate, but in a self-reflexive direction, asking: Who do we, as scholars in the fields of management and organization, think we are? What ontological assumptions about ourselves do we live by? Do we think we are something "special", a 'Homo Academicus', distinctively separated from the life-world of managers and employees but linked with other academics such as, say, philosophers and sociologists? If so, what are the consequences and implications of such assumptions? Part of the popular Palgrave Debates in Business and Management series, each of the chapters disclose, problematize, and criticize different ontological assumptions about 'Homo Academicus' that underpins research in the fields of management and organization. It will be of great interest to management and organization scholars

and students, as well as those with a broader interest in methodology and critical studies.

virginia tech business horizons: The Crisis Manager Otto Lerbinger, 2012-05-23

Responding to the era of crises in which we now live, *The Crisis Manager* offers wise counsel for anticipating and responding to crises as well as taking the steps required to reduce the impact of these events. Spotlighting the reality of crisis at levels ranging from local to global, author Otto Lerbinger helps readers understand the approaches and ways of thinking required for successful crisis management in today's world. As no organization or individual is immune from crisis, he guides managers to make good decisions under conditions of high uncertainty, and to consider the interests not only of stockholders but also of a wide variety of stakeholders. With a focus on the threat of crises to an organization's most valuable asset - its reputation - *The Crisis Manager* covers: Preparation for crisis, including crisis communication planning Physical crises - natural, biological, and technological Human climate crises, stemming from targeted attacks on an organization's policies, actions, or physical holdings Crises due to management failure, including mismanagement, skewed values, deception, and misconduct New to this second edition are the use of social media in crisis management, and chapters on image restoration strategies and crises stemming from mismanagement, as well as a comprehensive updating of the entire work. Real-world case studies provide examples of what worked and what did not work, and the reasons why. Written for present and future crisis managers in all types of businesses and organizations, this resource will be required reading for students in public relations, business, and management, as it prepares them for their crucial roles as decision makers.

virginia tech business horizons: Assessment Centers and Managerial Performance George C.

Thornton III, William C. Byham, 2013-10-22 *Assessment Centers and Managerial Performance* presents the historical development of multiple assessment procedures with focus on those advances relevant to assessment centers. This book discusses the models of job analysis, the nature of managerial work, work-sampling assessment methods, and the process of human judgment based on the assessment center experience. Organized into 11 chapters, this book begins with an overview of the various methods to describe, evaluate, and predict management effectiveness. This text then describes a number of assessment programs, including the earliest assessment centers. Other chapters consider the five approaches to predicting managerial effectiveness, including psychometric testing, clinical evaluations by psychologists, supervisor's ratings of potentials background interviews, and assessment centers. This book discusses as well the three levels of managerial jobs, namely, supervisory, middle management, and executive. The final chapter deals with the development of standards for assessment center operations. This book is a valuable resource for psychologists.

virginia tech business horizons: Handbook of Computational Social Science for Policy
Eleonora Bertoni, Matteo Fontana, Lorenzo Gabrielli, Serena Signorelli, Michele Vespe, 2023-01-23
This open access handbook describes foundational issues, methodological approaches and examples on how to analyse and model data using Computational Social Science (CSS) for policy support. Up to now, CSS studies have mostly developed on a small, proof-of concept, scale that prevented from unleashing its potential to provide systematic impact to the policy cycle, as well as from improving the understanding of societal problems to the definition, assessment, evaluation, and monitoring of policies. The aim of this handbook is to fill this gap by exploring ways to analyse and model data for policy support, and to advocate the adoption of CSS solutions for policy by raising awareness of existing implementations of CSS in policy-relevant fields. To this end, the book explores applications of computational methods and approaches like big data, machine learning, statistical learning, sentiment analysis, text mining, systems modelling, and network analysis to different problems in the social sciences. The book is structured into three Parts: the first chapters on foundational issues open with an exposition and description of key policymaking areas where CSS can provide insights and information. In detail, the chapters cover public policy, governance, data justice and other ethical issues. Part two consists of chapters on methodological aspects dealing with issues such as the modelling of complexity, natural language processing, validity and lack of data, and innovation in official statistics. Finally, Part three describes the application of computational methods, challenges and opportunities in various social science areas, including economics, sociology, demography, migration, climate change, epidemiology, geography, and disaster management. The target audience of the book spans from the scientific community engaged in CSS research to policymakers interested in evidence-informed policy interventions, but also includes private companies holding data that can be used to study social sciences and are interested in achieving a policy impact.
