yarrow business park: Medina Michael Luis, 2011-03-21 Medina has long been recognized as the home to wealthy and influential members of Seattles elite. Industry captains such as Clapp, Blethan, Gates, and Bezos have built estates along Medinas waterfront. Meanwhile, a diverse group of families with a variety of backgrounds have settled the uplands, creating a close-knit community. Farmers, including many of Japanese heritage, first settled the area in the late 1800s. Upon the arrival of the car ferry service to Seattle in 1913, Medina gradually evolved into a commuter suburb for the working class and wealthy alike. In 1940, the first Lake Washington floating bridge ushered in a new era, and with incorporation in 1955 and the opening of the Evergreen Point Bridge in 1963, Medina completed its transformation to a largely residential area. Despite its marvelous growth, Medina has successfully maintained its charm. A new generation of families arrived in the 1990s, filling classrooms and parks, and renewing Medinas original identity: close to the big city, but a world apart.

yarrow business park: **Spirits in Stone** Glenn Kreisberg, 2018-04-10 A ground-breaking study of ceremonial stone landscapes in Northeast America and their relationship to other sites around the world • Features a comprehensive field guide to hundreds of megalithic stone structures in northeastern America, including cairns, perched boulders, and effigies • Details the Wall of Manitou, the Hammonasset Line, landscape astronomy along the Hudson River, and a several-acre area in Woodstock, NY, with large, carefully constructed lithic formations • Analyzes the archaeoastronomy, archaeoacoustics, and symbolism of these sites to reveal their relationships to other ceremonial stone sites across America and the world Presenting a comprehensive field guide to hundreds of lost, forgotten, and misidentified megalithic stone structures in northeastern America, Glenn Kreisberg documents many enigmatic formations still standing across the Catskill Mountain and Hudson Valley region, complete with functioning solstice and equinox alignments. Kreisberg provides a first-person description of the “Wall of the Manitou,” which runs for 10 miles along the eastern slopes of the Catskill Mountains, as well as narratives about related sites that include animal effigies, reproductive organs, calendar stones, enigmatic inscriptions, and evidence of alignments. Using computer software, he plots the trajectory of the Hammonasset Line, which begins at a burial complex near the tip of Long Island and runs to Devil’s Tombstone in Greene County, New York. He shows how the line runs at the same angle that marks the summer solstice sunset from Montauk Point on Long Island, and, when extended, intersects the ancient copper mines of Isle Royal in Upper Michigan. He documents a several-acre area on Overlook Mountain in Woodstock, New York, with a grouping of very large, carefully constructed lithic formations that together create a serpent or snake figure, mirroring the constellation Draco. He demonstrates how this site is related to the Serpent Mount in Ohio and Ankor Wat in Cambodia and reveals how all of the vast, interlocking sites in the Northeast were part of an ancient spiritual landscape based on a sophisticated understanding of the cosmos, as practiced by ancient Native Americans. While modern historians consider these sites to be colonial era constructions, Kreisberg reveals how they were used to communicate with the spirit world and may be remnants of a long-vanished civilization.
