It covers a wide range of topics, including limits, derivatives, integrals, and series. The exam is divided into two sections: multiple-choice and free-response. The multiple-choice section consists of 45 questions, which students must complete in 105 minutes, while the free-response section includes 6 questions to be answered within 90 minutes.

Students who excel in this course demonstrate not only a strong grasp of calculus concepts but also critical thinking and problem-solving skills. The AP Calculus BC curriculum builds on the foundational principles of AP Calculus AB, introducing more complex topics such as parametric equations, polar coordinates, and Taylor series. A solid understanding of these concepts is crucial for success on the exam.
