1984 graphic novel download: *Strange Weather* Andrew Ross, 1991-09-17 Who speaks for science in a technologically dominated society? In his latest work of cultural criticism Andrew Ross contends that this question yields no simple or easy answer. In our present technoculture a wide variety of people, both inside and outside the scientific community, have become increasingly vocal in exercising their right to speak about, on behalf of, and often against, science and technology. Arguing that science can only ever be understood as a social artifact, *Strange Weather* is a manifesto which calls on cultural critics to abandon their technophobia and contribute to the debates which shape our future. Each chapter focuses on an idea, a practice or community that has established an influential presence in our culture: New Age, computer hacking, cyberpunk, futurology, and global warming. In a book brimming over with intelligence—both human and electronic—Ross examines the state of scientific countercultures in an age when the development of advanced information technologies coexists uneasily with ecological warnings about the perils of unchecked growth. Intended as a contribution to a "green" cultural criticism, *Strange Weather* is a provocative investigation of the ways in which science is shaping the popular imagination of today, and delimiting the possibilities of tomorrow.

1984 graphic novel download: *Muslim Cool* Su'ad Abdul Khabeer, 2016-12-06 Interviews with young Muslims in Chicago explore the complexity of identities formed at the crossroads of Islam and hip hop This groundbreaking study of race, religion and popular culture in the 21st century United States focuses on a new concept, "Muslim Cool." Muslim Cool is a way of being an American Muslim—displayed in ideas, dress, social activism in the 'hood, and in complex relationships to state power. Constructed through hip hop and the performance of Blackness, Muslim Cool is a way of engaging with the Black American experience by both Black and non-Black young Muslims that challenges racist norms in the U.S. as well as dominant ethnic and religious structures within American Muslim communities. Drawing on over two years of ethnographic research, Su'ad Abdul Khabeer illuminates the ways in which young and multiethnic US Muslims draw on Blackness to construct their identities as Muslims. This is a form of critical Muslim self-making that builds on interconnections and intersections, rather than divisions between "Black" and "Muslim." Thus, by countering the notion that Blackness and the Muslim experience are fundamentally different, Muslim Cool poses a critical challenge to dominant ideas that Muslims are "foreign" to the United States and puts Blackness at the center of the study of American Islam. Yet Muslim Cool also demonstrates that connections to Blackness made through hip hop are critical and contested—critical because they push back against the pervasive phenomenon of anti-Blackness and contested because questions of race, class, gender, and nationality continue to complicate self-making in the United States.

1984 graphic novel download: *Totally Wired* Andrew Smith, 2019-03-12 "The Social Network meets Hammer of the Gods" in this story of a 1990s web titan who made a fortune and lost it all—and what happened afterward (*The Independent*). One day in February 2001, Josh Harris woke to certain knowledge that he was about to lose everything. The man *Time* magazine called "The Warhol of the Web" was reduced to a helpless spectator as his fortune dwindled from 85 million dollars to nothing, all in the space of a week. Harris had been a maverick genius preternaturally adapted to the new online world. He founded New York's first dotcom, *Pseudo.com*, and paved the

way for a cadre of twentysomethings to follow, riding a wave of tech euphoria to unimagined wealth and fame for five years—before the great dotcom crash, in which Web 1.0 was wiped from the face of the earth. Long before then, though, Harris’s view of the web had darkened, and he began a series of lurid social experiments aimed at illustrating his worst fear: that the internet would soon alter the very fabric of society—cognitive, social, political, and otherwise. In *Totally Wired*, journalist Andrew Smith seeks to unravel the opaque and mysterious episodes of the early dotcom craze, in which the seeds of our current reality were sown. Drawing on in-depth interviews with Harris and those who worked alongside him in downtown Manhattan’s “Silicon Alley,” the tale moves from a compound in Ethiopia through New York, San Francisco, Las Vegas, London, and Salt Lake City, Utah; from the dawn of the web to the present, taking in the rise of alternative facts, troll society, and the unexpected origins of the net itself, as our world has grown uncannily to resemble the one Harris predicted—and urged us to evade. “Raucous, whimsical, sad and very funny...a fascinating account of what could have been, what briefly was, what almost lasted.” —*TheWall Street Journal* “Told with verve and style...A valuable history.” —*Kirkus Reviews* “A brilliant exploration of madness and genius in the early days of the web.” —*The Guardian* “Dark and compelling.” —*Daily Mail* “This is a book whose time has come.” —*Sunday Times*
