Overview of Air Assault School

The air assault school handbook begins by outlining the purpose and scope of the Air Assault School. This course is designed to train soldiers in air assault operations, which include helicopter insertion, pathfinder operations, and sling load missions. The training emphasizes agility, endurance, and tactical proficiency to ensure that soldiers can operate effectively in complex environments.

Air Assault School is typically a 10 to 12-day course offered at various Army installations. The handbook details the history of air assault tactics and the evolution of the school's curriculum. It also explains the importance of air assault capability in modern warfare and how graduates contribute to mission success.

Course Objectives

The primary objectives of the air assault school are to develop proficiency in helicopter operations, master rappelling techniques, and conduct sling load missions safely and effectively. The handbook specifies that soldiers will learn to:

- Perform aircraft safety and loading procedures
- Execute rappelling from helicopters and towers
- Conduct sling load rigging and inspection
- Apply tactical movement and assault techniques

Eligibility and Enrollment

The handbook outlines the eligibility criteria for enrollment, which typically include meeting physical fitness standards, medical clearance, and command approval. It also describes the administrative procedures required to register for the course and the necessary documentation soldiers must bring on arrival.

Physical Fitness and Preparation

Physical fitness is a critical component emphasized throughout the air assault school handbook. Soldiers must be in excellent physical condition to endure the intense physical demands of the course. The handbook provides guidance on the recommended fitness regimen and preparatory exercises to improve endurance, strength, and agility.

Physical Fitness Standards

The handbook specifies minimum physical fitness requirements, including the Army Physical Fitness Test (APFT) or the Army Combat Fitness Test (ACFT) scores. These standards ensure that candidates can safely perform tasks such as obstacle courses, long-distance marches, and repeated rappelling operations.

Recommended Training Regimen

To prepare for the physical challenges, the handbook suggests a structured training plan that includes:

- Cardiovascular endurance workouts (running, swimming, cycling)
- Strength training focusing on upper body and core muscles
- Flexibility and mobility exercises
- Rucking with weighted packs to simulate operational load

Consistency in training is encouraged to build the stamina and resilience required for successful completion of the course.

Air Assault School Curriculum

The core of the air assault school handbook is the detailed breakdown of the curriculum. The course is divided into phases that progressively build the soldier's capabilities in air assault operations. Each phase includes classroom instruction, practical exercises, and field training.

Phase 1: Air Assault Fundamentals

This phase introduces soldiers to air assault basics, including aircraft familiarization, safety procedures, and physical training. Instruction covers helicopter safety, aircraft types, and loading protocols. Students also learn knot tying and the fundamentals of rappelling equipment.

Phase 2: Sling Load Operations

Sling load training teaches soldiers how to rig and inspect loads for helicopter transport. The handbook details the types of sling loads, rigging procedures, and safety checks required to ensure secure and safe movement of equipment. This phase includes hands-on practice with various loads such as vehicles, containers, and artillery pieces.

Phase 3: Rappelling and Obstacle Course

Rappelling instruction is a critical component where soldiers learn to descend from helicopters and towers using ropes and harnesses. The obstacle course tests physical fitness and agility under realistic conditions. This phase emphasizes safety, technique, and confidence in high-stress situations.

Phase 4: Air Assault Mission and Testing

The final phase simulates an air assault mission, integrating all skills learned. Soldiers perform tactical movements, load and unload aircraft, and

conduct sling load operations. The phase concludes with comprehensive testing, including written exams and practical evaluations that determine graduation eligibility.

Safety and Risk Management

Safety is paramount in the air assault school handbook, with detailed protocols designed to mitigate risks during training. The handbook stresses adherence to safety standards to prevent accidents during complex operations involving helicopters and high-altitude maneuvers.

Helicopter Safety Procedures

Students are trained to approach and depart helicopters safely, understand rotor blade hazards, and communicate effectively with aircrew. The handbook provides specific instructions on landing zone operations and aircraft marshaling signals to maintain safety during air assault missions.

Personal Protective Equipment (PPE)

The handbook specifies mandatory PPE for all training activities, including helmets, gloves, eye protection, and harnesses. Proper inspection and maintenance of PPE are emphasized to ensure functionality and soldier safety.

Risk Assessment and Mitigation

Commanders and instructors use risk assessment tools outlined in the handbook to evaluate training hazards continuously. Procedures include contingency planning, emergency response protocols, and constant monitoring of weather and environmental conditions that may impact training safety.

Equipment and Uniform Requirements

The air assault school handbook lists the standardized equipment and uniform items required for all students. Proper gear ensures that soldiers can perform training tasks safely and efficiently while maintaining Army standards of appearance and functionality.

Uniform Standards

Students must wear the Army Combat Uniform (ACU) with all required insignia and patches. The handbook details proper wear and care instructions to maintain uniformity and professionalism.

Mandatory Equipment List

Essential equipment includes:

- Helmet with chinstrap
- Gloves suitable for rappelling
- Eye protection (goggles or ballistic glasses)
- Combat boots with adequate tread
- Rucksack or assault pack for physical training
- Hydration system or water bottles

Additional specialized equipment, such as harnesses and ropes, are typically provided by the school during training phases.

Assessment and Graduation Standards

Successful completion of the air assault school requires meeting rigorous academic and physical performance standards outlined in the handbook. Soldiers are evaluated continuously throughout the course to ensure competence and readiness.

Written and Practical Exams

The handbook details the content and format of the written exams, which test knowledge of air assault techniques, safety procedures, and equipment handling. Practical exams assess the soldier's ability to perform sling load rigging, rappelling, and tactical movement under supervision.

Physical Performance Criteria

Candidates must pass challenging physical tasks, including timed runs, obstacle courses, and multiple rappelling exercises without injury or safety violations. Failure to meet these standards may result in remediation or removal from the course.

Graduation and Awarding of the Air Assault Badge

Upon successful completion, soldiers are awarded the Air Assault Badge, signifying their proficiency and readiness to conduct air assault operations. The handbook describes the formal graduation ceremony and the significance of

this achievement within the Army community.

air assault school handbook: Manuals Combined: WARRIOR TRAINING CENTER Air Assault School Handbook, 101st Airborne Division (Air Assault) The Sabalauski Air Assault School Handbook & 101st Airborne Division (Air Assault) Gold Book , Air Assault is a combat insertion unit using helicopters to transport and insert soldiers into battle, provide medical evacuation, provide close air support, provide resupply operations. It is usually a company or bat-talion sized element. The term

Air Assault derives from two types of operations known as Air Mobility and Vertical Envelopment. Air Mobility Operations were developed by the German Army during WWII in the 1930's. The US Army soon adopted this method of offensive operations in 1941 using wooden gliders. The glider was assisted into the air by being towed by a larger aircraft and then released. The pilot had to navigate the large glider loaded with a team of infantry soldiers to the landing zone behind enemy lines, at night and attempt to land safely. Once the pilot landed the glider, he would join the mission as another infantry soldier with the team that he flew in. Although the gliders and techniques used were advanced for that time period they did pose some disadvantages. Once the aircraft was landed safely that team of soldiers were cut off from allied troops. Pilots had to be cross trained with infantry tactics so he could operate as both roles. The air mobility glider was abandoned after WWII after the invention of the helicopter. PREFACE 1 November 2011 1. The Sabalauski Air Assault School (TSAAS) is a FORSCOM TDA unit that trains leaders and Soldiers assigned to the 101st Airborne Division (Air Assault), as well as other Army units and armed services in several courses. By conducting the Air Assault and Pathfinder Courses The Sabalauski Air Assault School develops technically proficient and confident Soldiers capable of safely executing immediate and sustained air assault operations. The school also trains and qualifies military Rappel Masters, Fast Rope Masters and SPIES Masters in the application of infiltration and extraction techniques. The school provides quality basic airborne refresher and jumpmaster refresher training to airborne capable units. Finally, the school provides command and control of the 101st Airborne Division (Air Assault), Screaming Eagle Parachute Team. 2. This handbook is designed to facilitate the mission of the school, serving as a baseline of information for the Air Assault Course. It is not a substitute for applicable Army regulations, field manuals, training circulars, or technical manuals, but it is designed to complement the guidance in these publications in the area of air assault operations. The 101st Airborne Division (Air Assault) disclaims any responsibility for incidents occurring while applying these procedures. 3. The proponent for this handbook is the Commander of The Sabalauski Air Assault School. This 2011 update provides users with the latest doctrinal information regarding Air Assault Operations. Users of this publication are encouraged to recommend improvements or changes in writing to ACoF, G3/5/7/DPTM; ATTN: AFZB-K-GT-AA, Fort Campbell, KY 42223-5000. The 101st Airborne Division (Air Assault) has a long and rich heritage. As the world's only functional Air Assault Division, the 101st Airborne has pioneered the development of Air Assault tactics, techniques and procedures (TTPs). These tactics were quantifiably demonstrated in 1991 during Operation Desert Storm and most recently during Operation Enduring Freedom and Operation Iraqi Freedom. We are currently at war with dangerous and adaptive terrorist forces in complex environments. In response, the Division continually refines its TTPs, exploiting our unique capabilities to defeat our nation's enemies. This reference publication, The Gold Book June 2014, re-establishes the baseline for the planning and execution of Air Assault operations.

Bolger, 2007-12-18 "An informative and thought-provoking history of recent infantry operations with reasoned glimpses of its possible future." -DR. SHAWN WHETSTONE Military Heritage "This is [Colonel Bolger's] most significant work to date, important both for students of the contemporary U.S. Army and for general readers—even those normally uninterested in military affairs. Bolger documents the infantry's change over the past sixty years from a mass force of citizen soldiers to a small body of elite professionals. He presents each currently existing type of infantry—paratroopers, air assault, mechanized, light, rangers, and marines. . . . In each case study, Bolger emphasizes the quality and preparation,

making it quite clear that will without skill and motivation without competence are certain routes to disaster. . . . While praising today's infantry as the best the country has ever fielded, Bolger raises the prospect that the U.S. military, by emphasizing technology and economy, will leave the country with an elite infantry too small to sustain heavy losses and too specialized to be quickly replaced.”

air assault school handbook: Airborne Landing to Air Assault Nikolaos Theotokis, 2020-07-30

A complete history of paratroopers and their role in modern war, including a glossary and photos. Many books have been written about military parachuting, particularly about famous operations like Crete and Arnhem in the Second World War and notable units like the British Parachute Regiment and the US 101st Airborne Division, but no previous book has covered the entire history of the use of the parachute in warfare. In this valuable study, Nikolaos Theotokis traces in vivid detail the development of parachuting over the last hundred years and describes how it became a standard tactic in twentieth-century conflicts. As well as depicting a series of historic parachute operations all over the world, he recognizes the role of airmen in the story, for they were the first to use the parachute in warfare when they jumped from crippled planes in combat conditions. Adapting the parachute for military purposes occurred with extraordinary speed during the First World War and, by the time of the Second World War, it had become an established technique for special operations and offensive actions on a large scale. The range of parachute drops and parachute-led attacks was remarkable, and all the most dramatic examples from the world wars and lesser conflicts are recounted in this graphic and detailed study. The role played by parachute troops as elite infantry is also a vital part of the narrative, as is the way in which techniques of air assault have evolved since the 1970s.

They are a rapid deployment group prepared to go anywhere in the world within thirty-six hours. And, for good reason, they are probably the best-known army division in the world. In this book, top military photographer and former U.S. Army Ranger Russ Bryant takes you inside the 101st Airborne. In training and in action, on land and in the air: Here are the Screaming Eagles as you've never seen them, in a close-up, multi-faceted portrait of courage and skill as a fact of everyday life. air assault school handbook: The War Lawyers Craig Jones, 2020-11-26 Over the last 20 years the world's most advanced militaries have invited a small number of military legal professionals into the heart of their targeting operations, spaces which had previously been exclusively for generals and commanders. These professionals, trained and hired to give legal advice on an array of military operations, have become known as war lawyers. The War Lawyers examines the laws of war as

applied by military lawyers to aerial targeting operations carried out by the US military in Iraq and Afghanistan, and the Israel military in Gaza. Drawing on interviews with military lawyers and others, this book explains why some lawyers became integrated in the chain of command whereby military targets are identified and attacked, whether by manned aircraft, drones, and/or ground forces, and with what results. This book shows just how important law and military lawyers have become in the conduct of contemporary warfare, and how it is understood. Jones argues that circulations of law and policy between the US and Israel have bolstered targeting practices considered legally questionable, contending that the involvement of war lawyers in targeting operations enables, legitimises, and sometimes even extends military violence.

air assault school handbook: Single Set of Bootprints Kirby Calhoun, 2019-12-13 Kirby was raised in a God fearing home but never really knew God. Throughout his life and military career, Kirby experienced many difficult obstacles and trials. For nearly 30 years, Kirby believed himself to be both extremely lucky and extremely unlucky, without giving much thought to God. This story is about Kirby's life and details some of the uphill struggles he faced throughout childhood and adulthood. In a post 9/11 America, in an attempt to change the path he was on, Kirby joined the United States Army to serve his country and to fight terrorism. Upon completion of his last contract, Kirby left active duty Army after serving for 10 years. Shortly after leaving the service, Kirby experienced something that would change the course of his future and would make him question everything he thought he knew. One life-altering night prompted Kirby to search for God, while struggling to understand where God had been throughout his life when he was walking through every low point that he experienced. Jesus helped Kirby to look back on his life with a new set of eyes. This book may tell of Kirby's story but it isn't about him. This book highlights the consistent thread of God's work in Kirby's life.

air assault school handbook: Vietnam & Beyond Jenny La Sala, Jim Markson, 2014-09-18 Vietnam and Beyond is a collection of wartime letters written home by Jim Markson from March 1967 to March 1968. Jim carried sadness and boxed-up memories from Vietnam. Perhaps, if it were not for the general divided and oppositional public opinion of the Vietnam War at that time, the soldiers returning home might have been able to open up and begin the healing process. Instead, those soldiers returning from Vietnam were afraid to tell their story. These fears bound each soldier to the other. We are very proud to embrace all veterans and include stories of veterans of all wars, including WWII, Korea, Vietnam, Iraq, and Afghanistan to show the similarities of war and the soldier from one generation to another.
