african diaspora britain us: *The African Diaspora in the United States and Europe* John A. Arthur, 2016-04-01 This book systematically documents the experiences of Ghanaian communities in North America as a case study of the new African migration. The rapid increase in the number of Ghanaians lawfully admitted as permanent residents since 1980 offers an opportunity to investigate their immigrant journeys, their membership in the larger society and the expression of their individual and collective social identities. Using original empirical data from the US and Canada as well as comparative material from the UK and the Netherlands, the author also investigates the relationship between these new African migrants and the native-born black diaspora in the US. This study balances theoretical insight with policy implications, using the case-study as a lens not just on African migration but also on significant conceptual themes in migration studies including transnationalism, identity, social networks, remittances, economic integration and citizenship.

african diaspora britain us: Pan Africanism in the African Diaspora Ronald W. Walters, 1997 This groundbreaking volume analyzes important case studies of Black political movements since the 1960s and the impact of the movements on the African-American community. Previous studies on this subject have been largely historical in nature, focusing on the thought of nineteenth-century Pan Africanist or early twentieth-century formal Pan African movements, such as those led by W.E.B. Du Bois and Marcus Garvey. In this book, Walters analyzes heretofore largely unaddressed cases in which African-American societies forged connections with others in the Diaspora within the framework of significant political movements. He applies social science theory to the analysis of the cases, based on the proposition that Pan African studies - a subject within the broad field of Africana Studies - is itself very diverse and lends itself to analysis by an unlimited number of modern disciplinary approaches and perspectives. Walters uses the tools of comparative politics for examining similar Black and white social institutions and organizations in the United States and other countries and for creating a tailored Pan African perspective as a criteria with which to describe the interactive relationships between the American Black community and Blacks in Britain, South Africa, Brazil, and the Caribbean. He fashions a unique and radically new perspective and model for addressing the age-old question of the African continuum by advancing the notion that Pan Africanism can be about the struggle for community - a struggle not incompatible with efforts to change the State. His is a twenty-first century view of race relations and classes in the post-modern era of capitalism. Pan Africanism in the African Diaspora is broadly a work of political science in that it is concerned with political phenomena and applies methods of analysis from that field. Nevertheless, it is also interdisciplinary in content, perspective, and analytical approach. Walters' new data transcends the notions previously put forth, and forms a significant contribution to political theory in African and African-American studies.

african diaspora britain us: *The African Diaspora Population in Britain* Peter J. Aspinall, Martha J. Chinouya, 2016-04-20 This insightful book examines the Black African diaspora in Britain through an examination of its demography, recent patterns of migration, changing patterns of residence, and socio-economic position. It provides an analysis of the areas where Black Africans face disadvantage, including labour market participation, housing markets, health and social care, and residence in deprived neighbourhoods. This original and important research also deals with categories and identities, using data collected in the 2011 Census on national identity, and the resulting investigation of the social, cultural and civic life of Black Africans presents the substantial heterogeneity concealed in the label 'Black African', concluding by highlighting the policy

implications of this vital research.

african diaspora britain us: African Diaspora Identities John A. Arthur, 2010-08-20 African Diaspora Identities provides insights into the complex transnational processes involved in shaping the migratory identities of African immigrants. It seeks to understand the durability of these African transnational migrant identities and their impact on inter-minority group relationships. John A. Arthur demonstrates that the identities African immigrants construct often transcends country-specific cultures and normative belief systems. He illuminates the fact that these transnational migrant identities are an amalgamation of multiple identities formed in varied social transnational settings. The United States has become a site for the cultural formations, manifestations, and contestations of the newer identities that these immigrants seek to depict in cross-cultural and global settings. Relying mostly on their strong human capital resources (education and family), Africans are devising creative, encompassing, and robust ways to position and reposition their new identities. In combining their African cultural forms and identities with new roles, norms, and beliefs that they imbibe in the United States and everywhere else they have settled, Africans are redefining what it means to be black in a race-, ethnicity-, and color-conscious American society.

african diaspora britain us: The New African Diaspora in North America Kwadwo Konadu-Agyemang, Baffour K. Takyi, John A. Arthur, 2006-01-01 The New African Diaspora in North America brings together sociologists, social workers, geographers, economists, anthropologists and others to explore the African immigrant experience from a multi-disciplinary perspective. The contributors shed light on the factors behind the increasing wave in African immigration to the U.S. and Canada, the socio-economic characteristics of African immigrants, their spatial distribution, obstacles, and contributions. Despite their increasing presence, African immigrant groups in the U.S. and Canada have engendered relatively little scholarly research on their pre- and post-migration experience. This collection helps fill that void, and will be valuable reading for anyone interested in African Diaspora studies.

african diaspora britain us: The African Diaspora Patrick Manning, 2010-03-05 Patrick Manning follows the multiple routes that brought Africans and people of African descent into contact with one another and with Europe, Asia, and the Americas. In joining these stories, he shows how the waters of the Atlantic Ocean, the Mediterranean Sea, and the Indian Ocean fueled dynamic interactions among black communities and cultures and how these patterns resembled those of a number of connected diasporas concurrently taking shaping across the globe. Manning begins in 1400 and traces the connections that enabled Africans to mutually identify and hold together as a global community. He tracks discourses on race, changes in economic circumstance, the evolving character of family life, and the growth of popular culture. He underscores the profound influence that the African diaspora had on world history and demonstrates the inextricable link between black migration and the rise of modernity. Inclusive and far-reaching, The African Diaspora proves that the advent of modernity cannot be fully understood without taking the African peoples and the African continent into account.

african diaspora britain us: The New African Diaspora in the United States Toyin Falola, Adebayo Oyeade, 2016-07-01 Fast growing in population, African immigrants in the United States have become a significant force, to the point that the idea of a new African diaspora is now a reality. This thriving community has opened new arenas of scholarly discourse on Black Atlantic history beyond the trans-Atlantic slave trade and its legacies. This book investigates the complex dynamic forces that have shaped, and continue to shape, this new diaspora. In eleven original essays, the volume examines pertinent themes, such as: immigration, integration dilemmas, identity construction, brain drain, remittances, expanding African religious space, and how these dynamics impact and intersect with the African homeland. With contributors from both sides of the Atlantic that represent a diverse range of academic disciplines, this book offers a broad perspective on emerging themes in contemporary African diasporan experiences. The book will be of interest to scholars and students of African and African-American Studies, Sociology, and History.

african diaspora britain us: *Racial Structure and Radical Politics in the African Diaspora*

James L. Conyers, 2017-07-05 This is a must read book for anyone interested in the areas of racial theory and racial relations, multicultural and polarized religions, and the making of African personality and culture. In keeping with earlier volumes in the series, it emphasizes the cross-fertilization of Africa and the world. In *Binga Bank: The Development of the Black Metropolis* Beth Johnson gives an historic look at the opening of the Binga Bank, its founder, and how the bank helped stimulate the black metropolis in Chicago. *Black on the Block* takes a look at life in the community of North Kenwood-Oakland, California. Mark Christian describes what it is like to be a member in the African diaspora in the United States and United Kingdom. In the racial theory and racial relations area, Clarence Tally's *The aeRace' Concept and Racial Structure* argues that the study of race has become dominated by the idea that race is socially constructed. Reiland Rabaka analyzes discourse on the process of awarding reparations to people of African origin. Paula A. Moore explains why people of African descent with mental health problems do not receive treatment. *Patriot Day* focuses on the emergence and growth of Islam in America and its struggle to connect with America's cultural heritage. *Edward Wilmot Blyden and the African Personality*, by James Conyers, reviews Blyden's ideas and beliefs challenging the European worldview. *Cultural Helix Theory* examines the most fundamental component of African culture, language and how it affects the black community. *Black in the Saddle* by Demetrius W. african diaspora britain us: *African Diaspora in the Cultures of Latin America, the Caribbean, and the United States* Persephone Braham, 2014-12-05 Scholars of the African Americas are sometimes segregated from one another by region or period, by language, or by discipline. Bringing together essays on fashion, the visual arts, film, literature, and history, this volume shows how our understanding of the African diaspora in the Americas can be enriched by crossing disciplinary boundaries to recontextualize images, words, and thoughts as part of a much greater whole. Diaspora describes dispersion, but also the seeding, sowing, or scattering of spores that take root and grow, maturing and adapting within new environments. The examples of diasporic cultural production explored in this volume reflect on loss and dispersal, but they also constitute expansive and dynamic intellectual and artistic production, neither wholly African nor wholly American (in the hemispheric sense), whose resonance deeply inflects all of the Americas. *African Diaspora in the Cultures of Latin America, the Caribbean, and the United States* represents a call for multidisciplinary, collaborative, and complex approaches to the subject of the African diaspora.

african diaspora britain us: *Encyclopedia of the African Diaspora* Carole Boyce Davies, 2008-07-29 The authoritative source for information on the people, places, and events of the African Diaspora, spanning five continents and five centuries. The field of African Diaspora studies is rapidly growing. Until now there was no single, authoritative source for information on this broad, complex discipline. Drawing on the work of over 300 scholars, this encyclopedia fills that void. Now the researcher, from high school level up, can go to a single reference for information on the historical, political, economic, and cultural relations between people of African descent and the rest of the world community. Five hundred years of relocation and dislocation, of assimilation and separation have produced a rich tapestry of history and culture into which are woven people, places, and events. This authoritative, accessible work picks out the strands of the tapestry, telling the story of diverse peoples, separated by time and distance, but retaining a commonality of origin and experience. Organized in A-Z sections covering global topics, country of origin, and destination country, the work is designed for easy use by all.

african diaspora britain us: *Rewriting the African Diaspora in Latin America and the Caribbean* Robert L. Adams Jr., 2014-10-14 This volume considers the African Diaspora through the underexplored Afro-Latino experience in the Caribbean and South America. Utilizing both established and emerging approaches such as feminism and Atlantic studies, the authors explore the production of historical and contemporary identities and cultural practices within and beyond the boundaries of the nation-state. *Rewriting the African Diaspora in the Caribbean and Latin America*

illustrates how far the fields of Afro-Latino and African Diaspora studies have advanced beyond the Herskovits and Frazier debates of the 1940s. The book's arguments complicate Herskovits' insistence on Black culture being an exclusive reflection of African survivals, as well as Frazier's counter-claim of African American culture being a result of slavery and colonialism. This collection of thought-provoking essays extends the concepts of diaspora and transnationalism, forcing the reader to reassess their present limitations as interpretive tools. In the process, Afro-Latinos are rendered visible as national actors and transnational citizens. This book was originally published as a special issue of *African and Black Diaspora*.

african diaspora britain us: *The Cultural Memory of Africa in African American and Black British Fiction, 1970-2000* Leila Kamali, 2016-12-10 This book offers a new approach to reading the cultural memory of Africa in African American fiction from the post-Civil Rights era and in Black British fiction emerging in the wake of Thatcherism. The critical period between the decline of the Civil Rights Movement and the dawn of the twenty-first century saw a deep contrast in the distinctive narrative approaches displayed by diverse African diaspora literatures in negotiating the crisis of representing the past. Through a series of close readings of literary fiction, this work examines how the cultural memory of Africa is employed in diverse and specific negotiations of narrative time, in order to engage and shape contemporary identity and citizenship. By addressing the practice of "remembering" Africa, the book argues for the signal importance of the African diaspora's literary interventions, and locates new paradigms for cultural identity in contemporary times.

african diaspora britain us: *Black Europe and the African Diaspora* Darlene Clark Hine, Trica Danielle Keaton, Stephen Small, 2023-12-11 The presence of Blacks in a number of European societies has drawn increasing interest from scholars, policymakers, and the general public. This interdisciplinary and multi-disciplinary collection penetrates the multifaceted Black presence in Europe, and, in so doing, complicates the notions of race, belonging, desire, and identities assumed and presumed in revealing portraits of Black experiences in a European context. In focusing on contemporary intellectual currents and themes, the contributors theorize and re-imagine a range of historical and contemporary issues related to the broader questions of blackness, diaspora, hegemony, transnationalism, and Black Europe itself as lived and perceived realities. Contributors are Allison Blakely, Jacqueline Nassy Brown, Tina Campt, Fred Constant, Alessandra Di Maio, Philomena Essed, Terri Francis, Barnor Hesse, Darlene Clark Hine, Dienke Hondius, Eileen Julien, Trica Danielle Keaton, Kwame Nimako, Tiffany Ruby Patterson, T. Denean Sharpley-Whiting, Stephen Small, Tyler Stovall, Alexander G. Weheliye, Gloria Wekker, and Michelle M. Wright.

african diaspora britain us: *African American Religious Thought* Cornel West, Eddie S. Glaude, 2003-01-01 Believing that African American religious studies has reached a crossroads, Cornel West and Eddie Glaude seek, in this landmark anthology, to steer the discipline into the future. Arguing that the complexity of beliefs, choices, and actions of African Americans need not be reduced to expressions of black religion, West and Glaude call for more careful reflection on the complex relationships of African American religious studies to conceptions of class, gender, sexual orientation, race, empire, and other values that continue to challenge our democratic ideals.

african diaspora britain us: Language Contact in Africa and the African Diaspora in the Americas Cecelia Cutler, Zvezdana Vrzić, Philipp Angermeyer, 2017-07-12 Language Contact in Africa and the African Diaspora in the Americas brings together the original research of nineteen leading scholars on language contact and pidgin/creole genesis. In recent decades, increasing attention has been paid to the role of historical, cultural and demographic factors in language contact situations. John Victor Singler's body of work, a model of what such a research paradigm should look like, strikes a careful balance between sociohistorical and linguistic analysis. The case studies in this volume present investigations into the sociohistorical matrix of language contact and critical insights into the sociolinguistic consequences of language contact within Africa and the African Diaspora. Additionally, they contribute to ongoing debates about pidgin/creole genesis and language contact by examining and comparing analyses and linguistic outcomes of particular sociohistorical and cultural contexts, and considering less-studied factors such as speaker agency and identity in the emergence, nativization, and stabilization of contact varieties.

african diaspora britain us: The African Diaspora to the Bahamas Keith L. Tinker, 2013-01-08 Current historiography on aspects of Bahamian history presents limited research on the African presence in the islands, irrespective of the fact that arguably 85% of the population of that country is represented by such persons. One primary objective of this book is to begin to more adequately address this literary omission by presenting an initial comprehensive work on the subject. The book attempts to trace the origin of this migration by focusing on some of the primary dynamics of ethnicity within the context of the geo-politics and geo-economics of the emerging Atlantic world. It is hoped that the reader will emerge with a greater awareness of, and wider insight into Bahamian history, and, the Bahamian majority will leave with a greater sense of what it truly means to be a Bahamian....

african diaspora britain us: Migration, Mining, and the African Diaspora B. Josiah, 2011-11-07 From the late 1800s, African workers migrated to the mineral-rich hinterland areas of Guyana, mined gold, diamonds, and bauxite; diversified the country's economy; and contributed to national development. Utilizing real estate, financial, and death records, as well as oral accounts of the labor migrants along with colonial officials and mining companies' information stored in National Archives in Guyana, Great Britain, and the U.S. Library of Congress, the study situates miners into the historical structure of the country's economic development. It analyzes the workers attraction to mining from agriculture, their concepts of order and progress, and how they shaped their lives in positive ways rather than becoming mere victims of colonialism. In this contentious plantation society plagued by adversarial relations between the economic elites and the laboring class, in addition to producing the strategically important bauxite for the aviation era of World Wars I & II, for almost a century the workers braved the ecologically hostile and sometimes deadly environments of the gold and diamond fields in the quest for El Dorado in Guyana.
