america the farewell tour summary: America: The Farewell Tour Chris Hedges, 2018-08-21
Chris Hedges's profound and unsettling examination of America in crisis is "an exceedingly...provocative book, certain to arouse controversy, but offering a point of view that needs to be heard" (Booklist), about how bitter hopelessness and malaise have resulted in a culture of sadism and hate. America, says Pulitzer Prize-winning reporter Chris Hedges, is convulsed by an array of pathologies that have arisen out of profound hopelessness, a bitter despair, and a civil society that has ceased to function. The opioid crisis; the retreat into gambling to cope with

economic distress; the pornification of culture; the rise of magical thinking; the celebration of sadism, hate, and plagues of suicides are the physical manifestations of a society that is being ravaged by corporate pillage and a failed democracy. As our society unravels, we also face global upheaval caused by catastrophic climate change. All these ills presage a frightening reconfiguration of the nation and the planet. Donald Trump rode this disenchantment to power. In his “forceful and direct” (Publishers Weekly) *America: The Farewell Tour*, Hedges argues that neither political party, now captured by corporate power, addresses the systemic problem. Until our corporate coup d’état is reversed these diseases will grow and ravage the country. “With sharply observed detail, Hedges writes a requiem for the American dream” (Kirkus Reviews) and seeks to jolt us out of our complacency while there is still time.

america the farewell tour summary: *The Political Economy of Bilateral Aid* Peter Blunt, 2022-12-23 The social and economic consequences of the COVID-19 pandemic and of extreme climate events have brought into sharp relief the serious deficiencies of our political economies. The dominant global ideology of neoliberalism and its architects and beneficiaries are responsible for this. Bilateral development assistance is an integral part of the neoliberal grand design. However, while the deficiencies of neoliberalism have been starkly exposed by the pandemic, its collapse is unlikely in the short-term. Much bilateral assistance will therefore continue to be self-serving. Within these confines, and on the basis of a sharply critical analysis of the functioning of technical assistance at the point of the design and delivery of programmes and projects, this book identifies crucial supply-side nodes of power and influence where feasible and relatively straight-forward ‘functional’ reforms - strategy, structure, selection, training - would make genuinely developmental results for recipients more likely and enhance donor interests at the same time. It argues that more authentic, empathetic, and altruistic technical assistance will be essential to bringing this about. The arguments are supported by primary, published evidence gathered by the author during 18 years of full-time employment as a team leader or programme manager of technical assistance programmes. The book will be of interest to students of development management, development economics, political economy and international relations, as well as policy makers, development practitioners and supply- and demand-side government officials.

america the farewell tour summary: *Spirituality and Social Justice: Spirit in the Political Quest for a Just World* Cyndy Baskin, Norma Jean Profit, 2019-11-20 Spirituality and Social Justice explores how critically informed spirituality can serve as an inspiration and a political force in the quest for social and ecological justice. Writing from various spiritual and religious worldviews, including Indigenous, Islamic, Wicca/Witchcraft, Jewish, Buddhist, and Christian, the authors—practitioners and academics of social work—draw on lived experience, research, and

literature to illuminate how relationship with spirit can orient ways of being and acting to build a more just society. In Part One, the authors foreground Indigenous spirituality as resistance and decolonization. Part Two examines the complex ethical and political dimensions of spirituality, including the ecological destruction of the Earth and the influence of contemporary neoliberalism. Lastly, Part Three explores spirituality in teaching and learning contexts, both inside and beyond the classroom. Engaging and well-written, *Spirituality and Social Justice* challenges the notion that practitioners must put aside their critical spirituality in teaching, learning, healing, and practice. Students, practitioners, and academics of social work and other helping professions will benefit from the unique insights into spirituality and religion and how they inform social justice activism.
