american history curriculum hmh: Tyranny of the Textbook Beverlee Jobrack, 2011-12-23

Educational reforms and standards have been a topic of public debate for decades, with the latest go-round being the State Common Core Curriculum Standards. But time and again those reforms have failed, and each set of standards, no matter how new and different, has had little impact on improving student achievement. Why? The textbooks. Textbooks sell based on design and superficial features, not because they are based on the latest research on how children learn and how well they promote student achievement. In *Tyranny of the Textbook*, Beverlee Jobrack, retired from educational publishing, sheds light on why this happens. She gives an engaging and fascinating look behind-the-scenes of how K-12 textbooks are developed, written, adopted, and sold. And, perhaps most importantly, she clearly spells out how the system can change so that reforms and standards have a shot at finally being effective. Did you know? Reform efforts have focused on writing and rewriting standards and tests, but these rarely have any effect on the core curriculum that is published. School districts and states don't use effectiveness as a criterion for evaluating and purchasing textbooks. Publishers don't offer textbooks with better content or the latest teaching methods because teachers don't want textbooks that require them to change their practices. Teachers report that they don't rely on a textbook in their class, but research shows that they do. Three companies publish 75 percent of the K-12 educational materials. Those three companies are producing similar programs with the same instructional strategies, none of which require teachers to change their practices significantly. Publishers write textbooks for California and

Texas. All of the other markets have to make do with books only superficially adjusted for their states.

american history curriculum hmh: Doing History Linda S. Levstik, Keith C. Barton, 2015-01-30 Now in its fifth edition, Doing History offers a unique perspective on teaching and learning history in the elementary and middle grades. Through case studies of teachers and students in diverse classrooms and from diverse backgrounds, it shows children engaging in authentic historical investigations, often in the context of an integrated social studies curriculum. The premise is that children can engage in valid forms of historical inquiry—collecting and analyzing data, examining the perspectives of people in the past, considering multiple interpretations, and creating evidence-based historical accounts. Grounded in contemporary sociocultural theory and research, the text features vignettes in each chapter showing communities of teachers and students doing history in environments rich in literature, art, writing, discussion, and debate. The authors explain how the teaching demonstrated in the vignettes reflects basic principles of contemporary learning theory. Doing History emphasizes diversity of perspectives in two ways: readers encounter students from a variety of backgrounds, and students themselves look at history from multiple perspectives. It provides clear guidance in using multiple forms of assessment to evaluate the specifically historical aspects of children's learning.

Poetter, Kelly Waldrop, Tasneem Amatullah, Cleighton Weiland, Jody Googins, Vanessa Winn, 2017-04-01 Curriculum Windows: What Curriculum Theorists of the 1990s Can Teach Us about Schools and Society Today is an effort by students of curriculum studies, along with their professor, to interpret and understand curriculum texts and theorists of the 1990s in contemporary terms. The authors explore how key books/authors from the curriculum field of the 1990s illuminate new possibilities forward for us as scholar educators today: How might the theories, practices, and ideas wrapped up in curriculum texts of the 1990s still resonate with us, allow us to see backward in time and forward in time - all at the same time? How might these figurative windows of insight, thought, ideas, fantasy, and fancy make us think differently about curriculum, teaching, learning, students, education, leadership, and schools? Further, how might they help us see more clearly, even perhaps put us on a path to correct the mistakes and missteps of intervening decades and of today? The chapter authors and editor revisit and interpret several of the most important works in the curriculum field of the 1990s. The book's Foreword is by renowned curriculum theorist William H. Schubert.

american history curriculum hmh: *History Wars and The Classroom* Tony Taylor, Robert Guyver, 2012-03-01 The book is entitled *History Wars in the Classroom: Global Perspectives* and examines how ten separate countries have experienced debates and disputes over the contested nature of the subject, for example the 'Black Armband' and 'Whitewash' factions in Australia who adopt opposingly celebratory or denigratory views of Australian history, especially when evaluating episodes of poor racial relations. There are also tensions between traditional/patriotic views of history teaching and reformed or 'new' history. There are issues of political control of the curriculum and parallel issues of who writes it (very topical in England at the moment over two expat 'big

picture' historians who work at Harvard and Columbia (Niall Ferguson and Simon Schama)).

His defining moment comes early, when Ned is city editor of his hometown paper. One of his beat reporters fields a tip: William Grant, the town haberdasher, married to the bank president's daughter and the father of two children, once served six years in Joliet. The story runs—Ned offers no resistance to his publisher's argument that the public has a right to know. The consequences, swift and shocking, haunt him throughout a long career—until eventually, as the editor of a major newspaper in post-Kennedy Washington, DC, Ned has reason to return to the question of privacy and its many violations.

american history curriculum hmh: The Elusive Thomas Jefferson M. Andrew Holowchak, Brian W. Dotts, 2017-11-28 Thomas Jefferson's writings on morality have largely been ignored. His thoughts on the subject, never developed in any formal work, are said to be unsystematic--a judgment reinforced by his shift from Stoicism (intentions are critical) to Utilitarianism (consequences are critical) later in life. Yet his writings and the moral works he recommended reveal much about his moral sense and views on good living. Jefferson valued personal moral improvement, had great respect for moral exemplars and drew inspiration from moralists, sermonizers, novelists, poets, historians and such role models as Professor William Small and his friend George Wythe.
