ancient war texts: *Textual Strategies in Ancient War Narrative* , 2018-11-26 In this collected volume fourteen experts in the fields of Classics and Ancient History study the textual strategies used by Herodotus and Livy when recounting the disastrous battles at Thermopylae and Cannae. Literary, linguistic and historical approaches are used (often in combination) in order to enhance and enrich the interpretation of the accounts, which for obvious reasons confronted the authors with a special challenge. ancient war texts: Ancient Literature and Philosophy of Religion Joel Steele, 2022-03-25 This work examines the parallels between ancient Ugaritic literature and the Old Testament. It demonstrates that human civilizations have certain generic cognitive similarities regarding the structuring of their societies--offering an alternative to the trendy composite or plagiaristic theory pertaining to Near Eastern literature and that of the Old Testament. Further, it may be deduced from these demonstrations that the Hebrew text has the ability, considering the vast number of resources within its own historiography, to be the primary source for determining clarification and accuracy. The second part of this study further critiques ideas regarding ancient literature and theology. It underscores the procedures, methods, and theories used to understand humanity's past from two philosophical perspectives--historical and theological. Moreover, it offers insights necessary for proper interpretation.

ancient war texts: Ambiguity and Narratology Simon Grund, Robert Kirstein, Julian Wagner, 2024-10-21 As a well-known phenomenon in everyday communication, ambiguity has increasingly become the subject of interdisciplinary research in recent years. However, within this context, it has been observed that words or expressions situated within the artistic framework of storytelling have not yet been at the centre of research interest. This book aims to bridge this gap by examining the phenomenon of ambiguity from the perspective of narratology - understood as a general theory of narration and narrative communication. The volume pursues two goals: Firstly, it seeks to demonstrate that the interdisciplinary combination of linguistics, cultural history and narratology enriches the field of literary studies significantly. This focus not only highlights how narrative techniques often rely on everyday language conventions, but also explores how various textual features, narrative devices, or even entire storylines can be affected by phenomena (or lead to experiences) of ambiguity. These ambiguities often serve as poetic strategies that are deliberately set in the communicative process of text and reader to achieve certain narrative goals. Secondly, ambiguity - as a characteristic of (narrative) communication - serves as a linking element across different fictional (and factual) text types and genres throughout time and cultures. The collected essays cover a wide range of narrative texts, from Roman comedy to funerary reliefs, from historiographical writings to utopian tales, from Goethe's novels to contemporary fantasy literature. In its broad approach, the volume thus contributes to the project of diachronic narratology, which, like the research on ambiguity in literary and cultural studies, has recently gained increasing momentum. The combined consideration of ambiguity and narratology not only raises awareness of phenomena of ambiguity in narrative texts but also encourage reflection on the theoretical foundations of narrative, particularly on the methods and devices used to describe these ambiguous

structures. Overall, the volume represents an exploration of a relatively unexplored interdisciplinary field, aiming to stimulate further research.

ancient war texts: Sex, Violence, and Early Christian Texts Christy Cobb, Eric Vanden Eykel, 2022-10-03 Examples of sexual violence and mentions of it appear with a disturbing level of frequency in the literature of early Christianity. This collection of essays explores these occurrences in canonical and noncanonical Christian texts from the first until the fifth centuries CE. Drawing from a range of interpretive lenses, scholars of early Christianity approach these writings with the goal of identifying how their authors employ the language of sexual assault, rape, and violence in order to formulate and support various rhetorical and theological claims. Individual chapters also address how and why these episodes of sexual violence have been ignored or, sometimes, read in a way that would make them less problematic. As a collection, *Sex, Violence, and Early Christian Texts* examines these texts carefully, ethically, and with an eye toward shining a light on the scourge of sexual violence that is so often manifest in both ancient and contemporary Christian communities.

ancient war texts: Handbook of Diachronic Narratology Peter Hühn, John Pier, Wolf Schmid, 2023-07-24 This handbook brings together 42 contributions by leading narratologists devoted to the study of narrative devices in European literatures from antiquity to the present. Each entry examines the use of a specific narrative device in one or two national literatures across the ages, whether in successive or distant periods of time. Through the analysis of representative texts in a range of European languages, the authors compellingly trace the continuities and evolution of storytelling devices, as well as their culture-specific manifestations. In response to Monika Fludernik's 2003 call for a diachronization of narratology, this new handbook complements existing synchronic approaches that tend to be ahistorical in their outlook, and departs from postclassical narratologies that often prioritize thematic and ideological concerns. A new direction in narrative theory, diachronic narratology explores previously overlooked questions, from the evolution of free indirect speech from the Middle Ages to the present, to how changes in narrative sequence encoded the shift from a sacred to a secular worldview in early modern Romance literatures. An invaluable new resource for literary theorists, historians, comparatists, discourse analysts, and linguists.

ancient war texts: God at War Gregory A. Boyd, 2014-06-18 Modern Christians are often baffled by the problem of evil, frequently attributing pain and suffering to some mysterious good purposes of God. Gregory Boyd instead declares that biblical writers did not try to intellectually understand evil but rather grappled to overcome it.

ancient war texts: Friendly Fire in the Literature of War Earl R. Anderson, 2017-05-08 The term friendly fire was coined in the 1970s but the theme appears in literature from ancient times to the present. It begins the narrative in Aeschylus's *Persians* and Larry Heinemann's *Paco's Story*. It marks the turning point in Homer's *Iliad*, Virgil's *Aeneid*, the *Chanson de Roland*, Stephen Crane's *The Red Badge of Courage* and Tim O'Brien's *Going After Cacciato*. It is the subject of transformative disclosure in Jaan Kross's *Czar's Madman*, Ron Kovic's *Born on the Fourth of July*, O'Brien's *In the Lake of the Woods* and A.B. Yehoshua's *Friendly Fire*. In some stories, events propel the characters into a friendly-fire catastrophe, as in Thomas Taylor's *A Piece of this Country* and Oliver Stone's 1986 film *Platoon*. This study examines friendly fire in a broad range of literary contexts.

ancient war texts: Greek and Roman Military Manuals James T. Chlup, Conor Whately, 2020-09-07 This volume explores the enigmatic primary source known as the ancient military manual. In particular, the volume explores the extent to which these diverse texts constitute a genre (sometimes unsatisfactorily classified as 'technical literature'), and the degree to which they reflect the practice of warfare. With contributions from a diverse group of scholars, the chapters examine military manuals from early Archaic Greece to the Byzantine period, covering a wide range of topics including readership, siege warfare, mercenaries, defeat, textual history, and religion. Coverage includes most of the major contemporary siege manual writers, including Xenophon, Frontinus, Vegetius, and Maurice. Close examination of these texts serves to reveal the complex ways in which ancient Greeks, Romans, and Byzantines sought to understand better, and impose order upon, the seemingly irrational phenomenon known as war. Providing insight into the multifaceted collection of texts that constituted military manuals, this volume is a key resource for students and scholars of warfare and military literature in the classical and Byzantine periods.

ancient war texts: Histories of the Hidden God April D DeConick, Grant Adamson, 2016-04-08 In Western religious traditions, God is conventionally conceived as a humanlike creator, lawgiver, and king, a being both accessible and actively present in history. Yet there is a concurrent and strong tradition of a God who actively hides. The two traditions have led to a tension between a God who is simultaneously accessible to humanity and yet inaccessible, a God who is both immanent and transcendent, present and absent. Western Gnostic, esoteric, and mystical thinking capitalizes on the hidden and hiding God. He becomes the hallmark of the mystics, Gnostics, sages, and artists who attempt to make accessible to humans the God who is secreted away. 'Histories of the Hidden God' explores this tradition from antiquity to today. The essays focus on three essential themes: the concealment of the hidden God; the human quest for the hidden God, and revelations of the hidden God.
