andrew tobias book reviews: *The Deal of the Century* Steve Coll, 2017-06-13 A New York Times–bestselling author’s “superbly reported” account of the dismantling of the world’s largest corporation (The Washington Post). Written by the two-time Pulitzer Prize–winning author of *Ghost Wars* and *Private Empire*, *The Deal of the Century* chronicles the decade-long war for control of AT&T. When the US Department of Justice brought an antitrust lawsuit against AT&T in 1974, the telecommunications giant held a monopoly on phone service throughout the country. Over the following decade, an army of lawyers, executives, politicians, and judges spent countless hours clashing over what amounted to the biggest corporate breakup in American history. From boardroom to courtroom, Steve Coll untangles the myriad threads of this complex and critical case and gives readers “an excellent behind-the-scenes look” at the human drama involved in the remaking of an entire industry (The Philadelphia Inquirer). Hailed by the New York Times Book Review as “rich, intricate and convincing,” *The Deal of the Century* is the definitive narrative of a momentous turning point in the way America does business.

andrew tobias book reviews: *The Death of Common Sense* Philip K. Howard, 2011-05-03 NEW YORK TIMES BESTSELLER “We need a new idea of how to govern. The current system is broken. Law is supposed to be a framework for humans to make choices, not the replacement for free choice.” So notes Philip K. Howard in the new Afterword to his explosive manifesto *The Death of Common Sense*. Here Howard offers nothing less than a fresh, lucid, practical operating system for modern democracy. America is drowning—in law, lawsuits, and nearly endless red tape. Before acting or making a decision, we often abandon our best instincts. We pause, we worry, we equivocate, and then we divert our energy into trying to protect ourselves. Filled with one too many examples of bureaucratic overreach, *The Death of Common Sense* demonstrates how we—and our country—can at last get back on track.

andrew tobias book reviews: *Tap Dancing to Work* Carol J. Loomis, 2013-12-31 Warren Buffett built Berkshire Hathaway into something remarkable— and Fortune journalist Carol Loomis had a front-row seat for it all. When Carol Loomis first mentioned a little-known Omaha hedge fund manager in a 1966 Fortune article, she didn’t dream that Warren Buffett would one day be considered the world’s greatest investor—nor that she and Buffett would quickly become close personal friends. As Buffett’s fortune and reputation grew over time, Loomis used her unique insight into Buffett’s thinking to chronicle his work for Fortune, writing and proposing scores of stories that tracked his many accomplishments—and also his occasional mistakes. Now Loomis has collected and updated the best Buffett articles Fortune published between 1966 and 2012, including thirteen

cover stories and a dozen pieces authored by Buffett himself. Loomis has provided commentary about each major article that supplies context and her own informed point of view. Readers will gain fresh insights into Buffett's investment strategies and his thinking on management, philanthropy, public policy, and even parenting. Some of the highlights include: The 1966 A. W. Jones story in which Fortune first mentioned Buffett. The first piece Buffett wrote for the magazine, 1977's "How Inflation Swindles the Equity Investor." Andrew Tobias's 1983 article "Letters from Chairman Buffett," the first review of his Berkshire Hathaway shareholder letters. Buffett's stunningly prescient 2003 piece about derivatives, "Avoiding a Mega-Catastrophe." His unconventional thoughts on inheritance and philanthropy, including his intention to leave his kids "enough money so they would feel they could do anything, but not so much that they could do nothing." Bill Gates's 1996 article describing his early impressions of Buffett as they struck up their close friendship. Scores of Buffett books have been written, but none can claim this work's combination of trust between two friends, the writer's deep understanding of Buffett's world, and a very long-term perspective.

andrew tobias book reviews: *The Consuming Instinct* Gad Saad, 2011-06-21 In this highly informative and entertaining book, the founder of the vibrant new field of evolutionary consumption illuminates the relevance of our biological heritage to our daily lives as consumers. While culture is important, the author shows that innate evolutionary forces deeply influence the foods we eat, the gifts we offer, the cosmetics and clothing styles we choose to make ourselves more attractive to potential mates, and even the cultural products that stimulate our imaginations (such as art, music, and religion). The book demonstrates that most acts of consumption can be mapped onto four key Darwinian drives—namely, survival (we prefer foods high in calories); reproduction (we use products as sexual signals); kin selection (we naturally exchange gifts with family members); and reciprocal altruism (we enjoy offering gifts to close friends). The author further highlights the analogous behaviors that exist between human consumers and a wide range of animals. For anyone interested in the biological basis of human behavior or simply in what makes consumers tick—marketing professionals, advertisers, psychology mavens, and consumers themselves—this is a fascinating read.

andrew tobias book reviews: *Leadership Legacy Moments* Grady E. Bogue, 2010-04-16 Written for college leaders at all levels as well as for trustees, this book engages the reader, via narrative and analysis, with the reflective and practical knowledge essential to a constructive legacy. Leaders of colleges and universities hold in trust an enterprise of complex mission, governance, and outcome. Most will take office with accompanying media celebration of their past records and future promise. Each will exit with a legacy. A few will leave behind tragic legacies of defeated spirits, corrupted organizations, and shameful ethical records. We may hope for collegiate leaders who will leave behind faculty and staff talents of greater promise, worthy goals achieved in concert with faculty and staff, and value cultures that inspire curiosity, courage, and compassion.
