becoming a learner 3rd edition: *An Historical Analysis of the Development of Thinking in the Principal Writings of Malcolm Knowles* George William Henry, 2009 Malcolm Shepherd Knowles was a key writer and theorist in the field of adult education in the United States. He died in 1997 and left a large legacy of books and journal articles. This thesis traced the development of his thinking over the 46-year period from 1950 to 1995. It examined the 25 works authored, co-authored, edited, reissued and revised by him during that period. The writings were scrutinised using a literature research methodology to expose the theoretical content, and a history of thought lens to identify and account for the development of major ideas. The methodology enabled a gradual unfolding of the history. A broadly-consistent and sequential pattern of thought focusing on the notion of andragogy emerged. The study revealed that after the initial phases of exploratory thinking, Knowles developed a practical-theoretical framework he believed could function as a comprehensive theory of adult learning. As his thinking progressed, his theory developed into a unified framework for human resource development and, later, into a model for the development of self-directed lifelong learners. The study traced the development of Knowles' thinking through the phases of thought, identified the writings that belonged within each phase and produced a series of diagrammatic representations showing the evolution of his conceptual framework. The production of a history of the development of Knowles' thought is the major outcome of the study. In addition to plotting the narrative sequence of thought-events, the history helps to explicate the factors and conditions that influenced Knowles' thinking and to show the interrelationships between ideas. The study should help practitioners in their use and appreciation of Knowles' works.

You will learn how to shift from being a deliverer of content, to a thoughtful designer and facilitator of student-centered learning experiences who gently guides from behind the scenes. Kyle, a veteran co-learning experience designer, former classroom teacher, and school leader, unpacks each of the 12 shifts required to build these student-centered environments. Chapters cover how to shift from a content-based to inquiry-based approach; develop relevant, interdisciplinary skills; cultivate meaningful student reflection; curate beautiful, real-world work; facilitate student-led discussion; and more. Through stories from real student-centered classrooms around each shift, and anecdotes from the author's experience teaching and leading micro-academies, you will come away ready to unleash student creativity, build thoughtful inquirers, and develop self-directed learners within your own context.

becoming a learner 3rd edition: Perspectives on Multigrade Teaching Linley Cornish, Matshidiso Joyce Taole, 2021-10-25 This book contains the results of research projects carried out in relation to multigrade teaching in Australia and South Africa. Research in multigrade contexts is not commonly reported and rarely in book form. The research results have implications for multigrade teachers, government education personnel, and university teacher educators. The book also contains chapters with practical advice for multigrade teachers, including examples of multigrade teaching used in an Australian seven-grade class (kindergarten to grade 6). Other chapters contain suggestions for practical strategies a multigrade teacher can use to reduce the workload involved in planning for multiple grades. Very little is published in the area of multigrade teaching, yet the number of multigrade schools worldwide is huge. Developed countries still have a significant proportion of multigrade schools (commonly one fifth to one third of all primary schools or classes). Despite decades of centralisation of schools and expansion of transport networks, the number of these schools remains high, mostly in rural areas. Developing countries established multigrade schools in rural areas in order to achieve the UN Millennium Development Goal of Universal Primary Education. Yet, specific training to teach a multigrade class remains virtually non-existent in initial teacher education programs worldwide. The value of this book is thus to report specific research carried out in multigrade contexts but also to provide practical help for multigrade teachers. This help is needed as the teachers strive to achieve the UN Sustainable Development Goal of a quality education, through helping their students develop the skills and behaviours required for 21st-century learning.
