beautiful countryside places in england: Touring and Publicizing England's Country Houses in the Long Eighteenth Century Jocelyn Anderson, 2018-02-22
Over the course of the long 18th century, many of England's grandest country houses became known for displaying noteworthy architecture and design, large collections of sculptures and paintings, and expansive landscape gardens and parks. Although these houses continued to function as residences and spaces of elite retreat, they had powerful public identities: increasingly accessible to tourists and extensively described by travel writers, they began to be celebrated as sites of great importance to national culture. This book examines how these identities emerged, repositioning the importance of country houses in 18th-century Britain and exploring what it took to turn them into tourist attractions. Drawing on travel books, guidebooks, and dozens of tourists' diaries and letters, it explores what it meant to tour country houses such as Blenheim Palace, Chatsworth, Wilton, Kedleston and Burghley in the tumultuous 1700s. It also questions the legacies of these early tourists: both as a critical cultural practice in the 18th century and an extraordinary and controversial influence in British culture today, country-house tourism is a phenomenon that demands investigation.

beautiful countryside places in england: A Tour Through the Whole Island of Great Britain Daniel Defoe, 2005-08-25 Britain in the early eighteenth century: an introduction that is both informative and imaginative, reliable and entertaining. To the tradition of travel writing Daniel Defoe brings a lifetime's experience as a businessman, soldier, economic journalist and spy, and his Tour (1724-6) is an invaluable source of social and economic history. But this book is far more than a beautifully written guide to Britain just before the industrial revolution, for Defoe possessed a wild, inventive streak that endows his work with astonishing energy and tension, and the Tour is his deeply imaginative response to a brave new economic world. By employing his skills as a chronicler, a polemicist and a creative writer keenly sensitive to the depredations of time, Defoe more than achieves his aim of rendering 'the present state' of Britain.

beautiful countryside places in england: Drivetime Pearce Lynne Pearce, 2016-07-07

Engages literary texts in order to theorise the distinctive cognitive and affective experiences of driving What sorts of things do we think about when we're driving - or being driven - in a car? Drivetime seeks to answer this question by drawing upon a rich archive of British and American texts from 'the motoring century' (1900-2000), paying particular attention to the way in which the practice of driving shapes and structures our thinking. While recent sociological and psychological research has helped explain how drivers are able to think about 'other things' while performing such a complex task, little attention has, as yet, been paid to the form these cognitive and affective journeys take. Pearce uses her close readings of literary texts - ranging from early twentieth-century motoring periodicals, Modernist and inter-war fiction, American 'road-trip' classics, and autobiography - in order to model different types of 'driving-event' and, by extension, the car's use as a means of phenomenological encounter, escape from memory, meditation, problem-solving and daydreaming. Key Features Brings Humanities-based perspectives to bear upon topical debates in automobilities research Introduces a new concept for understanding our journeys made my car by focusing on the driver's automotive consciousness rather than utility/function Makes use of auto-ethnography to explore and theorise automotive consciousness Draws upon a rich archive of literary texts from across the twentieth-century including original research into unknown writers featured in the early twentieth-century texts/motoring periodicals
