becoming a learner e book: *EBOOK: Teaching Adult Literacy: A Teacher Education Handbook* Nora Hughes, Irene Schwab, 2010-02-16 Are you teaching or training to teach literacy to adult learners? Do you want to update and deepen your practice? Yes! Then this is the essential book for you! In this book, the authors offer friendly guidance on how to work with adult learners to develop their literacy skills and practices. They challenge the negative view of adult literacy learners as social 'problems', often described in terms of their deficits. They promote an alternative view of people who have rich resources and skills in many areas of their lives which they can bring to the learning process. The contributing authors have a wealth of experience as practitioners and researchers in the field. They pull together a wide range of current theory and research on adult literacy, offering new perspectives on theory and applications to everyday practice. Key features include: Case studies of real student experiences Samples of learners' writing with commentary and analysis Application of linguistic theory to literacy teaching Practical suggestions for teaching, planning and assessment Guidance on supporting learners with dyslexia and global learning difficulties Reflective tasks, encouraging readers to develop and apply their knowledge This book is an invaluable resource for trainee teachers studying on literacy specialist courses leading to teaching qualifications, as well as for experienced practitioners wishing to update and deepen their practice.

becoming a learner e book: *EBOOK: Characteristics of Effective Early Learning: Helping young children become learners for life* Helen Moylett, 2013-09-16 The key argument of *The Characteristics of Effective Early Learning* is that how children learn is as important as what they learn. This book helps you understand how to support the learning and development of young children through promoting the characteristics of effective early learning: play and exploring, active learning, and creating and thinking critically. The book: Investigates how children engage in learning through playing and exploring, and are motivated through active learning Explores how

children become creative and critical thinkers able to review their own learning and thinking, imaginatively solving problems and excited by their own. Examines appropriate approaches to observation, assessment and planning. Supports practitioners in reporting on how children demonstrate these characteristics for the revised EYFS profile. Rich in practical examples and case studies, this is an essential read for early years students and practitioners who want to find out more about how to promote the characteristics of effective early learning in their practice. Contributors: Di Chilvers, Clare Crowther, Kim Porter, Sue Rogers, Judith Stevens, Nancy Stewart, David Whitebread. This is such a useful addition to other publications which clarify, enrich and expand on messages in the revised Early Years Foundation stage. A range of early years experts offer valuable insights on important topics linked to young children learning. The contributors write authoritatively drawing on historical studies as well as more current research. Authentic case studies vividly illustrate theoretical points. Helen sets the stage beautifully, providing a rationale, structure and sequence to a book which truly and lovingly celebrates the processes of children's unfolding development. Marion Dowling, Early Years Specialist and Vice President of Early Education. An insightful and engaging read for students and professionals within the Early Years sector that brings alive the concepts of effective learning that underpin the Early Years Foundation Stage. The book provides an excellent synthesis of developmental and pedagogic research enabling readers to make connections between theory and practice. One of the great strengths of the book is the way in which young children are celebrated as active and powerful agents in their own learning. The book allows readers to reflect on how adults can build on this to ensure that the potential for learning within each child is fully supported through effective pedagogies as well as in more formal planning and assessment. The contributing authors bring a variety of perspectives and knowledge that combine to illuminate the principles behind effective early years practice and explore how these can be translated into meaningful and supportive experiences for children. Dr Mary Wild, Principal Lecturer, School of Education, Oxford Brookes University, UK. What a wonderful sub-title 'Helping young children to become learners for life'. It is so refreshing to find, (among the plethora of new publications on child development) a book that really sees all children as 'rich children' and describes them as capable and confident learners. All the authors share their knowledge in a highly accessible manner which means I can recommend this book to both our practitioners and students undertaking first degrees and post qualifying courses. The authors clearly identify the qualities and attributes of highly effective learners. They share the view that young children come into Early Childhood Education settings hungry to make sense of relationships and the world they are growing up in. They powerfully describe the kind of skilled educators that children deserve; educators who can harness children's energy, engage with their interests and extend their critical thinking. Dr Margy Whalley, Director of the Pen Green Centre for Children and Families and the Pen Green Research Base.

becoming a learner e book: EBOOK: Becoming a Teacher: Issues in Secondary Education Meg Maguire, Simon Gibbons, Melissa Glackin, David Pepper, Karen Skilling, 2018-02-16. Becoming a Teacher provides a broad context for understanding education, addressing issues such as the influence of international policy and practice, education ideology and social justice. This is balanced with practical advice for the classroom on topics such as assessment for learning, learning technologies, literacy, numeracy and English as an additional language. Becoming a Teacher draws extensively on contemporary research and empirical evidence to support critical reflection about learning and teaching. Encouraging you to reflect on your knowledge and beliefs, it explores some of the complex social and cultural influences that influence professional learning and practice. The approach chimes with the government's recognition that trainee teachers should take a research-informed approach towards classroom practice. The fifth edition is refreshed and revitalized throughout, with:

- a complete revision of each chapter
- new chapters on 'Reforming ITE', 'Teachers Lives and Careers', 'International Influences', 'Engagement and Motivation', 'Learning and the Emotions', 'Data Usage in Schools', 'Safeguarding' and 'Learning with Digital Technologies'
- up-to-date referencing of research findings
- insightful policy analysis
- critical

commentary on issues For those training to teach in secondary school on a Postgraduate Certificate in Education (PGCE) or a School Direct programme, or taking an undergraduate or postgraduate Education Studies course, *Becoming a Teacher* provides invaluable support, insight and guidance. Amanda Blaber is a Senior Lecturer at the School of Health Sciences University of Brighton, UK, for the BSc (Hons) Paramedic Science course, Honorary Fellow of the College of Paramedics and Senior Fellow of Higher Education Academy.

becoming a learner e book: EBOOK: Raising Achievement in Secondary Mathematics Anne Watson, 2006-06-16 This book brings together research and professional knowledge to enhance the teaching of lower attaining students in secondary mathematics. Attainment in mathematics is an important social issue, since underachievement can make a difference to future life choices, particularly amongst certain groups of students. *Raising Achievement in Secondary Mathematics* shows how well-meant teaching strategies and approaches can in practice exacerbate underachievement in maths by making inappropriate demands on learners. As well as criticizing some of the teaching and grouping practices that are considered normal in many schools, the book also offers an alternative view of attainment and capability, based on real classroom incidents in which 'low attaining students' show themselves to be able to think about mathematics in quite sophisticated ways. The author argues that teaching could be based on learners' proficiency, rather than on correcting deficits in knowledge and behaviour. She describes how a group of teachers who believed that their students could do better with higher expectations developed a range of principles and strategies to support their work - the students showed significant progress and the teachers felt

they were doing a better job. With numerous case studies, ideas and teaching strategies, this book is for anyone who is teaching, or learning to teach, mathematics.

becoming a learner e book: EBOOK: Parents Matter: Supporting the Birth to Three Matters Framework Lesley Abbott, Ann Langston, 2006-06-16 This book explores the important role of parents and the extended family in the lives of babies and young children. It complements and extends the DfES Birth to Three Matters framework, which supports practitioners in working with children aged birth to three, and builds on the information provided in the companion book Birth to Three Matters: Supporting the Framework of Effective Practice (Open University Press, 2004). Written by academics, practitioners and policy makers interested or involved in the development of the Birth to Three Matters framework, this book argues that parent engagement is essential for developing partnerships within communities in order to give children the best start in life, and shows how this can be achieved. The book: Discusses ways in which services may be developed to involve parents more fully in the care and education of babies and young children Looks at the powerful role of parents and grandparents in the lives of children Considers how skilled practitioners can manage relationships to provide support for both parents and children at difficult times Explores the ways in which parents can be helped to fulfil their own needs at the same time as meeting their children's needs Includes discussion of families whose children have special needs or disabilities Parents Matter is essential reading for early years professionals and students on courses in Early Education, as well as policy makers, professional development trainers, local authority trainers, social workers and health visitors who work with very young children.

becoming a learner e book: Ebook: Briging the Curriculum to Life: Engaging Learners in the English Education System Janice Wearmouth, Karen Lindley, 2021-06-18 How can we bring the curriculum to life so that all young people of compulsory school age are fully engaged in their learning and achieve to their maximum? Professor Janice Wearmouth and Dr Karen Lindley bring together contributions from practising teachers, researchers and academics to answer this question for a range of educational contexts and demonstrate the positive impact that can be achieved on student learning at all levels. This edited volume highlights challenges and opportunities within the current English education system. With reflective questions and ideas for teachers to implement in the classroom, this important book bridges the gap between theory and practice and will be invaluable reading for trainee teachers, teacher trainers, qualified teachers and others with an interest in education and the curriculum. The intrinsic value of the book is that it seeks to illuminate the discussions surrounding the issues identified, from differing and alternative perspectives in education. Dr Barry Paraskeva Costas, Senior Lecturer in Physical Education, University of Hertfordshire, UK A highly engaging and refreshing look at how a diverse range of learners might be immersed in their learning, this book provides an imaginative and thought-provoking consideration of creative curricula to involve and inspire learners. Julie Wharton, Senior Lecturer, University of Winchester, UK This book does an excellent job of drawing together a wide range of contributions and contexts that collectively put the challenges and opportunities of curriculum centre stage. Dr Warren Kidd, School of Education and Communities, University of East London, UK Janice Wearmouth is Professor of Education at the University of Bedfordshire, UK. Dr Karen Lindley is Senior Lecturer in Education at the University of Bedfordshire, UK. Both editors are experienced teachers and researchers with continuing close links to Education students, trainee teachers, teacher trainers and practising teachers.

becoming a learner e book: EBOOK: EFFECTIVE EARLY YEARS EDUCATION Anne Edwards, Peter Knight, 1994-12-16 In this concise and accessible guide, the authors are sympathetic to the particular demands of teaching three to eight year olds and offer practical solutions to the complex issues that are currently faced by early years educators. In recognizing the demands on practitioners, they provide new and challenging frameworks for an understanding of the practice of teaching young children and draw upon international research to offer a sound model of early years subject-structured teaching which has the quality of children's learning at its centre. Their aim is to support teacher expertise through stimulating teachers' thinking about children's development,

motivation, ways of learning and the subjects they teach. These topics are clearly set in the complex institutional settings in which practitioners work and ways of taking and evaluating action are offered.

becoming a learner e book: EBOOK: Studying Early Years: A Guide to Work-Based Learning Anne Rawlings, 2008-10-16 Are you studying early years in the work place, to gain further qualifications? Do you want help in developing the study skills you need to become a reflective student and practitioner? Do you want to get ideas and strategies for using your work experiences effectively for your assignments? If you answered 'yes' to any of these questions, then this is the book for you. Studying early years in the work place in order to gain further qualifications and awards provides many exciting yet challenging opportunities for practitioners. In to become a reflective student and practitioner researcher it is imperative to think critically, analyse, explore and evaluate ideas or concepts in more depth. This book provides a framework for developing these important skills as well as providing support for the challenges and changes that early years practitioners face on a day-to-day basis. It provides ideas and strategies for identifying a personal learning style in order to use your work experiences effectively for a variety of work-based assignments. The author provides a Key Components Framework (KCF) for work-based learning. It supports you in coming out of your 'comfort zone' and taking risks in your learning. The three strands of the KCF provide opportunities to: Reflect upon how external factors - such as government initiatives - can influence and impact on practice Consider how personal factors - such as cultural background - can impact on learning and practice Acknowledge the 'hidden skills' - such as ability to problem solve - that early years practitioners need in order to achieve in today's rapidly changing early years sector Studying Early Years is an essential guide for all early years students and particularly those pursuing work-based qualifications such as the Early Years Foundation degree.

becoming a learner e book: EBOOK: Teaching for Quality Learning at University John Biggs, Catherine Tang, 2011-09-16 This book is an exceptional introduction to some difficult ideas. It is full of downright good advice for every academic who wants to do something practical to improve his or hers students' learning. Paul Ramsden, Brisbane, Australia Biggs and Tang present a unified view of university teaching that is both grounded in research and theory and replete with guidance for novice and expert instructors. The book will inspire, challenge, unsettle, and in places annoy and even infuriate its readers, but it will succeed in helping them think about how high quality teaching can contribute to high quality learning. John Kirby, Queens University, Ontario, Canada This best-selling book explains the concept of constructive alignment used in implementing outcomes-based education. Constructive alignment identifies the desired learning outcomes and helps teachers design the teaching and learning activities that will help students to achieve those outcomes, and to assess how well those outcomes have been achieved. Each chapter includes tasks that offer a 'how-to' manual to implement constructive alignment in your own teaching practices. This new edition draws on the authors' experience of consulting on the implementation of constructive alignment in Australia, Hong Kong, Ireland and Malaysia including a wider range of disciplines and teaching contexts. There is also a new section on the evaluation of constructive alignment, which is now used worldwide as a framework for good teaching and assessment, as it has been shown to: Assist university teachers who wish to improve the quality of their own teaching, their students' learning and their assessment of learning outcomes Aid staff developers in providing support for departments in line with institutional policies Provide a framework for administrators interested in quality assurance and enhancement of teaching across the whole university. The authors have also included useful web links to further material. Teaching for Quality Learning at University will be of particular interest to teachers, staff developers and administrators.

becoming a learner e book: EBOOK: Teaching 14-19: A Handbook John Bostock, Jane Wood, 2012-02-16 This book provides a comprehensive overview of how to teach younger learners in Post-Compulsory Education and Training (PCET). With clear guidance and offering practical strategies, Teaching 14-19 helps you understand how students learn, the theory that supports this and the role of assessment in this process. There is also an extensive focus on how to manage

behavior, as this is the most frequently raised concern. The authors show that the overarching models of learning and teaching for 14-19 year olds are very different between school and PCET. The book explores these various models and in particular looks at how this understanding might help you in planning for learning. As well as appropriate models of practice relevant to this age group, further features of the book include: Practical hints, tips and suggestions for practice Case studies to help you learn from and reflect on practice Discussion of theoretical issues that will enable you to understand and underpin your practice Additional reading and resource suggestions This book is essential reading for trainee and practising tutors, teachers and lecturers in schools or colleges.

becoming a learner e book: EBOOK: Teaching Adult Numeracy: Principles & Practice Graham Griffiths, Rachel Stone, 2013-09-16 This book offers friendly guidance on how to work with adult learners to develop their numeracy and mathematics skills. It brings together current research and practice on teaching adult numeracy into one handy volume and covers the major issues faced by teachers of adult numeracy such as current policy perspectives and implications for teaching practice. There are reflective tasks throughout, which encourage you to develop and apply your theoretical knowledge to your own experiences. Key features include: Reviews of existing policy and research and implications for practice Reflective tasks with commentary, encouraging you to develop and apply your knowledge Case studies of real student experiences Practical activities and ideas to support the planning, teaching and assessment of adult numeracy Drawing on the substantial experience of the contributors, who have a wealth of experience as practitioners and researchers in the field, this book is an essential resource for trainee and practising teachers of adult numeracy and mathematics. It is also an ideal textbook to support teacher training courses leading to a subject specific qualification in teaching numeracy to adults. Contributors: Jackie Ashton, John Barton, Carolyn Brooks, Martyn Edwards, Janette Gibney, David Holloway, David Kaye, Beth Kelly, Barbara Newmarch, Helen Oughton, David Prinn, Diana Spurr, Rebecca Woolley This is a quite unique book about teaching adult numeracy, which will be invaluable to the many practitioners in this field. The chapters, contributed by a group of experienced and successful lecturers and practitioners, include all aspects of this field, from methods of teaching specific mathematical topics to more general explorations of dyscalculia and emotional factors in adult learners. Each chapter

includes research findings and thoughtful presentation of ideas with practical ideas for teaching, and tasks for the reader. This is a market which has not been served well in the past, so it is good to see the gap filled at last. Margaret Brown, Emeritus Professor of Mathematics Education, King's College London, UK The editors of this book set out to produce a text that would support teacher-education programmes for adult numeracy, and their book does that and more. The content covers different types of learners, different settings, different understandings of what numeracy actually is; and ranges from commentary on research through case studies to how to hints and tips for teaching. Chapters 7 (on provoking mathematical thinking) and 8 (attitudes, beliefs and teaching) should be a required read for any adult numeracy teacher. The book would be at home on any numeracy teacher's desk, and would make an excellent set text for numeracy teacher training courses. Carol Randall, course co-ordinator for numeracy in the department of Lifelong Learning Teacher Education, University of Greenwich, UK This book is a welcome addition to the growing literature on adult numeracy. It should be essential reading for trainee and practising adult numeracy educators. It brings together relevant research and professional wisdom on a wide variety of aspects of adult numeracy teaching and learning in an accessible way, with well-focussed tasks for readers to extend their knowledge and understanding. While the book is born out of UK concerns and issues, it is also relevant to international readers. Highly recommended. Professor Diana Coben PhD, Director, National Centre of Literacy & Numeracy for Adults, University of Waikato, New Zealand, and Hon. Trustee, Adults Learning Mathematics - A Research Forum (ALM -- www.alm-online.net/)

becoming a learner e book: Ebook 180 Day Access to Accompany Allen, Misconceptions in Primary Science 4e Michael Allen, 2025-03-05 "As Michael Allen points out, old misconceptions seldom die while new ones are conceived daily. He has made an excellent job of refreshing this fourth edition... It is so much more than a collection of fascinating conceptual 'butterflies', it is a carefully detailed window onto some of children's science-based thinking." Mike Watts, Professor of Education, Brunel University, UK "Misconceptions in Primary Science is a comprehensive account of how children learn science and the common misconceptions they may have. It is a detailed and helpful book that all primary teachers should consult before teaching any aspect of science." Dr James Williams, Reader in Science Education and Communication, University of Sussex, UK Misconceptions in Primary Science remains the go-to resource for primary teachers seeking practical, accessible support to tackle common misconceptions in the science classroom. This updated edition will enhance teachers' grasp of scientific concepts and offers practical guidance to address the thought processes that can lead children astray. Unlike many primary science books that solely focus on subject knowledge or lesson plans, Michael Allen delves into the origins of over 100 common misconceptions, providing insights into why they arise and how to address them effectively. New features include: •Planning and assessment sheets tailored to each chapter •A new chapter on climate change •Misconceptions about bacteria and viruses, including Covid-19 •Guidance on leveraging Artificial Intelligence to enhance science teaching With creative activities

and actionable advice, this book helps teachers bring scientific concepts to life for their students, fostering deeper understanding and improved learning outcomes. For student, newly qualified and experienced teachers alike, *Misconceptions in Primary Science* is an indispensable toolkit for teaching primary science with confidence.
