behind the green mask 2023: Visualising far-right environments Bernhard Forchtner, 2023-10-17 This volume presents ground-breaking analyses of how the far right represents natural environments and environmentalism around the globe. Images are not simply pervasive in our increasingly visual culture - they are a means of proposing worlds to viewers. Accordingly, the book approaches the visual not as something 'extra' or 'illustrative' but as a key means of producing identities and 'doing politics'. Putting visuality centre stage and covering political parties and non-party actors in Africa, Asia, Australia and New Zealand, Europe and the United States, contributors demonstrate the various ways in which the far right articulates natural environments and the rampant environmental crises of the twenty-first century, providing essential insights into such multifaceted politics.

behind the green mask 2023: Virtually Lost Garry Robson, 2023-05-16 This book examines the connections between the psycho-social difficulties and challenges faced by children and younger people in their online lives; the structure, character, and motivations of the corporate system 'behind' the screen; and the possibility that the digital technostructure may come to form the backbone of a new post-democratic system of technocratic governance. Much of the originality of this book lies in its blending of subjects that are not often combined, thereby offering a fresh perspective: 'generation studies'; the philosophy of technology; the history of the idea of technocracy; the technologically enhanced merger of corporate-governmental power in the U.S. system; the society-shaping goals and capabilities of the big tax-exempt American foundations over the last hundred years; the elite 'superclass' gaming of formally constituted transnational and global institutions; and the way the United Nations-centred SDG-ESG system is itself developing in the direction of a technocratic system of economic and population management. The book will appeal to readers interested in relationships between our contemporary global power elite, the structures it has created and processes it has set in motion, and how these affect young people whose development is already being over-determined by the activities of the big Silicon Valley entities and their associates.

behind the green mask 2023: STAYING HUMAN K. L. Stubblefield, 2023-11-16 Staying

Human Within this writing we discuss America's and particularly Black America's slide into decadence, depravity, and despair and how this will lead to its subjugation to the coming tyranny of Artificial intelligence. If we look with an open mind we can see how technology has already led to the breaking down of morality and open rebellion against Godly principles that while not totally adhered to by this nation, has been a hedge against all out wickedness. Our attempt to at least guide our behavior with the precepts of holiness and godliness has allowed the American nation to receive blessings of wealth and freedom from the Most high. That is now changing and God is slowly removing his protection from our nation.. America's power and influence whether for good or evil was given to us by God. It is He who sets up nations, and it is He who brings about their fall. What is happening to the United States today has happened before with many other kingdoms. There is no new thing under the sun. Nor was there any respect of persons given from The Most High. This nation will and is currently feeling the pains of all the other nations that has fallen before it. And just like all the other kingdoms that fell such as Rome, Greece, Egypt, and Babylon , America's blind adherence to self promotion, and narcissistic hubris has blurred her vision of her plight. America is now a weak nation, a nation that is living on so called past greatness. Militarily America relies on enormous deficit spending on technology and advanced weaponry in order to maintain its power and influence worldwide. Yet when engaged in actual combat with weaker nations America still suffers a bloody nose and a black eye. Vietnam , Somalia, Iraq, and Afghanistan, are modern examples of America's inability to win wars outright. These wars and excursions drain the coffers of this nation and force it into deficit spending in order to maintain the false illusion of wealth and power. The scepter has been removed from America's hand. The royal diadem no longer sits above her brow. Yet she does not perceive its removal. The once so called democratic form of government in America has now morphed into a technocratic corporate oligarchy. The gap between rich and poor is now wider here than in any industrialized nation in the world. This leads to those in power creating a culture to maintain their wealth and prevent uprising from the masses. This will lead to the use of technological advances, such as A.I. in order to quell any potential rebellions. America, your once proud land has become a nation of fornicators , whiners, complainers, abusers, murderers, and politically corrupt parasites. America's plight can be summed up in one Phrase. ICHABOD : THE GLORY OF THE LORD HAS DEPARTED.

behind the green mask 2023: Climate Security in the Anthropocene Judith Nora Hardt, Cameron Harrington, Franziskus von Lucke, Adrien Estève, Nicholas P. Simpson, 2023-05-20 The speed and scale of climate change presents unique and potentially monumental security implications for individuals, future generations, international institutions and states. Long-dominant security paradigms and policies may no longer be appropriate for dealing with these new security risks of the Anthropocene. In response to this phenomenon, this book investigates how states have reacted to these new challenges and how their different understandings of the climate-security nexus might shape global actions on climate change. It focuses on the perceptions, framings, and policies of climate security by members of the United Nations Security Council (UNSC), the world's highest ranking multilateral security forum. Empirically, the book presents detailed, bottom-up case studies from local authors of every UNSC member state in 2020. It combines this with an innovative theoretical approach spanning national, human and ecological security that helps to capture the complex dynamics of state-led approaches to dealing with security in the Anthropocene. This book therefore offers readers a compelling picture of climate-security politics in the UNSC, beyond Council debates and resolutions. By comparing and contrasting how different framings of climate security impact various policy sectors of members states, the authors are able to assess the barriers and opportunities for addressing climate security locally and globally. "This timely contribution to the literature on climate security examines the under-analysed relationship between the policy approaches of key countries at the national, and at the international level. Policy alignment at multiple levels of governance will be critical if we are to respond adequately to the ubiquitous challenges posed by climate change and variability." Shirley Scott, Head of School and Professor, School of Humanities and Social Sciences, UNSW Canberra at the Australian Defence Force

Academy (Australia). Climate change is increasingly considered a problem of 'security', yet what that means remains deeply contested. Behind the rhetoric of 'climate crisis', threats and 'emergencies', UN Security Council members offer profoundly different ideas about what climate change – and security – mean, and what should be done about it. This book brilliantly lays out the hidden or overlooked divergences of interests and perspectives on 'climate security' that are playing out in the world's most central security institution, as it grapples with securing a climate unstable world. Olaf Corry, Professor of Global Security Challenges, Faculty of Social Sciences, School of Politics and International Studies, University of Leeds (United Kingdom). Security is a contested concept, whose scope and direction are subject to change. The prime value of this volume is the systematic documentation of the dynamics in defining what security is about in reaction to ever dramatic climate change. The book's focus on a somewhat representative sample of states – the members of the Security Council – provides robust evidence that even though many governments remain reluctant to retreat from traditional perceptions of security, there is a large and growing acceptance of the need to adjust priorities in providing security in response to climate change and its consequences. Michael Brzoska, Professor and Senior Research Fellow, IFSH Institute for Peace Research and Security Policy, Universität Hamburg (Germany). The climate security literature has often been labelled as West-centric with little recognition of knowledge production processes, and different historical, socio-economic, and political experiences of various societies in the Global South. This book goes beyond the conventional approaches to provide a whole range of perspectives on climate security reflective of diverse contextual realities – covering factors such as development imperatives, conflict dynamics, postcolonial legacies, institutional/actor complexities, and geopolitical contestations, among others. By focusing on the climate security approaches of various countries (case studies) at the domestic and international levels, the applicability of existing climate security frameworks (or lack thereof) in the context of these case studies is brilliantly brought out by the chapters. This book weaves together these diverse perspectives by providing a comprehensive overview of climate security-related policies of countries from both Global South and Global North; and their positions on climate change and security in the UNSC. They reflect the varying norms, interests, priorities, and challenges that continue to shape the climate security agenda within the UNSC as well as non-UNSC platforms. This book is a must read for anyone interested in gaining an in-depth and invigorating understanding of the evolution of distinct climate security discourses and practices in varying contexts. Dhanasree Jayaram, Assistant Professor, Department of Geopolitics and International Relations, Manipal Academy of Higher Education (MAHE) (India), Research Fellow. Centre Marc Bloch. *Climate Security in the Anthropocene* provides a timely and compelling account of the conceptualizations of the climate security nexus and their implications. By considering climate security through the lenses of national, human and ecological security it provides a sophisticated account of the different dimensions involved in the UNSC debates and beyond. The collection of chapters illustrating the positions of the members of the UN Security Council in 2020, not only provide an informative account but also sheds light on the challenges that the UNSC faces in dealing with climate change. Maria Julia Trombetta, Associate Professor in Politics and Environment, School of International Studies, Institute of Asia and Pacific Studies, University of Nottingham Ningbo China (China). The book “Climate Security in the Anthropocene” is the first systematic assessment of climate security decision-making and governance of the UN Security Council. It is groundbreaking as it combines empirical bottom-up case studies of perceptions and policies of different ministries and governmental agencies of UNSC member states with a novel theoretical framework contrasting different security framings and conceptions in the Anthropocene. Discussing various policy sectors, the study assesses barriers and opportunities and provides novel insights on multi-scale responses and interactions in the climate-security nexus from local to global levels, connecting individuals, future generations, international institutions and states. The book is highly recommendable for everyone interested in the emerging field of policy-oriented climate-security research. Jürgen Scheffran, Professor for Integrative Geography, Head of the Research Group, “Climate Change and Security” (CLISEC), Center for Earth System

Research and Sustainability, Universität Hamburg (Germany). This volume provides multifocal insights into the climate/security nexus, combining critical security studies and international relations theories in the age of the Anthropocene. Analyzing the perceptions, policies, and positions of 15 UN Security Council member states, this thought-provoking piece demonstrates how national security, human security, and ecological security have advanced as conceptual innovations. Offering a rich and diverse range of empirical case studies, this piece is a strong contribution to academic discourse and teaching alike. Franziska Müller Junior Professor for Political Science, Faculty of Business, Economics and Social Sciences, Universität Hamburg (Germany).

behind the green mask 2023: Holler Rat Anya Liftig, 2023-08-15 From a critically acclaimed, Pushcart Prize-nominated performance artist, a funny, vivid, and ultimately heartbreaking memoir about forging identity in the chasm between cultures and classes Anya Liftig grew up with her feet in two very different worlds. While her mother's upbringing was so rural that the other kids called her "holler rat," her father came from a comfortable, upper-middle-class Jewish family. Anya spent her childhood school years in Connecticut and her summers in the holler. Shaped by the experience, she would go on to win a scholarship to Yale and become an acclaimed artist, using provocative performances to explore the contradictions and unanswered questions of her life. But when the world Anya was building for herself shattered, she was forced to reconcile where she'd come from with who she was and who she wanted to be. In Holler Rat, Anya skillfully interweaves family lore from her childhood with descriptions of her performance art pieces and scenes of the year-long period in which her life fell apart, then plumbs the cathartic self-reckoning that followed. She takes us from her mamaw's porch to the site of a violent family land feud; from Yale to the rancid odors of a pre-gentrified Bushwick loft; and from making out with a 14-pound salmon to having 243 raw eggs pelted at her in the name of art. In visceral, beautiful prose that ranges from raunchy and outrageous to serious and tragic, Holler Rat is the origin story of an unconventional artistic life and a captivating account of the stumbling blocks, sacrifices, and discoveries along the way.

behind the green mask 2023: Heaven ABOUND Matthew Keaton, 2023-05-19 About the Book Join in on an adventure of epic proportions rarely before seen as a group of outcasted teens graduate high school and tackle life by the horns! Not only as they bear the heavy weight of climbing uneasily into adulthood but take on bigger demons that threaten everything they hold dear! It's up to all of them to stick together to protect each other while they survive as the universe throws them a horrifying curveball, one after another! For if they don't, their friendships won't be the only things that are destroyed! Heaven ABOUND is currently an ongoing series, so you better watch out for new editions! About the Author Matthew Keaton is a New York native, born in Brooklyn and raised in Long Island. He grew up curious and eager to learn. Always creative and spontaneous, writing and drawing came naturally. Even from a young age, being well read and ahead of the curve came in handy and boosted him through his academics. Spending a large portion of his years in Texas after moving from his Long Island home of 13 years, he spent 11 years there with his immediate family. After those 11 years, he moved to Colorado alone to start a new life. Alongside his creative journey, he pursued physical fitness and became a certified personal trainer in order to inspire and help others on their own journeys. Largely in tune with health and fitness, his imagination also expanded past writing to even producing music like his father. He was also no stranger to food and cooking as it was a hobby he picked up from his mother. During the earlier stages of covid in March 2020, especially during official lockdown, a large amount of time was given to Keaton to expand his ideas and experience life. Through this experience, he began to write nonstop in order to produce the novel series Heaven ABOUND. Among other titles, the ideas and framework for this series had been mulled over for a few years before being made flesh and before publishing was a twinkle in his eyes. The ideas in question had been formulaically edited, honed, and changed ever since he himself was in high school as a senior. Moreover, the writing was initially a type of therapy and was never meant to be seen by any eyes beside his own. As time passed he was finally able to put his ideas down, bringing the characters and story to life!

behind the green mask 2023: *Environmental Justice Context, Challenges and National Approaches* OECD, 2024-05-28 There is mounting evidence that, depending on social and economic circumstances, some communities and groups may face disproportionate exposure to environmental hazards, bear an inequitable share of the costs associated with environmental policies or face more barriers to participating in environmental decision-making. As countries increase their efforts to tackle environmental degradation, pollution and climate change, the concept of environmental justice can shed light on how to ensure fairness in the processes and outcomes of environmental policymaking. This report examines the plurality of the concept of environmental justice, its underlying conceptual pillars and how it has emerged in different contexts around the world. The

report also provides the first policy stocktake of how governments across the OECD and beyond are seeking to redress environmental justice concerns, building upon insights from 26 responses to the OECD Environmental Justice Survey as well as complementary desk analysis across a broader set of countries.

behind the green mask 2023: *The Venus Project: A Post Apocalyptic Sci-Fi* Ilker Korkutlar, 2023-04-18 Derin Kaplan was only six years old when her father was frozen, and a lot has changed in the world since then. The financial markets crashed with the interventions of a quantum computer built by her father, and biological weapons killed most of the global population. Derin and her mother survived and live in a female-only community in a high-tech building rising above the sea. The year is 2044 and, as a cryogenic engineer, Derin is working day and night to bring her father back to life. If he does come back, he will be three years younger than her, but what will that change? He'll still be her father. She remembers his face from old videos, and she's programmed her personal robot to speak with his voice. She misses him. Her mother is asking her to think this through more, but Derin is determined. She manages to freeze and thaw one of the hamsters she's been experimenting with, but one is still dead. There must have been a difference somewhere in the process, but she can't find it. She needs to ask Quantus, the community's AI. No one else can help her. She won't give up, even if bringing her father back means that two of the women who have applied for a baby this year will be turned down due to the community's restrictions on population growth. The system is very different from the approaches of the past; unanimity is required in voting, not just a majority. She must prepare a speech and convince the other women to vote in favor of bringing her father back. However, when her own life and the fate of the whole community are threatened by artificial intelligence, Derin begins to question everything she thought she knew. Her questions will lead her into outer space in pursuit of a mysterious object that appears and disappears in the sky, and the answers that she finds will show her how humanity came to be on Earth and how they should live from this point forward. Derin's story is interspersed with those of several other interconnected characters, with action taking place both before and after the crises that bring about the collapse of the old-world order.

behind the green mask 2023: *The Aulverse* Daniel Archer, 2023-07-21 ONE HELL OF A PARADISE... Ahh, the Aulverse, a world of wonder and anarchy, of entitlement and squalor; two sides to a very specific coin - the coin of this hellish paradise. Heads, and you might find yourself amongst the royals of the Kingdom of Bovidae; with their fancy horns and proper mannerisms, all groomed beyond perfection with silver spoons crammed so far inside their mouths it's a wonder they can even breathe. Tails though, and you might find yourself in the slums of the Aphid Tunnels, surrounded by equally as oppressed insectoids, all born into slavery with no hope for freedom. Some have been known to find graces in their ill fate, just as others have gambled away their luck, life in the Aulverse however, just as any life, is what you make of it, so why not turn your back on the chain gang and the ivory towers? Why not venture out into No Man's Land and peruse the diabolical Grisly Woods - really get that blood pumping? Who knows? You might even get to the bottom of the mysteries of this place, figure out why it is that one even finds themselves here, or how exactly, one might escape.

This anthology weaves together the spectral, the mysterious, and the uncanny, drawing readers into a world where the boundaries of the supernatural are ceaselessly explored. From the psychological chills of gothic narratives to the pulse-pounding excitement of supernatural thrillers, this collection encapsulates the diversity of 18th, 19th, and early 20th-century literature. Among the myriad of narratives, standout tales capture timeless themes of fear, wonder, and otherworldly curiosities, offering glimpses of chilling brilliance and inventive storytelling. This anthology is a confluence of literary giants and pioneers from across the globe, including the romantic gothic imaginings of Mary Shelley and the penetrating suspense of Edgar Allan Poe. Their contributions reflect a chronicled journey through historical and cultural lenses, bound together in the collective endeavor to interrogate what lies beyond the veil of reality. With authors affiliated with numerous literary movements, such as Romanticism, Victorianism, and the burgeoning gothic horror era, each tale contributes a nuanced voice to the expansive discourse on the supernatural. Readers will find 'SINISTER OMENS' a treasure trove of gothic imagination and supernatural intrigue, a unique portal into the hauntingly beautiful landscapes crafted by some of history's most influential writers. The anthology serves as both an educational compendium for those eager to explore the evolution of supernatural fiction and as an evocative odyssey for enthusiasts of the macabre. Through its varied narratives, the collection fosters a dynamic dialogue between the diverse authors, inviting readers to immerse themselves in the mystery and marvel of the unknown. This volume promises an unparalleled literary expedition into the shadows that linger at the fringes of human understanding.
