Early Presence and Origins of Black People in Britain

The history of black people in Britain dates back to Roman times when African soldiers and traders arrived on the island. Archaeological evidence, such as the discovery of a 4th-century Black Roman soldier's remains in York, confirms the early presence of Africans in Britain. During the medieval period, records show African individuals living in England, often serving as servants, musicians, or scholars in royal courts.

In the 16th and 17th centuries, the transatlantic slave trade and British colonial expansion brought more Africans and people of African descent to Britain. Many arrived as enslaved people, sailors, or servants, particularly in port cities like London, Bristol, and Liverpool. Despite the hardships, these early Black residents contributed to the economic and social fabric of Britain.

black history in britain: Narrative Projections of a Black British History Eva Ulrike Pirker, 2012-03-29 Since the mid-1990s, the black experience in Britain has begun to be (re)negotiated intensely, with a strong focus on history. *Narrative Projections of a Black British History* considers narratives that construct, or engage with, aspects of a black British history. Part I poses the question of what sort of narratives have emerged from, and in turn determine, key events (such as the iconic 'Windrush' moment) and developments and provides basic insights into theoretical frameworks. It also offers a large number of comparative readings, considering both 'factual' and 'fictional' forms of representation such as history books, documentary films, life writing, novels, and drama, and identifies main strands, 'official' narratives and countercurrents. Part II embarks on close readings and analyses of a selection of narratives that can be classed as reactions to the 'established' historical culture. Overall, the book draws attention to collective currents and individual positions, affirmative and critical approaches: Together, they form a representative image of a specific moment in the ongoing debate about a black British history.

black history in britain: 100 Great Black Britons Patrick Vernon, Angelina Osborne, 2020-09-24 'An empowering read . . . it is refreshing to see somebody celebrate the role that black Britons have played in this island's long and complicated history' DAVID LAMMY, author of Tribes, in 'The best books of 2020', the Guardian 'Timely and so important . . . recognition is long overdue . . . I would encourage everyone to buy it!' DAWN BUTLER MP A long-overdue book honouring the remarkable achievements of key Black British individuals over many centuries, in collaboration with the 100 Great Black Britons campaign founded and run by Patrick Vernon OBE. 'Building on decades of scholarship, this book by Patrick Vernon and Dr Angelina Osborne brings the biographies of Black Britons together and vividly expands the historical backdrop against which these hundred men and women lived their lives.' From the Foreword, by DAVID OLUSOGA 'I am delighted to see the relaunch of 100 Great Black Britons. For too long the contribution of Britons of African and Caribbean heritage have been underestimated, undervalued and overlooked' SADIQ KHAN, Mayor of London Patrick Vernon's landmark 100 Great Black Britons campaign of 2003 was one of the most successful movements to focus on the role of people of African and Caribbean descent in British history. Frustrated by the widespread and continuing exclusion of the Black British community from the mainstream popular conception of 'Britishness', despite Black people having lived in Britain for over a thousand years, Vernon set up a public poll in which anyone could vote for the Black Briton they most admired. The response to this campaign was incredible. As a result, a number of Black historical figures were included on the national school curriculum and had statues and memorials erected and blue plaques put up in their honour. Mary Seacole was adopted by the Royal College of Nursing and was given the same status as Florence Nightingale. Children and young people were finally being encouraged to feel pride in their history and a sense of belonging in Britain. Now, with this book, Vernon and Osborne have relaunched the campaign with an updated list of names and accompanying portraits -- including new role models and previously little-known historical figures. Each entry explores in depth the individual's contribution to British history - a contribution that too often has been either overlooked or dismissed. In the wake of the 2018 Windrush scandal, and against the backdrop of Brexit, the rise of right-wing populism and the continuing inequality faced by Black communities across the UK, the need for this campaign is greater than ever.

black history in britain: The Memory of Colonialism in Britain and France Itay Lotem, 2021-03-12 This book explores national attitudes to remembering colonialism in Britain and France. By comparing these two former colonial powers, the author tells two distinct stories about coming to terms with the legacies of colonialism, the role of silence and the breaking thereof. Examining memory through the stories of people who incited public conversation on colonialism: activists; politicians; journalists; and professional historians, this book argues that these actors mobilised the colonial past to make sense of national identity, race and belonging in the present. In focusing on memory as an ongoing, politicised public debate, the book examines the afterlife of colonial history as an element of political and social discourse that depends on actors' goals and priorities. A thought-provoking and powerful read that explores the divisive legacies of colonialism through oral history, this book will appeal to those researching imperialism, collective memory and cultural identity.

black history in britain: Race, Sexuality and Identity in Britain and Jamaica Gemma Romain, 2017-09-07 This is the first biography of the extraordinary, but ordinary life of, Patrick Nelson. His experiences touched on some of the most important and intriguing historical themes of the twentieth century. He was a black migrant to interwar Britain; an aristocrat's valet in rural Wales; a Black queer man in 1930s London; an artist's model; a law student, a recruit to the Auxiliary Military Pioneer Corps and Prisoner of War during the Second World War. Through his return to Jamaica after the war and his re-migrations to London in the late 1940s and the early 1960s, he was also witness to post-war Jamaican struggles and the independence movement as well as the development of London's post-war multi-ethnic migrations. Drawing on a range of archival

materials including letters sent to individuals such as Bloomsbury group artist Duncan Grant (his former boyfriend and life-long friend), as well as paintings and newspaper articles, Gemma Romain explores the intersections of these diverse aspects of Nelson's life and demonstrates how such marginalized histories shed light on our understanding of broader historical themes such as Black LGBTQ history, Black British history in relation to the London artworld, the history of the Second World War, and histories of racism, colonialism and empire.
