This Jack Minor cigar box imitates a log house, not the typical venue for cigar makers who made plane wooden boxes for their cigar brands. Since the log house box is labelled Jack Miner, one presumes it was made in Canada because Jack Miner, from southwestern Ontario, was world-renowned as a Canadian conservationist banding thousands of migratory geese during his life. Acquired after Volume III of this four-volume series had gone to the printer, this rare cigar box is now displayed on the back cover of Volume III. Made, 1925, by B. R. Hahn, a member of the Isaak Walton League, Bay City, Michigan, this cigar maker wished to salute this Canadian with a custom-made cigar box. There are some 200 Isaak Walton League (see Volume II, page 81) Chapters across the U.S.A.

bill nye health: American Political Humor Jody C. Baumgartner, 2019-10-07 This two-volume set surveys the profound impact of political humor and satire on American culture and politics over the years, paying special attention to the explosion of political humor in today's wide-ranging and turbulent media environment. Historically, there has been a tendency to regard political satire and humor as a sideshow to the wider world of American politics—entertaining and sometimes insightful, but ultimately only of modest interest to students and others surveying the trajectory of American politics and culture. This set documents just how mistaken that assumption is. By examining political humor and satire throughout US history, these volumes not only illustrate how expressions of political satire and humor reflect changes in American attitudes about presidents, parties, and issues but also how satirists, comedians, cartoonists, and filmmakers have helped to shape popular attitudes about landmark historical events, major American institutions and movements, and the nation's political leaders and cultural giants. Finally, this work examines how today's brand of political humor may be more influential than ever before in shaping American attitudes about the nation in which we live.
