bill nye accusations: Hollywood Hates Hitler! Chris Yogerst, 2020-08-25 In September 1941, a handful of isolationist senators set out to tarnish Hollywood for warmongering. The United States was largely divided on the possibility of entering the European War, yet the immigrant moguls in Hollywood were acutely aware of the conditions in Europe. After Kristallnacht (the Night of Broken Glass), the gloves came off. Warner Bros. released the first directly anti-Nazi film in 1939 with *Confessions of a Nazi Spy*. Other studios followed with such films as *The Mortal Storm* (MGM), *Man Hunt* (Fox), *The Man I Married* (Fox), and *The Great Dictator* (United Artists). While these films represented a small percentage of Hollywood's output, senators took aim at the Jews in Hollywood who were supposedly "agitating us for war" and launched an investigation that resulted in Senate Resolution 152. The resolution was aimed at both radio and movies that "have been extensively used for propaganda purposes designed to influence the public mind in the direction of participation in the European War." When the Senate approved a subcommittee to investigate the intentions of these films, studio bosses were ready and willing to stand up against the government to defend their beloved industry. What followed was a complete embarrassment of the United States Senate and a large victory for Hollywood as well as freedom of speech. Many works of American film history only skim the surface of the 1941 investigation of Hollywood. In *Hollywood Hates Hitler! Jew-Baiting, Anti-Nazism, and the Senate Investigation into Warmongering in Motion Pictures*, author Chris Yogerst examines the years leading up to and through the Senate Investigation into Motion Picture War Propaganda, detailing the isolationist senators' relationship with the America First movement. Through his use of primary documents and lengthy congressional records, Yogerst paints a picture of the investigation's daily events both on Capitol Hill and in the national press.

bill nye accusations: The Troubled Rhetoric and Communication of Climate Change Philip Eubanks, 2015-05-15 Despite an overwhelming scientific consensus, climate change remains one of the most controversial issues of our time. Focusing on the rhetoric that surrounds the issue of

climate change, this groundbreaking book analyses why the debate continues to rage and examines how we should argue when winning the argument really matters. Going beyond routine condemnations of the wildest statements made by religious fundamentalists or spokespeople for fossil fuel interests, the book explains the mutually exacerbating problems that permit many of us greet catastrophic predictions with an equivocal shrug. It argues that the argumentative situation around climate change makes a certain kind of skepticism – fair-minded skepticism – not only possible but likely. The book also strikes a hopeful note, reminding us that people do change their minds in response to effective argumentation that appeals to deeply shared values. Offering new insight into an ongoing academic discussion about the nature of argument and how it can be undertaken more effectively and ethically, as well as a new perspective on the rhetoric of science and technology, this book will be a valuable resource to students and scholars of climate change, environmental humanities, rhetoric, environmental communication, sociology and science and technology studies.

bill nye accusations: Red Dynamite Carl R. Weinberg, 2021-10-15 In Red Dynamite, Carl R. Weinberg argues that creationism's tenacious hold on American public life depended on culture-war politics inextricably embedded in religion. Many Christian conservatives were convinced that evolutionary thought promoted immoral and even bestial social, sexual, and political behavior. The fruits of subscribing to Darwinism were, in their minds, a dangerous rearrangement of God-given standards and the unsettling of traditional hierarchies of power. Despite claiming to focus exclusively on science and religion, creationists were practicing politics. Their anticommunist campaign, often infused with conspiracy theory, gained power from the fact that the Marxist founders, the early Bolshevik leaders, and their American allies were staunch evolutionists. Using the Scopes Monkey Trial as a starting point, Red Dynamite traces the politically explosive union of Darwinism and communism over the next century. Across those years, social evolution was the primary target of creationists, and their ideas have consequences strategy instilled fear that shaped the contours of America's culture wars. By taking the anticommunist arguments of creationists seriously, Weinberg reveals a neglected dimension of antievolutionism and illuminates a source of the creationist movement's continuing strength. bill nye accusations: Storytelling the Bible at the Creation Museum, Ark Encounter, and Museum of the Bible Paul Thomas, 2020-04-16 Paul Thomas chronicles a multi-level reception study of the Bible at both the Creation Museum and the Ark Encounter in Kentucky, USA. Thomas explores the commercial presentation of biblical narratives and the reception of those narratives by

the patrons of each attraction, focusing upon three topics; what do young Creationists believe, how they interpret their beliefs from the Bible, and what is the user experience at the museums? The volume begins by explaining how Answers in Genesis (AiG) use Bible passages to support young-Earth creationist arguments, allowing for the chance to consider the Bible via physical means. Thomas then examines how the Creation Museum and the Ark Encounter visitors receive the Bible (as presented by AiG) and how this presentation informs visitors' understanding of the text, exploring concepts such as the most prominent displays of the two attractions, the larger context of museums and theme parks and the case studies of the Methuselah display and The Noah Interview. He concludes with the summary of the user experience generated by the attractions, analyzing the degree to which patrons accept, negotiate, or resist the interpretation of the Bible offered by AiG.

bill nye accusations: Science V. Story Emma Frances Bloomfield, 2024-02-27 Uncovering common threads across types of science skepticism to show why these controversial narratives stick and how we can more effectively counter them through storytelling *Science v. Story* analyzes four scientific controversies—climate change, evolution, vaccination, and COVID-19—through the lens of storytelling. Instead of viewing stories as adversaries to scientific practices, Emma Frances Bloomfield demonstrates how storytelling is integral to science communication. Drawing from narrative theory and rhetorical studies, *Science v. Story* examines scientific stories and rival stories, including disingenuous rival stories that undermine scientific conclusions and productive rival stories that work to make science more inclusive. *Science v. Story* offers two tools to evaluate and build stories: narrative webs and narrative constellations. These visual mapping tools chart the features of a story (i.e., characters, action, sequence, scope, storyteller, and content) to locate opportunities for audience engagement. Bloomfield ultimately argues that we can strengthen science communication by incorporating storytelling in critical ways that are attentive to audience and context.

bill nye accusations: *The Way We Really Were* Roger W. Lotchin, 2000 The customary picture of the World War II era in California has been dominated by accounts of the Japanese American concentration camps, African Americans, and women on the home front. *The Way We Really Were* substantially enlivens this view, addressing topics that have been neglected or incompletely treated in the past to create a more rounded picture of the wartime situation at home. Exploring the developments brought to fruition by the war and linking them to their roots in earlier decades, contributors address the diversity of the musical scene, which arose from a cross-pollination of styles brought by Okies, blacks, and Mexican migrants. They examine increased political involvement by women, Hollywood's response to the war, and the merging of business and labor interests in the Bay Area Council. They also reveal how wartime dynamics led to substantial environmental damage and lasting economic gains by industry. *The Way We Really Were* examines significant wartime changes in the circumstances of immigrant groups that have been largely overlooked by historians. Among these are Italian Americans, heavily insular and pro-Fascist before the war and very pro-American and assimilationist after, and Chinese American men, who achieved new legitimacy and entitlement through military service. Also included is a look at cultural negotiation among multiple ethnic groups in the Golden State. A valuable addition to the literature on California history, *The War We Really Were* provides an entree into new areas of scholarship and a fresh look at familiar ones.
