black people from britain history: Black People in the British Empire Peter Fryer, 1993

black people from britain history: Liberating the National History Curriculum Josna Pankhania, 2017-11-01 Once there were bards who sang the songs which kept the listeners in touch with their past. They reminded them of the heroes who once walked among them and whose legacy provided a sense of shared greatness and national identity. Later, the bards became historians and history teachers and English history became a glorious roll call of those who had gone out and created an Empire and, at the same time, spread education and enlightenment. But recent doubts have raised questions about partiality and perhaps there were losses suffered by the Empire's people. Perhaps their heritage should be our heritage and therefore a fit subject for history to deal with. Originally published in 1994, this book argues that the curriculum can be legitimately used to teach students the history of oppressed groups. It is important to note that Pankhania manages to do this, not in a divisive spirit but with the intent to seek unity for the future by understanding and accepting the positive and negative aspects of a collective past.

black people from britain history: Anti-Black Racism in Early Modern English Drama Matthieu Chapman, 2016-11-03 This is the first book to deploy the methods and ensemble of questions from Afro-pessimism to engage and interrogate the methods of Early Modern English studies. Using contemporary Afro-pessimist theories to provide a foundation for structural analyses of race in the Early Modern Period, it engages the arguments for race as a fluid construction of human identity by addressing how race in Early Modern England functioned not only as a marker of human identity, but also as an a priori constituent of human subjectivity. Chapman argues that Blackness is the marker of social death that allows for constructions of human identity to become transmutable based on the impossibility of recognition and incorporation for Blackness into humanity. Using dramatic texts such as *Othello*, *Titus Andronicus*, and other Early Modern English plays both popular and lesser known, the book shifts the binary away from the currently accepted standard of white/non-white that defines otherness in the period and examines race in Early Modern England from the prospective of a non-black/black antagonism. The volume corrects the Afro-pessimist assumption that the Triangle Slave Trade caused a rupture between Blackness and humanity. By locating notions of Black inhumanity in England prior to chattel slavery, the book positions the Triangle Trade as a result of, rather than the cause of, Black inhumanity. It also challenges the common scholarly assumption that all varying types of human identity in Early Modern England were equally fluid by arguing that Blackness functioned as an immutable constant. Through the use of structural analysis, this volume works to simplify and demystify notions of race in Renaissance England by arguing that race is not only a marker of human identity, but a structural antagonism between those engaged in human civil society opposed to those who are socially dead. It will be an essential volume for those with interest in Renaissance Literature and Culture, Shakespeare, Contemporary Performance Theory, Black Studies, and Ethnic Studies.

black people from britain history: *Stick to the Skin* Celeste-Marie Bernier, 2019-01-08 The first comparative history of African American and Black British artists, artworks, and art movements, *Stick to the Skin* traces the lives and works of over fifty painters, photographers, sculptors, and mixed-media, assemblage, installation, video, and performance artists working in the United States and Britain from 1965 to 2015. black people from britain history: *Inequality and Flourishing* Mariama Ifode- Blease, 2022-06-30 It is no surprise that Christians have long been involved in education - the quest for human flourishing and wholeness is at the heart of the gospel, and education is critical to that quest. Good education has the power to transform our relationships with ourselves, with each other, with and within communities and ultimately between nation states. But what is surprising is our theological silence in the face of the deep injustices which lie at the heart of our education system. In *Inequality and Flourishing*, Mariama Ifode-Blease explores and exposes these inequalities, and calls for a greater remembrance of the bountiful and daunting gift of stewardship we have as we educate young people. Drawing on interviews, she offers a fresh vision of education as being about giving children the best tools to be stewards of their minds and bodies, our communities and ultimately our planet.

black people from britain history: *Social Change in the History of British Education* Joyce Goodman, Gary McCulloch, WILLIAM RICHARDSON, 2013-09-13 This work provides an overall review and analysis of the history of education and of its key research priorities in the British context. It investigates the extent to which education has contributed historically to social change in Britain, how it has itself been moulded by society, and the needs and opportunities that remain for further research in this general area. Contributors review the strengths and limitations of the historical literature on social change in British education over the past forty years, ascertain what this literature tells us about the relationship between education and social change, and map areas and themes for future historical research. They consider both formal and informal education, different levels and stages of the education system, the process and experience of education, and regional and national perspectives. They also engage with broader discussions about theory and methodology. The collection covers a large amount of historical territory, from the sixteenth century to the present, including the emergence of the learned professions, the relationship between society and the economy, the role of higher technological education, the historical experiences of Ireland, Scotland and Wales, the social significance of teaching and learning, and the importance of social class, gender, ethnicity, and disability. It involves personal biography no less than broad national and international movements in its considerations. This book will be a major contribution to research as well as a general resource in the history and historiography of education in Britain.

black people from britain history: Born in Crisis and Shaped by Controversy John R. Tyson, 2022-07-29 Methodism was Born in Crisis. It was a religious response to political polarization, ecclesiastical lethargy, classism and privilege, wage slavery and economic disparity, as well as to prejudice, inequality, and exclusion based on gender and race. Among the crises that convulsed Georgian England were: 1) the debilitating effects of the political use of religious authority; 2) the challenges of keeping faith in an age of science and reason; 3) the decline of "main line" religion; 4) the painful and oppressive impact of class privilege; 5) the inequities caused by dramatic economic disparity; 6) the hopelessness of wage slavery; 7) the devaluing and structural exclusion of women; 8) racial prejudice, and the systematic oppression non-white people; 9) the social crisis caused by religious prejudice; and 10) the debilitating effects of popular culture and its pastimes. The current volume traces how each of these historic crises drew from the early Methodists theological, spiritual, moral, and organizational impulses that became part of their spiritual DNA and left them with family traits that have come down to us in this very day. In a subsequent volume, Shaped by Controversy, eight of the main internal struggles that caused familial strife within the Methodist tradition will be examined and assessed. Taken together, these volumes are like a "distant mirror" with which Methodists and other modern Christians might take a good look at themselves. As such this is an invitation to hope anew and for Methodists as well as Christians of all backgrounds to consider who they are and what they intend be for Jesus Christ in the world.
