Do you know that you can Overcome Your Traumatic Stress Easily? FACING TRAUMA I don't know what you know about trauma, but I do know that this book is about to deepen your understanding and give you the enlightenment of Archimedes when he hopped out of his tub butt naked and into the streets screaming Eureka! The author, Dr. Bessel Van Der Kolk, lets us know in this book that trauma doesn't only happen to a specific group of people. It isn't limited to a particular area. It happens everywhere around us: to combat soldiers, to our friends and family, and maybe even to you. Did you know that if there are five people in a room one of them was sexually molested as a child? It would be an outrageous claim to make if it weren't backed up by research done by the Centre for Disease Control and Prevention which revealed that: one in five Americans was sexually molested as a child; one in four was beaten by a parent to the point of a mark being left on their body; and one in three couples engages in physical violence. A quarter of us grew up with alcoholic relatives, and one out of eight people have witnessed their mother being beaten or hit. These are trauma facts, the ones we know of in America. Who knows the values in other continents? Trauma has always existed throughout time, through wars, plagues and famine, leaving traces of its effect everywhere: in our histories and cultures, in our minds and emotions, on our bodies, on our ability to feel love and joy, on our ability to be intimate. As humans we are resilient, continuing to move through time and evolution no matter the event or struggle. But the effects of trauma are not just suffered by those who go through traumatic events, it spreads: to friends and family, especially to family. No one wants to hear their sister got raped. Trauma is an often denied phenomenon; most people will like to believe that they have no first-hand traumatic experience, neither do they want to see it plaguing their friends and families. However, trauma is not a reality of some faraway land or previous wars, it is alive and well around us. Trauma plagues the average person in seemingly calm environments as it plagues refugees and soldiers from war torn states. body keeps the score workbook: *Workbook -- the Body Keeps the Score : Brain, Mind, and Body in the Healing of Trauma* Liam Daniels, 2023 To many people, trauma is something that happens to soldiers and refugees, far away and out of sight. But in fact, trauma is the single greatest threat to public health and well-being that America has ever seen. As humans, we are exposed to a horde of trauma, from physical, sexual, and emotional abuse, to neglect, accidents, and the list can go on and on. And while the naked eye can see the immediate effects of that trauma, it is usually the long-term trauma we carry that bogs us down and infects every aspect of our lives, whether we are aware of it or not. Workbook: The Body Keeps the Score not only does it provide all of van der Kolk's teachings about trauma in a clear, comprehensive, and condensed manner-without missing anything important!-but it also allows you to delve deeper into the book's concepts and explore your own personal journey with trauma while prompting you to take action to create a lasting impact. In Workbook: The Body Keeps the Score, among other things, you will get: The messages in this book contain information for everyone. As van der Kolk says, for the fight against trauma to be successful, it needs to be a collective effort. Don't miss out on the wisdom and awareness this book offers. Let's all work toward creating a trauma-free generation. Disclaimer: This is an unofficial, third-party workbook for Bessel van der Kolk's The Body Keeps the Score.
