behind the net series vk: *Computers and Society* Ronald M. Baecker, 2019-04-24 The last century has seen enormous leaps in the development of digital technologies, and most aspects of modern life have changed significantly with their widespread availability and use. Technology at various scales - supercomputers, corporate networks, desktop and laptop computers, the internet, tablets, mobile phones, and processors that are hidden in everyday devices and are so small you can barely see them with the naked eye - all pervade our world in a major way. *Computers and Society: Modern Perspectives* is a wide-ranging and comprehensive textbook that critically assesses the global technical achievements in digital technologies and how they are applied in media; education and learning; medicine and health; free speech, democracy, and government; and war and peace. Ronald M. Baecker reviews critical ethical issues raised by computers, such as digital inclusion, security, safety, privacy, automation, and work, and discusses social, political, and ethical controversies and choices now faced by society. Particular attention is paid to new and exciting developments in artificial intelligence and machine learning, and the issues that have arisen from our complex relationship with AI.

behind the net series vk: *The Donbas Conflict in Ukraine* Daria Platonova, 2021-09-28 This book examines why, when the conflict in eastern Ukraine began in 2014, fighting broke out in the Donetsk region, whereas it did not in Kharkiv city, despite the city, like the Donetsk region, being geographically proximate to Russia and similar in ethnic and linguistic make up. Based on extensive original research, the book argues that a key factor was the nature and behaviour of local elites, with those in Kharkiv having diffuse ties to the centre and therefore being more capable of adapting to sudden, profound regime change at the centre, whereas the elites in the Donetsk region had much more concentrated ties to the centre, were dependent on one network, and therefore were much less able to cope with change. The book thereby demonstrates how crucial for Ukraine are patronal politics, patronage networks, and informal centre-region relations, and that it was these local political circumstances, rather than Russia, which brought about the conflict.

Zeff, 2020-09-01 This book, first published in 1982, gathers together a series of articles and editorials written in response to the Accounting Research Program of the early 1960s. Accounting Research Study No. 1 and No. 3 sprang from the American Institute of Certified Public Accountants' desire to keep up with 'economic and social changes which affect accounting' and the research studies into 'postulates' and 'principles' proved to be controversial. These articles analyse the findings and provide vital historical insight into the profession of the time, and its further development.

behind the net series vk: *Pandemic Cities* Scott Baum, Emma Baker, Amanda Davies, John Stone, Elizabeth Taylor, 2022-09-26 This book highlights the impact of the COVID-19 pandemic on cities. The COVID-19 pandemic and the associated economic and social impacts have been felt around the world. In large cities and other urban areas, the pandemic has highlighted a number of issues from pressures on urban labour and housing markets, shifts in demographic processes

including migration and mobility, changes in urban travel patterns and pressures on contemporary planning and governance processes. Despite Australia's relatively mild COVID exposure, Australian cities and large urban areas have not been immune to these issues. The economic shutdown of the country in the early stages of the pandemic, the sporadic border closures between states, the effective closure of international borders and the imposition of widespread public health orders that have required significant behavioural change across the population have all changed our cities in some and the way we live and work in them in some way. Some of the challenges have reflected long-standing problems including entrenched inequality in labour markets and housing markets, others such as the impact on commuting patterns and patterns of migration have emerged largely during the pandemic. This book, co-authored by experts in their field, outlines some of the major issues facing Australian cities and urban areas as a result of the pandemic and sets a course for future of the cities we live in.

behind the net series vk: Human Development in Bihar, India Utsav Kumar Singh, 2022-08-24 This book introduces the issues of the contemporary state of Bihar, India, in terms of its performance on the Millennium Development Goals (MDGs) indicators and the initiatives taken by the central and state governments towards realizing human development. Doing so, it draws upon the mistakes committed in the past and moves ahead towards a better future with the idea of sustainable human development. The book also presents a comprehensive evaluation of the background and indicators of the human development index, and it analyses the impact of COVID-19 on India in general and on Bihar in particular. India is a nation of unbalanced states in terms of development. In spite of all the development initiatives, India still contains states that have not conformed to the breakthrough claimed by the nation, and the state of Bihar falls under this category. Bihar has emerged as the worst performer in human development, based on the ranking of the Human Development Index 2020. Nevertheless, Bihar has the potential for overall development to achieve its glorious past once again, by various pro-poor policies implemented by the government of Bihar in the last two decades, which is critically analysed in detail.

behind the net series vk: Global Law, Human Rights, and Intersections With Honor Killing Dhamija, Somesh, Yadav, Tarun Pratap, Lee, Jae-Seung, Singh, Harshita, Roh, Myunghoon, 2024-12-02 Global law and human rights play a crucial role in addressing the complex issue of honor killings, which violate fundamental principles of dignity and equality. As a presentation of entrenched patriarchal norms, honor killings challenge human rights frameworks established by global laws and practices. The intersection of global law and local customs presents significant challenges, as cultural practices are often utilized to justify these acts. Recognition of the need for legal reform and advocacy is necessary to better understand the systemic issues at play and work toward effective solutions that protect vulnerable individuals and promote social change. Global Law, Human Rights, and Intersections With Honor Killing explores the effects of global law and human rights advocacy on the issue of honor killing. Various laws and social movements against the practice of honor killing are examined, as well as the impact of new policies on honor killing mitigation and violence prevention. This book covers topics such as immigration, multiculturalism, and patriarchy, and is a useful resource for policymakers, government officials, civil rights organizations, psychologists, media professionals, gender scientists, academicians, and researchers.
