bluford middle grade books: Resources for Teaching Middle School Science Smithsonian Institution, National Academy of Engineering, National Science Resources Center of the National Academy of Sciences, Institute of Medicine, 1998-04-30 With age-appropriate, inquiry-centered curriculum materials and sound teaching practices, middle school science can capture the interest and energy of adolescent students and expand their understanding of the world around them. Resources for Teaching Middle School Science, developed by the National Science Resources Center (NSRC), is a valuable tool for identifying and selecting effective science curriculum materials that will engage students in grades 6 through 8. The volume describes more than 400 curriculum titles that are aligned with the National Science Education Standards. This completely new guide follows on the success of Resources for Teaching Elementary School Science, the first in the NSRC series of annotated guides to hands-on, inquiry-centered curriculum materials and other resources for science teachers. The curriculum materials in the new guide are grouped in five chapters by scientific area—Physical Science, Life Science, Environmental Science, Earth and Space Science, and Multidisciplinary and Applied Science. They are also grouped by type—core materials, supplementary units, and science activity books. Each annotation of curriculum material includes a recommended grade level, a description of the activities involved and of what students can be expected to learn, a list of accompanying materials, a reading level, and ordering information. The curriculum materials included in this book were selected by panels of teachers and scientists using evaluation criteria developed for the guide. The criteria reflect and incorporate goals and principles of the National Science Education Standards. The annotations designate the specific content standards on which these curriculum pieces focus. In addition to the curriculum chapters, the guide contains six chapters of diverse resources that are directly relevant to middle school science. Among these is a chapter on educational software and multimedia programs, chapters on books about science and teaching, directories and guides to science trade books, and periodicals for teachers and students. Another section features institutional resources. One chapter lists about 600 science centers, museums, and zoos where teachers can take middle school students for interactive science experiences. Another chapter describes nearly 140 professional associations and U.S. government agencies that offer resources and assistance. Authoritative, extensive, and thoroughly indexed—and the only guide of its kind—Resources for Teaching Middle School Science will be the most used book on the shelf for science teachers, school administrators, teacher trainers, science curriculum specialists, advocates of hands-on science teaching, and concerned parents.

bluford middle grade books: Multicultural and Ethnic Children's Literature in the United States Donna L. Gilton, 2020-02-18 This edition of *Multicultural and Ethnic Children's Literature in the United States* addresses both quantitative and more qualitative changes in this field over the last decade. Quantitative changes include more authors, books, and publishers; book review sources, booklists, and awards; organizations, institutions, and websites; and criticism and other scholarship. Qualitative changes include: More support for new and emerging writers and illustrators; Promotion of multicultural literature both in the U.S. and around the world, as well as developments in global literature; Developments in the literatures described throughout this book, as well as in research supporting this literature; The impact of technology; Characteristics and activities of four adult audiences that use and promote multicultural children's literature, and Changes in leaders and their organizations. This is still a single reference source for busy and involved librarians, teachers, parents, scholars, publishers, distributors, and community leaders. Most books on multicultural children's literature are written especially for teachers, librarians, and scholars. They may be introductions to the literature, selection tools, teaching guides, or very theoretical books on choosing, evaluating, and using these materials. *Multicultural and Ethnic Children's Literature in the United States* focuses much more on the history of the development of this literature, from the nineteenth century to the present day. This book provides much more of a cultural and political context for the early development of this literature. It emphasizes the "self-determining" viewpoints and activities of diverse people as they produce materials for the young. *Multicultural and Ethnic Children's Literature...* describes organizations, events, activities, and other contributions of diverse writers, illustrators, publishers, researchers, scholars, librarians, educators, and parents. It also describes trends in the research on the literature. It elaborates more on ways in which diversity is still an issue in publishing companies and an extended list of related industries. It describes related literature from outside of the U.S. and makes connections to traditional global literature. Last, *Multicultural and Ethnic Children's Literature*, shows the impact of multiculturalism on education, libraries, and the mainstream culture, in general. While the other books on multiculturalism focus on how to find, evaluate, and use multicultural materials, especially in schools and libraries, this book is concerned over whether and how books are produced in the first place and how this material impact the broader society. In many ways, it supplements other books on multicultural children's literature.

bluford middle grade books: Supporting Reading in Grades 6-12 Sybil M. Farwell, Nancy L. Teger, 2012-06-11 This book presents a curricular framework for students grades 6-12 that school librarians and teachers can use collaboratively to enhance reading skill development, promote literature appreciation, and motivate young people to incorporate reading into their lives, beyond the required schoolwork. *Supporting Reading Grades 6-12: A Guide* addresses head-on the disturbing trend of declining leisure reading among students and demonstrates how school librarians can contribute to the development of lifelong reading habits as well as improve students' motivation and test scores. The book provides a comprehensive framework for achieving this: the READS curriculum, which stands for Read as a personal activity; Explore characteristics, history, and awards of creative works; Analyze structure and aesthetic features of creative works; Develop a literary-based product; and Score reading progress. Each of these five components is explained thoroughly, describing how school librarians can encourage students to read as individuals, in groups, and as school communities; support classroom teachers' instruction; and connect students to today's constantly evolving technologies. Used in combination with an inquiry/information-skills model, the READS curriculum enables school librarians to deliver a dynamic, balanced library program that addresses AASL's Standards for the 21st-Century Learner.

bluford middle grade books: *Constructing the Self in a Digital World* Cynthia Carter Ching, Brian J. Foley, 2012-09-10 It has become popular in recent years to talk about 'identity' as an aspect of engagement with technology - in virtual environments, in games, in social media and in our increasingly digital world. But what do we mean by identity and how do our theories and assumptions about identity affect the kinds of questions we ask about its relationship to technology and learning? *Constructing the Self in a Digital World* takes up this question explicitly, bringing together authors working from different models of identity but all examining the role of technology in the learning and lives of children and youth.

bluford middle grade books: *Lucile H. Bluford and the Kansas City Call* Sheila Brooks, Clint C. Wilson II, 2018-04-04 This book on publisher and editor Lucile H. Bluford examines her journalistic writings on social, economic, and political issues; her strong opinionated views on African Americans and women; and whether there were consistent themes, biases, and assumptions in her stories that may have influenced news coverage in the *Kansas City Call*. It traces the beginnings of her activism as a young reporter seeking admission to the graduate program in journalism at the University of Missouri and how her admissions rejection became the catalyst for her seven-decade career as a champion of racial and gender equality. Bluford's work at the *Kansas City Call* demonstrates how critical theorists used storytelling to describe personal experiences of struggle and oppression to inform the public of racial and gender consciousness. Lucile H. Bluford and the *Kansas City Call* illustrates how she used her social authority in the formidable power base of the weekly Black newspaper she owned, shaping and mobilizing a broader movement in the fight for freedom and social justice. This book focuses on a selection of Bluford's news stories and editorials from 1968 to 1983 as examples of how she articulated a Black feminist standpoint advocating a Black liberation agenda—equal access to decent jobs, affordable health care and housing, and a better education in Kansas City, Missouri. Bluford's writings represented what the mainstream news ignored, exposing injustices and inequalities in the African American community and among feminists.
