

behind the net internet archive

behind the net internet archive is a valuable resource that preserves and provides access to a vast collection of digital content related to hockey statistics, historical data, and player information. This archive serves as a crucial tool for researchers, fans, and sports analysts seeking comprehensive details about hockey games, player performances, and historical trends. The internet archive's extensive database ensures that rare and significant hockey moments are preserved and accessible to future generations. In this article, we will explore the origins and significance of the behind the net internet archive, its features and offerings, and how users can effectively utilize it for their research or interest in hockey history. Additionally, the article will cover the technical aspects of the archive and its role in preserving sports data digitally.

Understanding Behind the Net Internet Archive

The behind the net internet archive is an online repository dedicated to storing and providing access to a comprehensive collection of hockey-related data. It builds upon the original Behind the Net website, which was established to offer in-depth statistics, game logs, and player profiles for hockey enthusiasts. The archive preserves historical snapshots, ensuring that data from previous seasons and defunct web pages remain accessible despite changes or removal from the primary sites.

Origins and Development

The archive originated as a response to the need for preserving the vast amount of hockey data available on the internet that was at risk of being lost over time. Behind the Net initially offered detailed statistics on NHL players, international competitions, and minor leagues. As the website evolved and data formats changed, the internet archive version emerged to safeguard this data against obsolescence.

Scope of Content

The behind the net internet archive encompasses a wide array of hockey information, including:

- Player career statistics and biographical data

- Game-by-game performance logs
- Team rosters and season summaries
- Historical records from various hockey leagues worldwide
- International tournament results and player participation

Features and Offerings of the Archive

The behind the net internet archive offers several notable features that enhance its usability and value for hockey research and analysis. These features make it an indispensable tool for anyone interested in the sport's detailed statistical history.

Comprehensive Data Access

The archive provides access to detailed, player-specific and game-specific data that is often difficult to find elsewhere. This comprehensive data allows users to analyze performance trends and compare players across different eras and leagues.

Search and Navigation Capabilities

Users can navigate the archive through various search functions, allowing for filtering by player name, team, season, or league. The intuitive interface facilitates quick access to relevant data without requiring extensive prior knowledge of database structures.

Historical Snapshots and Versioning

One of the archive's key offerings is the ability to view historical versions of the Behind the Net website. This feature allows researchers to compare data over time and understand how statistical reporting has evolved.

Using the Behind the Net Internet Archive

Effectively utilizing the behind the net internet archive requires understanding its structure and the types of queries that yield the most relevant results. This section outlines best practices and tips for maximizing the archive's potential.

Accessing Player Statistics and Profiles

To access player data, users can enter the player's name into the search bar or browse alphabetically through player lists. The profiles typically include career statistics, game logs, and sometimes biographical information such as birthplace and draft details.

Researching Game Logs and Team Data

The archive allows users to locate detailed game logs that show player performance on a game-by-game basis. Additionally, team rosters and season summaries provide context for understanding individual performances within team dynamics.

Exporting and Using Data

For researchers and analysts, the ability to export data from the archive is crucial. While the archive primarily offers viewing capabilities, users can manually compile data for use in statistical software or sports analytics platforms.

Tips for Efficient Use

- Use specific keywords or player names to narrow search results.
- Leverage season and league filters to target relevant datasets.
- Cross-reference data with other hockey databases for validation.
- Utilize historical snapshots to identify changes or corrections in data over time.

The Importance of Digital Preservation in Sports

Digital preservation, as exemplified by the behind the net internet archive, plays a critical role in maintaining the integrity and accessibility of sports data. This preservation ensures that valuable historical records are not lost due to website closures or technological changes.

Challenges in Sports Data Preservation

Sports data faces challenges such as changing formats, server shutdowns, and data loss from website updates. Archives like behind the net help mitigate these issues by capturing and storing data snapshots.

Benefits for Researchers and Fans

Maintaining a digital archive allows historians, statisticians, and fans to explore the evolution of hockey, compare players across eras, and conduct in-depth analyses that contribute to the sport's cultural and historical knowledge.

Future of Sports Archives

As technology advances, the role of digital archives will expand to include multimedia content, interactive analytics, and integration with emerging technologies such as AI-driven data visualization, enhancing the way sports history is experienced.

Technical Aspects of the Behind the Net Archive

The behind the net internet archive relies on sophisticated web archiving technologies to capture, store, and serve historical hockey data to users worldwide. Understanding these technical components provides insight into the archive's reliability and longevity.

Web Crawling and Data Capture

The archive employs web crawlers that systematically browse and capture snapshots of the Behind the Net website at various points in time. This process preserves the website's content, structure, and data.

Data Storage and Management

Captured data is stored in secure, scalable databases that allow efficient retrieval. Metadata tagging and indexing enhance searchability and ensure data integrity over time.

Access and User Interface

The archive presents data through a user-friendly interface designed to facilitate easy navigation and data discovery. Responsive design and search optimization contribute to a seamless user experience.

Frequently Asked Questions

What is Behind the Net Internet Archive?

Behind the Net Internet Archive is a digital repository that collects, preserves, and provides access to historical internet content, including websites, digital media, and online documents.

How can I access content on the Behind the Net Internet Archive?

behind the net internet archive: *Digital Curation Fundamentals* Jody L. DeRidder, 2018-10-15
Websites and digital news stories disappear daily; researchers can't access their own data for reuse; students don't know how to make their work last for the next 10 years. Knowledge is built on previously gathered information, but what happens when that information is no longer accessible? And where does the librarian or archivist fit into this picture? This book describes the basic steps of data curation, in clear easy-to-follow language, and clarifies the many potential roles that a librarian or archivist can play to help make our information future viable for generations to come. *Digital Curation Fundamentals* is for anyone who wants to help save knowledge for future use, but knows little-to-nothing about digital curation or how it fits with their jobs. This book is also for administrators who need to stay on top of things but don't yet have a good grasp on the purpose and scope of digital curation and how central it is to the future. Additionally, this book is a reference handbook for those who are involved in digital curation in some form but who need the context to know how their work fits into the big picture, and what comes next. This book takes a straight-forward, commonsense approach to a complex problem, and portrays the challenges and opportunities in an approachable conversational style which lowers the bar to include those with little to no technical expertise.

behind the net internet archive: *Autoethnography for Librarians and Information Scientists* Ina Fourie, 2021-06-24 *Autoethnography for Librarians and Information Scientists* illustrates that autoethnography is a rich qualitative research method that can enhance understanding of one's own work experiences, whilst also facilitating the design of tailored experiences for a variety of

audiences. Starting with the position that librarians and information scientists require deep insight into people's experiences, needs and information behaviour in order to design appropriate services and information interventions, this book shows that using only conventional methods, such as questionnaires and focus groups, is insufficient. Arguing that autoethnography can provide unique insights into users' cultural experiences and needs, contributors to this volume introduce the reader to different types of autoethnography. Highlighting common challenges and clarifying how autoethnography can be combined with other research methods, this book will empower librarians and information scientists to conceptualise topics for autoethnographic research, whilst also ensuring that they adhere to strict ethical guidelines. Chapters within the volume also demonstrate how to produce autoethnographic writing and stress the need to analyse autoethnographies produced by others. Autoethnography for Librarians and Information Scientists is essential reading for any librarian, information scientist or student looking to deepen their understanding of their own experiences. It will be particularly useful to those engaged in the study of service provision, user studies and information behaviour.

behind the net internet archive: Invisible Rulers Renee DiResta, 2024-06-11 An "essential and riveting" (Jonathan Haidt) analysis of the radical shift in the dynamics of power and influence, revealing how the machinery that powered the Big Lie works to create bespoke realities revolutionizing politics, culture, and society. Renée DiResta's powerful, original investigation into the way power and influence have been profoundly transformed reveals how a virtual rumor mill of niche propagandists increasingly shapes public opinion. While propagandists position themselves as trustworthy Davids, their reach, influence, and economics make them classic Goliaths—invisible rulers who create bespoke realities to revolutionize politics, culture, and society. Their work is driven by a simple maxim: if you make it trend, you make it true. By revealing the machinery and dynamics of the interplay between influencers, algorithms, and online crowds, DiResta vividly illustrates the way propagandists deliberately undermine belief in the fundamental legitimacy of institutions that make society work. This alternate system for shaping public opinion, unexamined until now, is rewriting the relationship between the people and their government in profound ways. It has become a force so shockingly effective that its destructive power seems limitless. Scientific proof is powerless in front of it. Democratic validity is bulldozed by it. Leaders are humiliated by it. But they need not be. With its deep insight into the power of propagandists to drive online crowds into battle—while bearing no responsibility for the consequences—Invisible Rulers not only predicts those consequences but offers ways for leaders to rapidly adapt and fight back.

behind the net internet archive: What is e-book? Nicolae Sfetcu, 2014-05-10 The e-book guide for publishers: how to publish, EPUB format, ebook readers and suppliers. An electronic book (also e-book, ebook, electronic book, digital book) is a book-length publication in digital form, consisting of text, images, or both, and produced on, published through, and readable on computers or other electronic devices. An e-book can be purchased/borrowed, downloaded, and used immediately, whereas when one buys or borrows a book, one must go to a bookshop, a home library, or public library during limited hours, or wait for a delivery. Electronic publishing or ePublishing includes the digital publication of e-books and electronic articles, and the development of digital libraries and catalogues. EPUB (short for electronic publication; alternatively capitalized as ePub, ePUB, EPub, or epub, with EPUB preferred by the vendor) is a free and open e-book standard by the International Digital Publishing Forum (IDPF). Self-publishing is the publication of any book or other media by the author of the work, without the involvement of an established third-party publisher. One of the greatest benefits brought about by ebooks software is the ability for anyone to create professional ebooks without having to fork out thousands of dollars to design and publish a book. People can easily become authors overnight and earn income from selling online ebooks.

behind the net internet archive: Net Neutrality and the Battle for the Open Internet Danny

Kimball, 2022-08-24 "Net neutrality," a dry but crucial standard of openness in network access, began as a technical principle informing obscure policy debates but became the flashpoint for an all-out political battle for the future of communications and culture. Net Neutrality and the Battle for the Open Internet is a critical cultural history of net neutrality that reveals how this intentionally "boring" world of internet infrastructure and regulation hides a fascinating and pivotal sphere of power, with lessons for communication and media scholars, activists, and anyone interested in technology and politics. While previous studies and academic discussions of net neutrality have been dominated by legal, economic, and technical perspectives, Net Neutrality and the Battle for the Open Internet offers a humanities-based critical theoretical approach, telling the story of how activists and millions of everyday people, online and in the streets, were able to challenge the power of the phone and cable corporations that historically dominated communications policy-making to advance equality and justice in media and technology.

behind the net internet archive: Creating Realities Erhan Simsek, 2019-02-20 Business is woven into the very fabric of American life, yet rarely surfaces in the nation's literary history. Even in novels about business, it proves an elusive motif that fails to mirror actual business organizations. This book argues that literary representations of business remain ineffable because business serves potential aesthetic functions, subtly yet meaningfully impacting readers. Exploring the complex representation of business in realist, naturalist and modernist works, Erhan Simsek reveals these functions by analyzing how the motif intertwines with social developments, literary movements and author biographies. He thus illuminates the motif itself while highlighting the utility of a focus on the changing functions of literature.

behind the net internet archive: #mm Net Art—Internet Art in the Virtual and Physical Space of Its Presentation Marie Meixnerová (Ed.), 2019-07-19 Color edition /// What is Net art? Does its name refer to the medium it uses? Is it the art of the Netizens, the inhabitants of the internet? Is it an art movement or an art form? This book aims to provide a starting point in the search for answers to these and similar questions concerning the existence of Net art. Edited by Marie Meixnerová, a Czech curator and scholar, #mm Net Art approaches Internet art as a developing art form, through five thematic sections that map the chronological stages of this development. Featured authors include Katarína Rusnáková, Dieter Daniels, Marie Meixnerová, Domenico Quaranta, Natalie Bookchin, Alexei Shulgin, Piotr Czerski, Brad Troemel, Artie Vierkant, Ben Vickers, Jennifer Chan, Gene McHugh, Gunther Reisinger, Matěj Strnad, Lumír Nykl. For those who know little about it, this anthology can serve as an introduction; to the expert reader, it offers new and as yet unpublished information, and hopefully a new perspective.

behind the net internet archive: News and the Net Barrie Gunter, 2015-07-16 Originally published in 2003. This book examines the growth of news provision on the internet and its implications for news presentation, journalism practice, news consumers, and the business of running news organizations. Much of the focus is placed on the migration of newspapers onto the internet, but references are also made to the establishment of news websites by other organizations. The book examines the growth of online technology as a source of information and entertainment and considers how this development can be framed within models of communication and comments, on the apparent shortage of new models to explain the use, role, effectiveness, and impact of online communications.

behind the net internet archive: Behind the Times Mary Jean Corbett, 2020-11-15 Virginia

Woolf, throughout her career as a novelist and critic, deliberately framed herself as a modern writer invested in literary tradition but not bound to its conventions; engaged with politics but not a propagandist; a woman of letters but not a lady novelist. As a result, Woolf ignored or disparaged most of the women writers of her parents' generation, leading feminist critics to position her primarily as a forward-thinking modernist who rejected a stultifying Victorian past. In *Behind the Times*, Mary Jean Corbett finds that Woolf did not dismiss this history as much as she boldly rewrote it. Exploring the connections between Woolf's immediate and extended family and the broader contexts of late-Victorian literary and political culture, Corbett emphasizes the ongoing significance of the previous generation's concerns and controversies to Woolf's considerable achievements. *Behind the Times* rereads and revises Woolf's creative works, politics, and criticism in relation to women writers including the New Woman novelist Sarah Grand, the novelist and playwright, Lucy Clifford; the novelist and anti-suffragist, Mary Augusta Ward. It explores Woolf's attitudes to late-Victorian women's philanthropy, the social purity movement, and women's suffrage. Closely tracking the ways in which Woolf both followed and departed from these predecessors, Corbett complicates Woolf's identity as a modernist, her navigation of the literary marketplace, her ambivalence about literary professionalism and the mixing of art and politics, and the emergence of feminism as a persistent concern of her work.

behind the net internet archive: Collecting and Conserving Net Art Annet Dekker, 2018-05-08 *Collecting and Conserving Net Art* explores the qualities and characteristics of net art and its influence on conservation practices. By addressing and answering some of the challenges facing net art and providing an exploration of its intersection with conservation, the book casts a new light on net art, conservation, curating and museum studies. Viewing net art as a process rather than as a fixed object, the book considers how this is influenced by and executed through other systems and users. Arguing that these processes and networks are imbued with ambiguity, the book suggests that this is strategically used to create suspense, obfuscate existing systems and disrupt power structures. The rapid obsolescence of hard and software, the existence of many net artworks within restricted platforms and the fact that artworks often act as assemblages that change or mutate, make net art a challenging case for conservation. Taking the performative and interpretive roles conservators play into account, the book demonstrates how practitioners can make more informed decisions when responding to, critically analysing or working with net art, particularly software-based processes. *Collecting and Conserving Net Art* is intended for researchers, academics and postgraduate students, especially those engaged in the study of museum studies, conservation and heritage studies, curatorial studies, digital art and art history. The book should also be interesting to professionals who are involved in the conservation and curation of digital arts, performance, media and software.

behind the net internet archive: Third Space, Information Sharing, and Participatory Design Preben Hansen, Ina Fourie, Anika Meyer, 2022-05-31 Society faces many challenges in workplaces, everyday life situations, and education contexts. Within information behavior research, there are often calls to bridge inclusiveness and for greater collaboration, with user-centered design approaches and, more specifically, participatory design practices. Collaboration and participation are essential in addressing contemporary societal challenges, designing creative information objects and processes, as well as developing spaces for learning, and information and research interventions. The intention is to improve access to information and the benefits to be gained from that. This also applies to bridging the digital divide and for embracing artificial intelligence. With regard to research and practices within information behavior, it is crucial to consider that all users should be involved. Many information activities (i.e., activities falling under the umbrella terms of information behavior and information practices) manifest through participation, and thus, methods such as participatory design may help unfold both information behavior and practices as well as the creation of information objects, new models, and theories. Information sharing is one of its core activities. For participatory design with its value set of democratic, inclusive, and open participation towards innovative practices in a diversity of contexts, it is essential to understand how information

activities such as sharing manifest itself. For information behavior studies it is essential to deepen understanding of how information sharing manifests in order to improve access to information and the use of information. Third Space is a physical, virtual, cognitive, and conceptual space where participants may negotiate, reflect, and form new knowledge and worldviews working toward creative, practical and applicable solutions, finding innovative, appropriate research methods, interpreting findings, proposing new theories, recommending next steps, and even designing solutions such as new information objects or services. Information sharing in participatory design manifests in tandem with many other information interaction activities and especially information and cognitive processing. Although there are practices of individual information sharing and information encountering, information sharing mostly relates to collaborative information behavior practices, creativity, and collective decision-making. Our purpose with this book is to enable students, researchers, and practitioners within a multi-disciplinary research field, including information studies and Human-Computer Interaction approaches, to gain a deeper understanding of how the core activity of information sharing in participatory design, in which Third Space may be a platform for information interaction, is taking place when using methods utilized in participatory design to address contemporary societal challenges. This could also apply for information behavior studies using participatory design as methodology. We elaborate interpretations of core concepts such as participatory design, Third Space, information sharing, and collaborative information behavior, before discussing participatory design methods and processes in more depth. We also touch on information behavior, information practice, and other important concepts. Third Space, information sharing, and information interaction are discussed in some detail. A framework, with Third Space as a core intersecting zone, platform, and adaptive and creative space to study information sharing and other information behavior and interactions are suggested. As a tool to envision information behavior and suggest future practices, participatory design serves as a set of methods and tools in which new interpretations of the design of information behavior studies and eventually new information objects are being initiated involving multiple stakeholders in future information landscapes. For this purpose, we argue that Third Space can be used as an intersection zone to study information sharing and other information activities, but more importantly it can serve as a Third Space Information Behavior (TSIB) study framework where participatory design methodology and processes are applied to information behavior research studies and applications such as information objects, systems, and services with recognition of the importance of situated awareness.

behind the net internet archive: The Garb of Being Georgia Frank, Susan Holman, Andrew Jacobs, 2019-11-05 This collection explores how the body became a touchstone for late antique religious practice and imagination. When we read the stories and testimonies of late ancient Christians, what different types of bodies stand before us? How do we understand the range of bodily experiences—solitary and social, private and public—that clothed ancient Christians? How can bodily experience help us explore matters of gender, religious identity, class, and ethnicity? The Garb of Being investigates these questions through stories from the Eastern Christian world of antiquity: monks and martyrs, families and congregations, and textual bodies. Contributors include S. Abrams Rebillard, T. Arentzen, S. P. Brock, R. S. Falcasantos, C. M. Furey, S. H. Griffith, R. Krawiec, B. McNary-Zak, J.-N. Mellon Saint-Laurent, C. T. Schroeder, A. P. behind the net internet archive: The Web as History Niels Brügger, Ralph Schroeder, 2017-03-06 The World Wide Web has now been in use for more than 20 years. From early browsers to today's principal source of information, entertainment and much else, the Web is an integral part of our daily lives, to the extent that some people believe 'if it's not online, it doesn't exist.' While this statement is not entirely true, it is becoming increasingly accurate, and reflects the Web's role as an indispensable treasure trove. It is curious, therefore, that historians and social scientists have thus far made little use of the Web to investigate historical patterns of culture and society, despite making good use of letters, novels, newspapers, radio and television programmes, and other pre-digital artefacts. This volume argues that now is the time to ask what we have learnt from the Web so far. The 12 chapters explore this topic from a number of interdisciplinary angles – through histories of national web spaces and case studies of different government and media domains – as well as an introduction that provides an overview of this exciting new area of research.

behind the net internet archive: Positioning Your Museum as a Critical Community Asset Robert P. Connolly, Elizabeth A. Bollwerk, 2016-11-10 In this how-to guide, practitioners at cultural heritage venues share their experiences in building sustainable relationships with their geographic and demographic communities. The volume includes practical discussions of activity types that museums can employ to build relationships with their communities including education, advocacy, co-creative, while serving as a community asset and resource. Case studies include direct application of successes and lessons learned with an emphasis on small to medium sized institutions with limited staff and budgets. Highlights include: Thematic discussions on topics such as building an advocacy network between the museum and community; developing cultural heritage institutions as critical and essential components of educational systems; museum response to community expressed needs through a co-creative approach; the varied means for developing community members as cultural heritage stakeholders; and positioning the cultural heritage institution as an integral community asset. Twenty case studies directly apply the thematic discussions in small to medium-sized museum contexts. Extensive list of resources including digital links to forms, workbooks, and guides produced in the case studies. A list of national organizations and an extensive bibliography on community museum engagement. Specifically addressed to smaller institutions with limited budgets and limited or no full-time staff, the volume includes cost-effective projects that can be completed for \$1,500 or less.
