bryan johnson longevity: The Longevity Imperative Andrew J. Scott, 2024-04-23
SHORTLISTED FOR THE FINANCIAL TIMES AND SCHRODERS BUSINESS BOOK OF THE YEAR
“A manifesto to guide the longevity revolution” (David Sinclair) for individuals, institutions, and society to adapt to the reality of living longer lives Thanks to increases in life expectancy, we can now expect to live for a long time. Most of us would welcome an extra day in the week, so why do so many of us view the prospect of additional years with fear and skepticism? The reason is simple: society is not currently structured to support long lives. Rather than thinking in terms of the needs of a rising number of older people, we must instead support the young and middle-aged to prepare differently for the longer futures they can expect. The Longevity Imperative outlines the innovations needed to make the most of these longer lives: substantial changes to our health system, economy, and financial sector, as well as in how we manage our careers, health, finances, and relationships. Instead of seeing longevity as a problem, economist Andrew J. Scott challenges us to view it as an opportunity. This book charts a course to address the individual, social, political, economic, and cultural changes required so that all of us—regardless of age—can live lives that are not just longer but healthier, happier, and more productive.

bryan johnson longevity: Online Pre-Evangelization Michael Rossmann, 2025-02-12
Christians seeking to evangelize face innumerable challenges. Many people see the “Good News” as neither good nor newsworthy. Religious indifference runs rampant. Trust in institutions is low. Previous methods of transmitting faith no longer have the same impact in a changed cultural landscape. Young adults are particularly hard for the Church to reach. Many efforts at evangelization will remain ineffective at reaching most religious “nones” without significant

preparation, or “pre-evangelization.” This process involves patiently tilling the soil to build the necessary trust, curiosity, and openness so that the Gospel message may take root. New media play a crucial role in this work of pre-evangelization. While recognizing the concerning aspects of the digital landscape and the need for embodied community, this book takes a positive approach to leveraging media for evangelization to prepare the way of the Lord today.

bryan johnson longevity: Identity and Ageing Mark Cameron Tennant, 2025-08-29

Examining the fundamental social and cultural changes faced by older adults, this book explores ageing and the psychological issues encountered in 'learning to be' as an older person. Many of these issues are present throughout the lifespan but take on a new complexion with advancing age, such as the significance of past, present, and future in our lives; how we relate to others in our world; the impact of our gendered lives; the tension between autonomy and dependence, consumption and production, cognition and emotion; and the psychological impact of biological ageing. Adopting a lifespan developmental approach, this text draws together the psychology of late adulthood, contemporary views about identity, and how we learn and develop in late adulthood. Acknowledging the historical, social, cultural, biological, and technological factors that impact the psychological experience of identity as we age, this book will be of interest to psychology and social work students studying lifespan development. It will also appeal more broadly to a range of professions that provide services for older adults.
