book of wars: *Binding Media* Élika Ortega, 2025-03-04 Far from causing the death of the book, the publishing industry's adoption of digital technologies has generated a multitude of new works that push the boundaries of literature and its presentation. In this fascinating new work, Élika Ortega proposes the notion of binding media — a practice where authors and publishers fasten together a codex and electronic or digital media to create literary works in the form of hybrid print-digital objects. Examining more than a hundred literary works from across the Americas, Ortega argues that binding media are not simply experimentations but a unique contemporary form of the book that effectively challenges conventional regional and linguistic boundaries. Furthermore, the book demonstrates that binding media have remained marginal in the publishing industry due to technological imperatives like planned obsolescence and commercial ones like replicability and standardization that run counter to these bespoke literary projects. Although many binding media and other hybrid publishing initiatives have perished, they've left behind a wealth of material; collecting and tracing the residues of these foreshortened projects, Ortega builds a fascinating history of hybrid publishing. Ultimately, this essential account of contemporary book history highlights the way binding media help illuminate processes of cultural hybridization that have been instigated by the expediency of globalized digital technologies and transnational dynamics.

To address the current crisis, this book examines how the changed character of American liberalism has been rendered legible for a mass audience.

book of wars: *How Slavoj Became Žižek* Eliran Bar-El, 2025-05-06 An engrossing account of the meteoric rise of contemporary philosophy's most contentious and prolific intellectual. This

revised edition corrects several erroneous and insufficient references in the first edition of this book. Slovenian philosopher bad boy Slavoj Žižek is one of the most famous intellectuals of our time, publishing at a breakneck speed and lecturing around the world. With his unmistakable speaking style and set of mannerisms that have made him ripe material for internet humor and meme culture, he is recognizable to a wide spectrum of fans and detractors. But how did an intellectual from a small Eastern European country come to such popular notoriety? In *How Slavoj Became Žižek*, sociologist Eliran Bar-El plumbs the emergence, popularization, and development of the phenomenon called “Žižek.” Beginning with Žižek’s early years as a thinker and political figure in Slovenian civil society, Bar-El traces Žižek’s rise from Marxist philosopher to political candidate to eventual intellectual celebrity, as Žižek perfected his unique performative style and a rhetorical arsenal of “Hegelacanes.” Following 9/11, Žižek’s career as a global op-ed writer and TV commentator married his rhetoric with global events such as the war on terror, the financial crisis of 2008, and the Arab Spring of 2011. Yet, at the same time, this mainstream popularity, as well as a series of politically incorrect views, almost entirely estranged the Slovenian from the normal workings of academia. Ultimately, this account shows how Žižek has harnessed the power of the digital era in his own self-fashioning as a public intellectual.

book of wars: *Gutenberg in Shanghai* Christopher Reed, 2004-12-31 In the mid-1910s, what historians call the Golden Age of Chinese Capitalism began, accompanied by a technological transformation that included the drastic expansion of China’s Gutenberg revolution. *Gutenberg in Shanghai* is a brilliant examination of this process. It finds the origins of that revolution in the country’s printing industries of the late imperial period and analyzes their subsequent development in the Republican era. Under diverse social, political, and economic influences, this technological and cultural revolution saw woodblock printing replaced with Western mechanical processes. This book, which relies on documents previously unavailable to both Western and Chinese researchers, demonstrates how Western technology and evolving traditional values resulted in the birth of a unique form of print capitalism whose influence on Chinese culture was far-reaching and irreversible. Its conclusion contests scholarly arguments that view China’s technological development as slowed by culture, or that interpret Chinese modernity as mere cultural continuity. A vital reevaluation of Chinese modernity, *Gutenberg in Shanghai* will appeal to scholars of Chinese history. Likewise, it will be enthusiastically received by specialists in cultural studies, political science, sociology, the history of the book, and the anthropology of science and technology.

book of wars: *Love, Death & Rare Books* Robert Hellenga, 2020-03-17 Chas. Johnson & Sons, a venerated rare bookstore in urban Chicago, has been a family operation for three generations—grandfather, father and son. But when it comes time for Gabe Johnson to take the reins of the business, the world of books has changed, and the combination of the Internet and inner city rents forces the store to close. But instead of folding his hand, Gabe decides to risk everything he has and reopen the shop—and, in a sense restart his life—in a small town on the shores of Lake Michigan. Haunted his entire life by an obsession with a former lover, he finds her again only to be faced with yet another even more difficult challenge that threatens the well-being of the revival of the bookstore as well as the fate of his rekindled relationship. It is rare, indeed, to find fiction that is both passionate and erudite; and in his previous books, Robert Hellenga brought us tales of love, learning and of loss. But now, with *Love, Death & Rare Books*, he celebrates an industry that has brought us the written word and his novel is a paean to the independent bookseller.
