## Understanding Burton Raffel's Beowulf Translation

Burton Raffel's translation of Beowulf is a modern English rendition of the Old English epic poem, originally composed between the 8th and 11th centuries. Raffel's version is celebrated for its readability and poetic rhythm, making the ancient story accessible to contemporary readers while preserving the heroic tone of the original text. His translation is often used in academic settings due to its balance of scholarly accuracy and literary appeal. Recognizing the importance of Raffel's work is key to understanding why precise citation practices are necessary when referencing his translation in scholarly writing.

## The Significance of Raffel's Translation

Raffel's Beowulf stands out for its clear narrative voice and faithful adherence to the poem's thematic elements. Unlike earlier translations that might prioritize literal word-for-word accuracy, Raffel's approach emphasizes the flow and spirit of the epic, which aids students and readers new to Beowulf. This translation is frequently included in anthologies and literature courses, underscoring its academic relevance. Proper citation ensures that Raffel receives appropriate credit and helps readers locate the exact edition used.

## Publication Details of Raffel's Beowulf

When citing Raffel's translation, it is important to reference the specific edition consulted. The most commonly cited edition is published by Signet Classics, a reputable imprint. The full citation typically includes the translator's name, the title of the work, the publisher, and the year of publication. Knowing these details is essential for creating a precise MLA citation for Burton Raffel Beowulf MLA citation purposes.

## MLA Citation Basics for Literary Translations

The Modern Language Association (MLA) citation style provides a standardized format for referencing literary works, including translated texts. When citing a translation, MLA requires both the original author and the translator to be acknowledged, ensuring clarity about the source of the interpretation. Understanding the components of an MLA citation for a translated literary work is fundamental to academic writing in the humanities.

## Key Elements of MLA Citation for Translations

MLA citation for a translated work typically includes the following elements:

- **Original Author:** The creator of the original text, in this case, the anonymous author of Beowulf.
- **Title of the Work:** The title of the poem or book, italicized.
- **Translator's Name:** The person who translated the work, preceded by "Translated by."
- **Publisher:** The name of the publishing company.
- **Publication Year:** The year the translation was published.

These components are arranged in a specific order to comply with MLA standards, facilitating clear and consistent citations.

## Format Variations for Different Source Types

MLA citation format can vary depending on whether the source is a print book, an e-book, or part of an anthology. For Burton Raffel's Beowulf, most citations will reference a print edition, but adjustments might be necessary if the text is accessed digitally. Understanding these variations enhances citation accuracy and ensures proper attribution.

# How to Cite Burton Raffel's Beowulf in MLA Format

Creating an MLA citation for Burton Raffel's Beowulf translation involves following the established guidelines for translated literary works. This section outlines the correct structure and components required to format the citation properly, ensuring that academic papers meet MLA standards.

## Basic Citation Structure

The general format for citing Burton Raffel's Beowulf in MLA style is as follows:

1. **Author's Name:** Since Beowulf's author is anonymous, the citation begins with the title of the work.
2. **Title:** *Beowulf*, italicized.
3. **Translator:** "Translated by Burton Raffel."
4. **Publisher:** The publishing company's name.
5. **Publication Year:** The year the translation was published.

For example, if citing the Signet Classics edition, the citation would follow this model.

## Example of a Full MLA Works Cited Entry

A properly formatted citation for Raffel's Beowulf translation might look like this:

- *Beowulf*. Translated by Burton Raffel, Signet Classics, 2000.

This concise citation includes all necessary information for identifying the source clearly.

## Examples of In-Text Citations and Works Cited Entries

In addition to the full Works Cited entry, MLA style requires in-text citations to credit sources within the body of a paper. This section provides examples of how to cite Burton Raffel's Beowulf both within the text and in the reference list.

## In-Text Citation Format

In-text citations for Raffel's *Beowulf* typically include the title of the work (if no author is named) and the line or page number referenced. Since *Beowulf* is a poem, citing line numbers is common practice. The citation appears in parentheses immediately after the quotation or paraphrase.

Example:

- "So the spear-Danes in days gone by / And the kings who ruled them had courage and greatness" (*Beowulf* lines 1-2).

## Works Cited Entry Correspondence

The in-text citation corresponds to the full citation in the Works Cited list that provides complete publication details. This two-part citation system ensures that readers can easily locate the source material.

## Common Challenges and Tips for Accurate Citation

Correctly citing Burton Raffel's *Beowulf* translation can present challenges, especially for those unfamiliar with MLA guidelines or the nuances of citing translated works. This section highlights common pitfalls and offers practical advice to maintain citation accuracy.

### Dealing with Anonymous Authorship

Because *Beowulf*'s author is unknown, the title takes the place of the author's name in citations. This substitution can confuse writers new to MLA style, but understanding this rule simplifies the process. Always begin citations with the title when no author is available.

### Consistency in Line Number Citation

When referencing specific passages, it is important to consistently use line numbers rather than page numbers, especially since various editions may paginate the text differently. Line numbers provide a universal reference point within the poem, aiding scholarly discourse.

### Additional Tips for MLA Compliance

- Use italics for the title *Beowulf* in both in-text citations and Works Cited entries.
- Include the translator's name explicitly to acknowledge their contribution.

- Verify publisher and publication year information from the specific edition used.
- Maintain double-spacing and hanging indentations in the Works Cited list, as required by MLA style.

## **Frequently Asked Questions**
