caplan health institute locations: *MEDINFO 2021: One World, One Health – Global Partnership for Digital Innovation* P. Otero, P. Scott, S.Z. Martin, 2022-08-05 The World Health Organization defines health as “a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity”, and its constitution also asserts that health for all people is “dependent on the fullest co-operation of individuals and States”. The ongoing pandemic has highlighted the power of both healthy and unhealthy information, so while healthcare and public health services have depended upon timely and accurate data and continually updated knowledge, social media has shown how unhealthy misinformation can be spread and amplified, reinforcing existing prejudices, conspiracy theories and political biases. This book presents the proceedings of MedInfo 2021, the 18th World Congress of Medical and Health Informatics, held as a virtual event from 2-4 October 2021, with pre-recorded presentations for all accepted submissions. The theme of the conference was One World, One Health – Global Partnership for Digital Innovation and

submissions were requested under 5 themes: information and knowledge management; quality, safety and outcomes; health data science; human, organizational and social aspects; and global health informatics. The Programme Committee received 352 submissions from 41 countries across all IMIA regions, and 147 full papers, 60 student papers and 79 posters were accepted for presentation after review and are included in these proceedings. Providing an overview of current work in the field over a wide range of disciplines, the book will be of interest to all those whose work involves some aspect of medical or health informatics.

caplan health institute locations: *The Eclipse of Community Mental Health and Erich Lindemann* David G. Satin, 2020-09-03 These volumes make new contributions to the history of psychiatry and society in three ways: First, they propose a theory of values and ideology influencing the evolution of psychiatry and society in recurring cycles, and survey the history of psychiatry in recent centuries in light of this theory. Second, they review the waxing, prominence, and waning of Community Mental Health as an example of a segment of this cyclical history of psychiatry. Third, they provide the first biography of Erich Lindemann, one of the founders of social and community psychiatry, and explore the interaction of the prominent contributor with the historical environment and the influence this has on both. We return to the issue of values and ideologies as influences on psychiatry, whether or not it is accepted as professionally proper. This is intended to stimulate self-reflection and the acceptance of the values sources of ideology, their effect on professional practice, and the effect of values-based ideology on the community in which psychiatry practices. The books will be of interest to psychiatric teachers and practitioners, health planners, and socially responsible citizens.
