chain of gold characters picture: Perfecting Friendship Ivy Schweitzer, 2007-09-06 Contemporary notions of friendship regularly place it in the private sphere, associated with feminized forms of sympathy and affection. As Ivy Schweitzer explains, however, this perception leads to a misunderstanding of American history. In an exploration of early American literature and culture, Schweitzer uncovers friendships built on a classical model that is both public and political in nature. Schweitzer begins with Aristotle's ideal of perfect friendship that positions freely chosen relationships among equals as the highest realization of ethical, social, and political bonds. Evidence in works by John Winthrop, Hannah Foster, James Fenimore Cooper, and Catharine Sedgwick confirms that this classical model shaped early American concepts of friendship and, thus, democracy. Schweitzer argues that recognizing the centrality of friendship as a cultural institution is critical to understanding the rationales for consolidating power among white males in the young nation. She also demonstrates how women, nonelite groups, and minorities have appropriated and redefined the discourse of perfect friendship, making equality its result rather than its requirement. By recovering the public nature of friendship, Schweitzer establishes discourse about affection and affiliation as a central component of American identity and democratic community.

chain of gold characters picture: Whose Muse? James Cuno, 2018-06-05 During the economic

boom of the 1990s, art museums expanded dramatically in size, scope, and ambition. They came to be seen as new civic centers: on the one hand as places of entertainment, leisure, and commerce, on the other as socially therapeutic institutions. But museums were also criticized for everything from elitism to looting or illegally exporting works from other countries, to exhibiting works offensive to the public taste. *Whose Muse?* brings together five directors of leading American and British art museums who together offer a forward-looking alternative to such prevailing views. While their approaches differ, certain themes recur: As museums have become increasingly complex and costly to manage, and as government support has waned, the temptation is great to follow policies driven not by a mission but by the market. However, the directors concur that public trust can be upheld only if museums continue to see their core mission as building collections that reflect a nation's artistic legacy and providing informed and unfettered access to them. The book, based on a lecture series of the same title held in 2000-2001 by the Harvard Program for Art Museum Directors, also includes an introduction by Cuno and a fascinating--and surprisingly frank--roundtable discussion among the participating directors. A rare collection of sustained reflections by prominent museum directors on the current state of affairs in their profession, this book is without equal. It will be read widely not only by museum professionals, trustees, critics, and scholars, but also by the art-loving public itself.
