dr pompa pump reviews: La Terapia antiacida per la Cura dei Tumori Stefano Fais, 2025-09-09 Sono alcuni decenni che si sente parlare di guerra al cancro. E come tutti sanno in guerra ogni mezzo è lecito; si passa sulla vita degli esseri umani con i carri armati e con le bombe di ogni genere - e quindi si perde il concetto di diritto alla vita. Con i tumori purtroppo si è arrivati a questo: per distruggere quei "mostri" ogni mezzo è lecito; e sono i pazienti stessi che te lo chiedono, pronti ad affrontare eroicamente ogni tipo di sofferenza, per sconfiggere quell'orribile nemico che alberga dentro loro stessi. Quando una guerra è in atto, inevitabilmente si aprono spazi infiniti per chi dalla guerra vuol trarne profitti: dalle lobby finanziarie, agli avventurieri senza scrupoli, ai militari di carriera, ai ladruncoli, agli arringatori di folle, in una specie di psicopatologia narcisistica che appare a tutti ormai assoluta normalità e che nasconde completamente i sentieri che invece bisognerebbe percorrere; che non sono alternativi, attenzione, spesso possono rappresentare l'inizio di una vera strada maestra. Il Dott. Stefano Fais propone un percorso terapeutico alcalinizzante contro i tumori. Anche l'interpretazione dell'origine del cancro viene mutata: è l'ambiente organico e cellulare che predispone cellule già esistenti a mutare e proliferare e non la malignità di alcune cellule che si impongono su altre. L'autore, in maniera chiara e dettagliata, spiega: • qual è l'attuale terapia dei tumori • perché ogni paziente va considerato per la propria personale vita vissuta e non solo per lo stadio della sua malattia • la correlazione che c'è tra tumori e acidità • cos'è il trattamento antiacido e le evidenze scientifiche che provano che funziona • perché i tumori sono malattie e non condanne a morte. Altrettanto chiare e significative sono le molte testimonianze di pazienti - e anche di suoi colleghi - che Fais ha inserito per dare un segno tangibile di come può e dovrebbe essere l'approccio di un medico verso chi vive questa patologia. "Ci è stato insegnato che il nostro corpo è suddiviso in organi ed apparati, tanto che in medicina si sono moltiplicate le specializzazioni, invece esso è un unicum che funziona come un insieme di organi e apparati strettamente connessi sia nel mantenere uno stato normale, sia nel fronteggiare le urgenze."
