dr chemistry homework help: Mom the Chemistry Professor Kimberly Woznick, Amber Charlebois, Renée Cole, Cecilia Marzabadi, Gail Webster, 2018-07-28 When is the right time? How can I meet the demands of a professorship whilst caring for a young family? Choosing to become a mother has a profound effect on the career path of women holding academic positions, especially in the physical sciences. Yet many women successfully manage to do both. In this second edition, which is a project of the Women Chemists Committee (WCC) of the American Chemical Society (ACS), 40 inspirational personal accounts describe the challenges and rewards of combining motherhood with an academic career in chemistry. The authors are all women at different stages of their career and from a range of institution types, in both tenure and non-tenure track positions. The authors include women from different racial and ethnic backgrounds, who became mothers at different stages of their career, and who have a variety of family structures. Aimed at undergraduate and graduate students of chemistry, as well as postdoctoral fellows and early career faculty, these contributions serve as examples for women considering a career in academia but worry about how this can be balanced with other important aspects of life. The authors describe how they overcame particular challenges, but also highlight aspects of the system, which could be improved to accommodate women academics, and particularly encourage more women to take on academic positions in the sciences.

dr chemistry homework help: *Assessment of Department of Defense Basic Research* National Research Council, Division on Engineering and Physical Sciences, Committee on Department of Defense Basic Research, 2004-12-22 The Department of Defense (DOD) supports basic research to advance fundamental knowledge in fields important to national defense. Over the past six years, however, several groups have raised concern about whether the nature of DOD-funded basic research is changing. The concerns include these: Funds are being spent for research that does not fall under DOD's definition of basic research; reporting requirements have become cumbersome and onerous; and basic research is handled differently by the three services. To explore these concerns, the Congress directed DOD to request a study from the National Research Council (NRC) about the nature of basic research now being funded by the Department. Specifically the NRC was to determine if the programs in the DOD basic research portfolio are consistent with the DOD definition of basic research and with the characteristics associated with fundamental research.

dr chemistry homework help: The Final Days Matt Rawle, 2024-12-17 This Lent, ponder the themes of justice, poverty, freedom, and love. The four New Testament Gospels aren't the same story, but they offer the same Resurrection hope. Matthew, Mark, Luke, and John devote most of their story detailing Jesus' last week in Jerusalem, all highlighting Jesus' triumphant entry into the city, the suffering and humiliation of the cross, and the empty tomb come Sunday morning, but the stories they tell aren't quite the same. Each Gospel offers a different lens through which we understand Jesus' Passion. One portrait reveals Jesus to be in control, while another emphasizes his suffering. In one story Jesus offers hope to the thief on the cross, and in another Jesus only receives derision. These different perspectives aren't a reason to dismiss the Gospels; rather they reveal an abundant, diverse, and complementary picture of God's work in the suffering, death, and resurrection of Jesus. Other components for the study include a leader guide, and teaching video are available.
