fred mcd training programs: The Global Corporation Laura P. Hartman, Patricia H. Werhane, 2013-12-19 This text brings together case studies focusing on specific instances of corporate best practices. All too often, we showcase cases based on questionable or unethical corporate behavior. Instead, the editors bring together in this book examples of how some firms got it right. Certainly, there is no claim that the companies in these case are perfect; some of them may have histories that include questionable practices. But, these are companies that work to foster trust, both internally and in their relationships with customers, suppliers, shareholders, and the communities in which they operate. The book is not, however, merely a descriptive iteration of effective corporate conduct. The editors conclude with an analysis of frameworks for corporate and managerial ethical decision-making - frameworks that help to establish models for best practices. These frameworks then can be generalized and applied to other corporate situations, and replicated by other companies in their search for excellence and the resulting avoidance of misconduct.

fred mcd training programs: Fast Food, Fast Talk Robin Leidner, 1993-08-04 Attending Hamburger University, Robin Leidner observes how McDonald's trains the managers of its fast-food restaurants to standardize every aspect of service and product. Learning how to sell life insurance at a large midwestern firm, she is coached on exactly what to say, how to stand, when to make eye contact, and how to build up Positive Mental Attitude by chanting I feel happy! I feel terrific! Leidner's fascinating report from the frontlines of two major American corporations uncovers the methods and consequences of regulating workers' language, looks, attitudes, ideas, and demeanor. Her study reveals the complex and often unexpected results that come with the routinization of service work. Some McDonald's workers resent the constraints of prescribed uniforms and rigid scripts, while others appreciate how routines simplify their jobs and give them psychological protection against unpleasant customers. Combined Insurance goes further than McDonald's in attempting to standardize the workers' very selves, instilling in them adroit maneuvers to overcome customer resistance. The routinization of service work has both poignant and preposterous consequences. It tends to undermine shared understandings about individuality and social obligations, sharpening the tension between the belief in personal autonomy and the domination of a powerful corporate culture. Richly anecdotal and accessibly written, Leidner's book charts new territory in the sociology of work. With service sector work becoming increasingly important in American business, her timely study is particularly welcome.

fred mcd training programs: Observations at the Speed of Life Ed Doherty, 2024-02-29 Observations at the Speed of Life is a collection of stories that have been shared with others throughout a career of mentoring and motivating friends, family, and coworkers. Sometimes humorous, sometimes inspirational, and occasionally packed with wisdom. They are all about aspiring to be the best version of yourself. Some of the essays are very personal, and some are philosophical, but regardless, each one packs a message about hope and the value of persistence. This book is a result of more than forty years of preparing and writing weekly messages to the teams Ed managed. Those messages consisted of his workplace observations about performance, motivation, management, leadership, and integrity. They were timely lessons that could be applied immediately. When Ed transitioned to full-time consulting, those messages continued but in the form of a Wednesday Weblog to an international audience. The stories range from working as a pipefitter, third-class unskilled, during the Vietnam War to an all-night production session with Larry Bird making a television commercial, to befriending an eighty-year-old usher at Fenway Park, to running the Boston Marathon for the first time at the age of seventy, and everything in between.
