All contributors have deployed to Iraq and/or Afghanistan and detail both the bureaucratic and intellectual challenges in understanding terrorist and insurgent finance networks and then designing operations to attack such networks via conventional military operations, Special Forces kill/capture targeting operations, and non-kinetic operations such as asset freezing or diplomacy. The analytic methods described here leverage both quantitative and qualitative methods, but in a language and style accessible to those without a quantitative background. All methods are demonstrated via actual case studies (approved for release by the U.S. government) drawn from the analysts' distinct experiences while deployed.
