

goffman total institution

goffman total institution is a sociological concept developed by Erving Goffman to describe a type of social organization where individuals live and work in a confined, controlled environment, isolated from the broader society. This concept is critical in understanding the dynamics of institutions such as prisons, military barracks, mental hospitals, and boarding schools. Goffman's analysis focuses on how these institutions regulate behavior, strip away personal identities, and impose an all-encompassing authority over the lives of their inhabitants. This article explores the key characteristics of the goffman total institution, its various types, the social processes involved, and its impact on individuals. Additionally, it examines critiques and modern applications of the theory. The following sections provide a detailed overview of these aspects to enhance comprehension of this foundational sociological idea.

- Definition and Characteristics of Goffman Total Institution
- Types of Total Institutions
- Social Processes within Total Institutions
- Effects on Individual Identity and Behavior
- Critiques and Contemporary Relevance

Definition and Characteristics of Goffman Total Institution

The goffman total institution concept refers to a place of residence and work where a large number of similarly situated individuals, cut off from the wider community for a considerable time, together lead an enclosed, formally administered life. Goffman identified several defining features that distinguish total institutions from other social organizations.

Core Features of Total Institutions

Total institutions exhibit a set of structural and functional characteristics that regulate every aspect of the inmates' lives. These features include:

- **Enclosure:** Physical barriers or separation from the outside world, often with controlled entry and exit.

- **Batch Living:** Grouping individuals in similar status categories, such as prisoners or patients.
- **Schedule and Control:** Strict routines and schedules governing daily activities, including work, meals, and recreation.
- **Formal Authority:** A hierarchical structure enforcing rules and discipline.
- **Communication Control:** Restrictions on interaction with outsiders and regulated internal communication.

These aspects ensure that total institutions function as self-contained social worlds, profoundly shaping the behavior and identity of those within.

Types of Total Institutions

Goffman categorized total institutions into several types based on their purpose and the nature of confinement. Understanding these types helps to grasp the broad applicability of the concept.

Classification of Total Institutions

The main types of total institutions include:

1. **Care and Treatment Institutions:** Facilities like mental hospitals and nursing homes aimed at caring for individuals who cannot fully care for themselves.
2. **Correctional Institutions:** Prisons and jails designed to punish and rehabilitate offenders.
3. **Military Institutions:** Barracks and training camps that impose discipline and conformity for defense purposes.
4. **Work and Residence Institutions:** Places such as boarding schools or monasteries where people live and work under strict regulations.
5. **Institutions for Marginalized Individuals:** Shelters or rehabilitation centers for those considered deviant or socially marginalized.

Each type serves a distinct societal function but shares the total institution's hallmark of comprehensive control.

Social Processes within Total Institutions

The Goffman total institution framework emphasizes the social dynamics and processes that occur within these enclosed settings. These processes fundamentally alter how individuals perceive themselves and interact with others.

Mortification of the Self

One central process is the "mortification of the self," where an individual's prior identity is systematically stripped away through degrading rituals, loss of privacy, and uniformity. This process often begins at entry and continues through institutional routines designed to break down independence.

Role of Institutional Staff

Staff members hold significant power in enforcing rules and maintaining order. They act as agents of social control and are instrumental in shaping the inmates' experiences. The staff-inmate relationship is typically asymmetrical, emphasizing authority and submission.

Inmate Social Structures

Despite institutional controls, inmates often develop subcultures and informal networks. These social structures provide support, resistance, or adaptation strategies within the total institution's confines.

Effects on Individual Identity and Behavior

The Goffman total institution exerts profound psychological and social effects on residents, often resulting in lasting changes in identity and behavior.

Loss of Autonomy and Personal Identity

Individuals in total institutions frequently experience a significant loss of autonomy. The imposed routines and strict regulations diminish personal decision-making, leading to a reduced sense of self and individuality.

Institutionalization and Dependency

Long-term residence can lead to institutionalization, where individuals become dependent on the institution's structure and are unable to function effectively outside its boundaries. This dependency can hinder reintegration into society.

Resistance and Adaptation Mechanisms

Not all individuals passively accept institutional control. Many develop coping strategies, ranging from compliance to subtle forms of resistance. These behaviors serve to preserve identity or negotiate power within the institution.

Critiques and Contemporary Relevance

While the Goffman total institution concept remains influential, it has also faced critiques and adaptations in contemporary sociological research.

Critiques of Goffman's Framework

Some scholars argue that Goffman's model overemphasizes control and neglects the agency of institutional residents. Others point out that modern institutions may be less totalizing due to technological advances and regulatory reforms.

Modern Applications and Developments

The total institution concept continues to be relevant in analyzing modern settings such as immigration detention centers, refugee camps, and certain corporate or educational environments. Contemporary research often incorporates considerations of power dynamics, identity negotiation, and institutional reform.

Implications for Policy and Practice

Understanding the dynamics of total institutions informs policies aimed at improving conditions within such facilities and supporting successful reintegration of residents into society. Emphasis on human rights, autonomy, and mental health reflects these evolving priorities.

Frequently Asked Questions

What is a total institution according to Erving Goffman?

A total institution, according to Erving Goffman, is a place of residence and work where a large number of similarly situated individuals, cut off from the wider community for a considerable time, lead an enclosed, formally administered life.

What are the key characteristics of a total institution?

Key characteristics include all aspects of life being conducted in the same place under a single authority, a batch of inmates all treated alike and required to perform the same activities, and the institution having explicit rules and schedules governing daily life.

Which types of organizations are considered total institutions by Goffman?

Examples of total institutions include prisons, military boot camps, mental hospitals, boarding schools, and monasteries.

How does Goffman describe the impact of total institutions on individual identity?

Goffman argues that total institutions strip individuals of their previous roles and identities through a process called 'mortification of the self,' leading to a new identity shaped by the institution's rules and social structure.

What is the 'mortification of the self' in the context of total institutions?

'Mortification of the self' refers to the process where an individual's previous identity is broken down through practices such as uniform dress, loss of privacy, and strict routines, resulting in the loss of personal autonomy and self-esteem.

How do total institutions maintain control over their inhabitants?

Control is maintained through strict rules, surveillance, regimented schedules, loss of personal possessions, and enforced routines that limit autonomy and enforce conformity.

Can the concept of total institutions be applied to modern settings?

Yes, the concept can be applied to various modern settings like prisons, psychiatric hospitals, military training camps, and even some highly regimented residential treatment centers.

What role does the concept of 'institutionalization' play in Goffman's theory?

Institutionalization refers to the process by which individuals become accustomed to the total institution's environment and rules, often resulting in dependency on the institution and difficulty adjusting to life outside it.

How does Goffman's concept of total institutions relate to social control?

Total institutions serve as mechanisms of social control by regulating behavior, suppressing individuality, and enforcing conformity to societal norms within a closed environment.

What criticisms have been made regarding Goffman's concept of total institutions?

Critics argue that Goffman's theory may overgeneralize diverse institutions, understate individual agency within institutions, and not fully account for variations in power dynamics and resistance among inmates.

Additional Resources

1. Asylums: Essays on the Social Situation of Mental Patients and Other Inmates

Erving Goffman's seminal work introduces the concept of the "total institution," exploring how mental hospitals and similar institutions control and reshape the identities of their inmates. Through detailed ethnographic observation, Goffman analyzes the loss of autonomy and the process of "mortification of self" experienced by residents. This book is foundational for understanding institutional life and social control.

2. On the Run: Fugitive Life in an American City

Alice Goffman, building on Erving Goffman's sociological legacy, examines the lives of young African American men entangled in the criminal justice system. Though not focused solely on total institutions, this work sheds light on how institutional forces impact identity and social interaction outside traditional institutional walls. It offers a contemporary perspective on surveillance, control, and social exclusion.

3. Total Institutions and Institutional Life: A Reader

This edited volume compiles key essays and research studies that expand upon Goffman's theory of total institutions. It covers various types of institutions, including prisons, military barracks, and nursing homes, providing a multidimensional view of institutional impacts on individuals. The book is valuable for students and scholars seeking a broad understanding of institutional dynamics.

4. The Presentation of Self in Everyday Life

Also by Erving Goffman, this classic work explores how individuals perform roles in social interactions, a concept that complements his analysis of total institutions. While focusing on everyday life, the book provides insight into identity construction and impression

management, themes that are crucial when considering life inside total institutions. It offers theoretical tools for understanding how inmates might navigate institutional settings.

5. *Prisons and Social Death*

This book investigates the concept of "social death" in the context of incarceration, a phenomenon closely related to Goffman's ideas on total institutions. It discusses how imprisonment strips individuals of social identity and agency, leading to long-term consequences for reintegration. The text is useful for understanding the harsh realities of institutional confinement and its societal implications.

6. *Life Inside: Social Relations in Correctional Facilities*

This ethnographic study delves into the daily lives and social structures within prisons, illustrating the mechanisms of control and resistance that inmates experience. Drawing on Goffman's framework, the book analyzes how institutional rules shape behavior and social roles. It provides a detailed look at how total institutions function in practice.

7. *Institutionalized: The Social Construction of Mental Illness and the Total Institution*

This book examines how mental illness is framed within total institutions and how this framing affects treatment and patient identity. It critiques institutional practices and highlights the power dynamics between staff and patients. The work is significant for understanding the intersection of mental health and institutional control.

8. *The Culture of Confinement: Prison Life in America*

Focusing on the cultural aspects of incarceration, this book explores how prison environments create unique social norms and identities. It builds on Goffman's theory by showing how total institutions cultivate a distinct inmate culture. The book is insightful for those interested in the sociocultural dimensions of institutional life.

9. *Beyond the Total Institution: New Perspectives on Institutional Life*

This collection of essays challenges and extends Goffman's original concept by incorporating contemporary research on institutions such as schools, hospitals, and care homes. It explores how partial and hybrid institutional forms affect individuals differently than classic total institutions. The book is essential for appreciating the evolution of institutional theory in modern sociology.

goffman total institution: Erving Goffman. Concept of total institutions Verena Stockmair, 2022-02-17 Seminar paper from the year 2004 in the subject Sociology - Individual, Groups, Society, grade: 1,3, University of Regensburg, language: English, abstract: In view of the current disclosure of torture in war prisons in Iraq, but also through the disclosure of mistreatment in the Brandenburg an der Havel prison, it becomes clear how explosive the concept of total

institutions still is more than forty years after its publication by Goffman. In his work *Asyle*, first published in 1961, Erving Goffman (1922-1982) summarizes in four essays his many years of sociological studies on the inmates of psychiatric clinics. From 1954 to 1957, Goffman was a visiting professor at the National Institute of Mental Health in Bethesda, Maryland. During this time he spent over a year doing field studies at St. Elizabeth's Hospital (Washington D.C.), which then had about 7,000 inmates. Goffman's own experiences in dealing directly with the inmates of St. Elizabeth's Hospital are included in the book as well as countless descriptions of other well-known and lesser-known authors (e.g. George Orwell, Herman Melville), who spent some years of their lives in prison, in the monastery, in the boarding school, in an orphanage, in the military or in similar institutions. Goffman first encountered the term total institution in a 1952 graduate seminar on institutions. Coined by Everett Hughes, the term must have intrigued Goffman from the start. Burns writes: It is clear from Goffman's course notes (he gave me a copy of them) that it must have been a remarkable teaching enterprise - enlivened with allusions, encyclopedic in its coverage, and radically critical and innovative in its approach. . But while Goffman thought of the term social institution in a way that differed from Hughes', he adopted the term total institution in Hughes' sense. For Hughes, these were social institutions which were much more shut off from the outside world - he cites nunneries as an example - Goffman accordingly relates his observations to the situation of those 'extruded' from society'. In this work, the aim is first to present Goffman's concept of total institutions and to go into the points of view of the inmates, the staff and the points of contact of both groups. Subsequently, the concept should be examined and assessed with regard to its possible application and possibilities should be found to further differentiate the concept.

goffman total institution: *Total Institutions and Reinvented Identities* S. Scott, 2011-10-27 Why do people enter total institutions - places that confine and control them around the clock - and how does the experience change them? This book updates Goffman's classic model by introducing the Re-inventive Institution, where members voluntarily commit themselves to pursue regimes of self-improvement.

goffman total institution: Asylums Erving Goffman, 2017-09-08 A total institution is defined by Goffman as a place of residence and work where a large number of like-situated, individuals, cut off from the wider society for an appreciable period of time, together lead an enclosed, formally administered round of life. Prisons serve as a clear example, providing we appreciate that what is prison-like about prisons is found in institutions whose members have broken no laws. This volume deals with total institutions in general and, mental hospitals, in particular. The main focus is, on the world of the inmate, not the world of the staff. A chief concern is to develop a sociological version of the structure of the self. Each of the essays in this book were intended to focus on the same issue--the inmate's situation in an institutional context. Each chapter approaches the central issue from a different vantage point, each introduction drawing upon a different source in sociology and having little direct relation to the other chapters. This method of presenting material may be irksome, but it allows the reader to pursue the main theme of each paper analytically and comparatively past the point that would be allowable in chapters of an integrated book. If sociological concepts are to be treated with affection, each must be traced back to where it best applies, followed from there wherever it seems to lead, and pressed to disclose the rest of its family.

goffman total institution: On the Characteristics of Total Institutions Erving Goffman, 1961

goffman total institution: Deviance and Social Control in Sport Michael Atkinson, Kevin Young, 2008 Deviance and Social Control in Sport challenges preconceived understandings regarding the relationship of deviance and sport and offers a conceptual framework for future work in a variety of sociological subfields.

goffman total institution: Total Institutions Samuel E. Wallace, 2017-09-08 Total institutions are defined in this reader not as a separate class of social establishments that exercise complete or nearly complete control over their population, but rather as specific institutions which exhibit to an intense degree certain characteristics found in all institutions. The issue therefore is

not which institutions are total and which are not, but rather how much totality does each of our institutions display? Representing an important new approach to problems of social control, this book concentrates on dynamics-how institutions change in the extent or nature of their totality over time and how they display totality in different ways-rather than the mere enumeration of common traits.

goffman total institution: *An Introduction to the Sociology of Religion* Inger Furseth, Pål Repstad, 2017-03-02 Is it true that religion is weakening in modern times, or are we facing religious resurgence? What is fundamentalism? How does it emerge and grow? What role does religion play in ethnic and national conflicts? Is religion a fundamental driving force or do political leaders use religion for their own purposes? Do all religions oppress women? These are some of the questions addressed in this book. *An Introduction to the Sociology of Religion* provides an overview of sociological theories of contemporary religious life. Some chapters are organized according to topic. Others offer brief presentations of classical and contemporary sociologists from Karl Marx to Zygmunt Bauman and their perspectives on social life, including religion. Throughout the book, illustrations and examples are taken from several religious traditions.

goffman total institution: Goffman's Legacy A. Javier Treviño, 2003 Erving Goffman (1922-82) was arguably one of the most influential American sociologists of the twentieth century. A keen observer of the interaction order of everyday life, Goffman's books, which have sold in the hundreds of thousands, continue to be widely read and his concepts have permanently entered the sociology lexicon. This volume consists of ten original essays, all written by prominent Goffman scholars, that critically assess Goffman's many contributions to various areas of study, including functionalism, social psychology, ethnomethodology, and feminist theory.

goffman total institution: Sociology Readings ,

goffman total institution: *The Experience of Science* I.F. Goldstein, M. Goldstein, 1984-04-30 Our earlier book, *How We Know: An Exploration of the Scientific Process*, was written to give some conception of what the scientific approach is like, how to recognize it, how to distinguish it from other approaches to understanding the world, and to give some feeling for the intellectual excitement and aesthetic satisfactions of science. These goals represented our concept of the term scientific literacy. Though the book was written for the general reader, to our surprise and gratification it was also used as a text in about forty colleges, and some high schools, for courses in science for the non-scientist, in methodology of science for social and behavioral sciences, and in the philosophy of science. As a result we were encouraged to write a textbook with essentially the same purpose and basic approach, but at a level appropriate to college students. We have drawn up problems for those chapters that would benefit from them, described laboratory experiments that illustrate important points discussed in the text, and made suggestions for additional readings, term papers, and other projects. Throughout the book we have introduced a number of chapters and appendices that provide examples of the uses of quantitative thinking in the sciences: logic, mathematics, probability, statistics, and graphical representation.

goffman total institution: Communicating and Organizing in Context Beth Bonniwell Haslett, 2013-06-17 *Communicating and Organizing in Context* integrates Giddens' structuration theory with Goffman's interaction order and develops a new theoretical base—the theory of structurational interaction—for the analysis of communicating and organizing. Both theorists emphasize tacit knowledge, social routines, context, social practices, materiality, frames, agency, and view communication as constitutive of social life and of organizing. Thus their integration in structurational interaction provides a coherent, communication-centric approach to analyzing communicating, organizing and their interrelationships. This book will be a valuable resource for students and scholars as an orientation to the field of organizational communication and as an integration of organizing and communicating. It will also be useful for practitioners as a tool for understanding how conceptual frames limit possibilities and constitute the nature of organizing and members' participation in organizations.

goffman total institution: Tuberculosis Then and Now Flurin Condrau, Michael Worboys,

2010-01-01 In *Tuberculosis Then and Now* leading scholars and new researchers in the field reflect on the changing medical, social, and cultural understanding of the disease and engage in a wider debate about the role of narrative in the social history of medicine and how it informs current debates and issues surrounding the treatment of tuberculosis and other infectious diseases. Through a case study of the history of tuberculosis and its treatment, this collection examines medicine and health care from the perspectives of class, race, and gender, providing a challenging and refreshing addition to the field of bacteria-centred accounts of the history of medicine.

goffman total institution: *The Oxford Handbook of Sociology and Organization Studies* Paul S. Adler, 2009 Organizations are a defining feature of the modern world, and the study of organizations (Organization Studies) has become well established in both sociology departments and professional schools, most notably business and management schools. Organization Studies has long drawn inspiration from foundational work in sociology. The sociological lens affords depth of insight into the technological, economic, cultural, and political forces that shape organizations from both within and without. In particular, classical works in sociology have long energized organizational research, primarily by suggesting ways of making sense of the ever-accelerating pace of social change. In recent decades, however, the field has lost interest in these sociology classics. This trend reflects and reinforces an increasingly academic focus of contemporary Organization Studies. Not only does this trend weaken Organization Studies' engagement with the big social issues of our time, but it isolates the field from the broader field of the social sciences. The aim of this Handbook is to re-assert the importance of classical sociology to the future of Organization Studies. Alongside several thematic chapters, the volume includes chapters on each of nearly two dozen major European and American theorists, each of these chapter addressing: (a) the ideas and their context, (b) the impact of these ideas on the field of Organization Studies, and (c) the potential future research these ideas might inspire. The goal is not reverential exegesis, but rather to examine how the classics can energize organizational research. This wide-ranging Handbook, with contributions from leading American and European scholars, will be a vital, informative, and stimulating resource for anybody undertaking research in, teaching, or interested in learning more about Organization Studies today. About the Series Oxford Handbooks in Business & Management bring together the world's leading scholars on the subject to discuss current research and the latest thinking in a range of interrelated topics including Strategy, Organizational Behavior, Public Management, International Business, and many others. Containing completely new essays with extensive referencing to further reading and key ideas, the volumes, in hardback or paperback, serve as both a thorough introduction to a topic and a useful desk reference for scholars and advanced students alike.

goffman total institution: *Young Women's Carceral Geographies* Anna Schliehe, 2021-08-11 Interrogating conceptual ideas around power, punishment and abandonment with specific reference to the experience of young women, this book examines the particular challenges that young women face within the criminal justice system, and traces their journeys in, out and beyond confinement.

goffman total institution: *The Erosion of Autonomy in Long-term Care* Charles W. Lidz, Lynn Fischer, Robert M. Arnold, 1992 In few places in American society are adults so dependent on others as in nursing homes. Minimizing this dependency and promoting autonomy has become a major focus of policy and ethics in gerontology. Yet most of these discussions are divorced from the day-to-day reality of long-term care and are implicitly based on concepts of autonomy derived from acute medical care settings. Promoting autonomy in long-term care, however, is a complex task which requires close attention to everyday routines and a fundamental rethinking of the meaning of autonomy. This timely work is based on an observational study of two different types of settings which provide long-term care for the elderly. The authors offer detailed descriptions of the organizational patterns and routine practices that erode autonomy of the elderly. Their observations lead to a substantial rethinking of what the concept of autonomy means in long-term care. The book concludes with suggestions on how the autonomy of elderly individuals in long-term care institutions might be promoted.

goffman total institution: Encyclopedia of Criminological Theory Francis T. Cullen, Pamela Wilcox, 2010-09-23 'Consistently excellent.... The level and coverage of the content make this an invaluable reference for students studying criminology or taking criminal psychology modules at degree level and beyond' - Adam Tocock, Reference Reviews In discussing a criminology topic, lecturers and course textbooks often toss out names of theorists or make a sideways reference to a particular theory and move on, as if assuming their student audience possesses the necessary background to appreciate and integrate the reference. However, university reference librarians can tell you this is often far from the case. Students often approach them seeking a source to provide a quick overview of a particular theory or theorist with just the basics - the who, what, where, how and why, if you will. And reference librarians often find it difficult to guide these students to a quick, one-stop source. In response, SAGE Reference is publishing the two-volume Encyclopedia of Criminological Theory, available in both print and electronic formats. This serves as a reference source for anyone interested in the roots of contemporary criminological theory. Drawing together a team of international scholars, it examines the global landscape of all the key theories and the theorists behind them, presenting them in the context needed to understand their strengths and weaknesses. In addition to interpretations of long-established theories, it also offers essays on cutting-edge research as one might find in a handbook. And, like an unabridged dictionary, it provides concise, to-the-point definitions of key concepts, ideas, schools, and figures. Coverage will include: contexts and concepts in criminological theory the social construction of crime policy implications of theory diversity and intercultural contexts conflict theory rational choice theories conservative criminology feminist theory.

goffman total institution: Corrections Mary K. Stohr, Anthony Walsh, Craig Hemmens, 2009 This is a core text/reader for undergraduate and graduate corrections courses. It can serve either as a supplement to a core textbook or as a stand-alone course text. Each chapter begins with 15 pages of text that includes photos, figures and tables and is followed by carefully selected articles authored by leading scholars in the field.

goffman total institution: Happy: LGBTQ+ Experiences of Australian Pentecostal-Charismatic Christianity Mark Jennings, 2023-01-01 This book relates the unique experiences of Lesbian, Gay, Bisexual, Transgender and Queer/Questioning (LGBTQ+) people in Australian Pentecostal-Charismatic Christian churches. Grounded in the theoretical contributions of Michel Foucault, Judith Butler, Lewis Coser, and others, the book exposes the discursive 'battleground' over the 'truth' of sex which underlies the participants' stories. These rich and complex narratives reveal the stakes of this conflict, manifested in 'the line' - a barrier restricting out LGBTQ+ people from full participation in ministry and service. Although some participants related stories of supportive—if typically conservative—congregations where they felt able to live out an authentic, integrated faith, others found they could only leave their formerly close and supportive communities behind, 'counter-rejecting' the churches and often the faith that they felt had rejected them.

goffman total institution: Public Camp Orders and the Power of Microstructures in the Thai-Burmese Borderland Annett Bochmann, 2021-06-24 Based on extensive ethnographic field research, Public Camp Orders and the Power of Microstructures in the Thai-Burmese Borderland makes a unique contribution to empirical and theoretical discourses on camp institutions, (forced) migration, and border regimes. Focusing on public camp life, everyday interactions, and the concept of microstructures, this ethnography explores local practices of mobility, governance, and economy in the context of plural and temporary environments.
