gabor mate documentary: Applying the Therapeutic Function of Professional Supervision Nicki Weld, 2023-04-10 This book brings a fresh approach and conversation to the practice of professional supervision for human services by specifically articulating its often performed, but unnamed and under-explored therapeutic function. The discussion of the therapeutic function is timely given the rising complexities in our world, and the increasing awareness of emotional impacts of human service work. These impacts include stress, distress, emotional labour, indirect trauma, and direct trauma. Posing a challenge and invitation to supervisors to comfortably inhabit the therapeutic function of supervision to increase emotional support to workers, it places safe practice and worker wellbeing at the heart of supervision to enable high quality service delivery for often the most vulnerable in society. While underpinned by theory, it is written to be practically applied and is developed from a 'lived experience' perspective, offering a unique glimpse into actual practice. By modelling one of the main aims of professional supervision, which is to facilitate and enable the integration of experience into learning and knowledge, it will be of interest to all practitioners across a broad range of human services, particularly both new and experienced supervisors.

gabor mate documentary: Women Without Kids Ruby Warrington, 2023-03-28 "The work Ruby is doing is liberating." —Glennon Doyle, New York Times bestselling author of Untamed "A startling, confronting, and liberating treatise." —Holly Whitaker, New York Times bestselling author of Quit Like a Woman What is "woman" if not "mother"? Anything she wants to be. Foregoing

motherhood has traditionally marked a woman as “other.” With no official place setting for her in our society, she has hovered on the sidelines: the quirky girl, the neurotic career obsessive, the “eccentric” aunt. Instead of continuing to paint women without kids as sad, self-obsessed, or somehow dysfunctional, what if we saw them as boldly forging a first-in-a-civilization vision for a fully autonomous womankind? Or as journalist and thought leader Ruby Warrington asks, What if being a woman without kids were in fact its own kind of legacy? Taking in themes from intergenerational healing to feminism to environmentalism, this personal look and anthropological dig into a stubbornly taboo topic is a timely and brave reframing of what it means not to be a mom. Our experiences and discourse around non-motherhood are central to women’s ongoing fight for gender equality. And whether we are childless by design or circumstance, we can live without regret, shame, or compromise. Bold and tenderhearted, *Women Without Kids* seeks first and foremost to help valorize a path that is the natural consequence of women having more say about the choices we make and how our lives play out. Within this, it unites the unsung sisterhood of non-mothers—no longer pariahs or misfits, but as a vital part of our evolution and collective healing as women, as humans, and as a global family.

gabor mate documentary: Medicine Unbundled Gary Geddes, 2017-02-15 We can no longer pretend we don't know about residential schools, murdered and missing Aboriginal women and 'Indian hospitals.' The only outstanding question is how we respond. —Tom Sandborn, Vancouver Sun A shocking exposé of the dark history and legacy of segregated Indigenous health care in Canada. After the publication of his critically acclaimed 2011 book *Drink the Bitter Root: A Writer's Search for Justice and Healing in Africa*, author Gary Geddes turned the investigative lens on his own country, embarking on a long and difficult journey across Canada to interview Indigenous elders willing to share their experiences of segregated health care, including their treatment in the Indian hospitals that existed from coast to coast for over half a century. The memories recounted by these survivors—from gratuitous drug and surgical experiments to electroshock treatments intended to destroy the memory of sexual abuse—are truly harrowing, and will surely shatter any lingering illusions about the virtues or good intentions of our colonial past. Yet, this is more than just the painful history of a once-so-called vanishing people (a people who have resisted vanishing despite the best efforts of those in charge); it is a testament to survival, perseverance, and the power of memory to keep history alive and promote the idea of a more open and just future. Released to coincide with the Year of Reconciliation (2017), *Medicine Unbundled* is an important and timely contribution to our national narrative.
