giuseppe wealth management: Frontier Topics in Banking Elisabetta Gualandri, Valeria Venturelli, Alex Scip, 2019-05-28 The aim of this book is twofold: Firstly to focus on the development of new instruments and topics in the financial industry. Secondly to analyze the development of “old” themes applied to different international contexts, such as cross-border banking and the role of government financial resources in China. With these goals in mind, the book explores the investigation of new instruments for the financing of SMEs and new ventures, such as mini bonds and equity crowdfunding. Additionally, it covers the field of corporate governance and corporate social responsibility including financial inclusion, gender roles, disclosure, social media roles and litigation. The book also investigates the choices followed by the Royal Swedish Academy in the selection of Nobel laureates in economics science to analyze their influence on the financial industry. Geared to banking academics, researchers and students, this book uncovers the most prominent issues within the banking industry today.

giuseppe wealth management: Alternative Acquisition Models and Financial Innovation Daniele D'Alvia, Ettore Maria Lombardi, Yochanan Shachmurove, 2023-10-11 This is the first book written in English on special purpose acquisition companies (SPACs) in the context of European and Italian financial law, introducing the topic with a general overview on the European stage. It is also the first book on European financial regulations of SPACs. As such, it is a groundbreaking reference text for SPAC studies at the international level. Alternative Acquisition Models and Financial Innovation: Special Purpose Acquisition Companies in Europe, and the Italian Legal Framework offers the most comprehensive overview of the current international financial regulations of SPACs in the EU and UK compared to the main legal system where SPACs originated—the US. This edited book is focused on finding a European legal framework for SPACs by discovering whether the Alternative Investment Fund Managers Directive (AIFMD) or the Undertakings for the Collective Investment in Transferable Securities Directive (UCITS) are applicable to them and why, as well as identifying the objectives of financial regulation of SPACs in the EU, US and UK. Essentially, the edited collection explores soft law and self-regulation instances against the state-based Westphalian approaches centred on hard law instances; describes practical examples of SPACs in Italy and Europe; and analyses the limits and perspectives of such investment vehicles on the Italian capital market as well as their possible uses as forms of shadow banking and venture companies at international levels.
